## SUMMARY

Experienced Mainframe Developer with a proven track record of developing and maintaining COBOL programs to ensure accuracy and efficiency in legacy systems. Skilled in conducting impact analysis, implementing code changes, and collaborating with cross-functional teams to drive system enhancements. Recognized for problem-solving abilities, dedication to meeting project deadlines, and fostering a culture of continuous learning and improvement.

## KEY COMPETENCIES

Improved System Performance:  
Implemented code changes that boosted system performance and stability in production environments.

Exceptional Problem-Solving:  
Recognized for adept problem-solving skills, ensuring timely resolution of complex issues.

Deadline Adherence: Consistently met project deadlines, demonstrating reliability and dedication to project success.

## PROFESSIONAL EXPERIENCE

Infosys, Pune

Sept 2021 - Feb 2024

### Mainframe Developer

Versatile and dedicated Mainframe Developer with a proven track record of developing and maintaining COBOL programs to uphold accuracy and efficiency within legacy systems. Adept at conducting comprehensive impact analysis to evaluate proposed changes, thereby mitigating risks and facilitating smooth implementation processes. Skilled in conducting rigorous unit-level testing to ensure code quality and system reliability. Experienced in collaborating with cross-functional teams to implement enhancements and troubleshoot production issues. Committed to providing technical support and fostering a culture of continuous learning and improvement.

### Key Accomplishments:

- Developed and maintained COBOL programs, ensuring precision and efficiency in legacy systems.
- Conducted thorough impact analysis, effectively assessing proposed changes and minimizing associated risks.
- Implemented unit-level testing procedures, swiftly identifying and resolving issues to uphold code quality and system reliability.
- Collaborated seamlessly with cross-functional teams to implement enhancements and address production issues promptly.
- Provided comprehensive technical support and guidance, nurturing a culture of ongoing learning and advancement.

## EDUCATION & CERTIFICATIONS

### Bachelor's Degree in Computer Science Engineering

RGPV University, 2021

### ADDITIONAL SKILLS:

Strong analytical and problem-solving abilities  
Effective communication and teamwork skills  
Commitment to quality and attention to detail

## TECHNICAL SKILLS:

- Programming Languages: COBOL, JCL
- Databases: DB2
- Tools/Utilities: Topaz WorkBench
- Operating Systems: Mainframe (z/OS)
