PERSONAL DETAILS

Nationality: Indian.

Passport: R4662171.

Passport Validity: 12th September 2027.

EDUCATION DETAILS

Bachelor of Engineering in Computer Science.

S. D. M College of Eng. & Tech, Visveswaraya Technological University, Dharwad, India with 76.2.

PROFESSIONAL EXPERIENCE

Senior Lead Consultant	Prodcon Tech Services Pvt Ltd	May 24 to Nov 2024.
Lead Engineer	Moback Technologies India Pvt Ltd	Aug 2022 to Feb 2024.
Project Lead	Larsen and Toubro Infotech Pvt Ltd	April 2017 to Aug 2022.
Senior Software Engineer	First American (India) Pvt Ltd	May 2016 to Nov 2016.
Senior System Engineer	IBM India Pvt Ltd	Mar 2010 to May 2016.
Software Developer	MResult Services Pvt Ltd	Jan 2008 to Feb 2010.

PROJECTS DETAILS

PROJECT #1

Title : Nimble
Client : Kornferry.
Software & Tools : .Net Core, C# .Net, React, Entity Framework, WEB API, JSON, PostgreSQL, JIRA, AZURE FUNCTIONS, AZURE PIPELINES, AZURE SERVICE BUS, AZURE KEY VAULT.
Team Size : 18.
Duration : Aug 22 to Feb 24.

Description: Nimble is a candidate recruitment and hiring management tool for various organizations under a single platform. Candidates for different job requisitions go through different phases from initial phase to final phase till selected/ rejected phase. Everything is tracked in this tool.

Roles and Responsibilities –

- Requirement Analysis, Coding, Unit Testing, and Defect free deliverables and bug fixing.
- Deployed .Net systems to various environments like Development, QA and SQA.
- Ensured the performance, quality and responsiveness of application.
- Wrote clean, scalable code using .NET programming languages for WEB API's.
- Monitored the logs and resolved the bugs in minimal time.
- Followed best practices so as to optimize the code as well as enhance the performance.

PROJECT #2

Title : **Sample Manager LIMS**
Client : LabCorp(through Prodcon)
Software & Tools : Sample Manager LIMS, MS SQL Server, VGL, C#
Team Size : 02
Duration : May 24 to Nov 2024.

Description:

- Sample Manager is a laboratory information management system used in handling and reporting of laboratory data. It uses a database to collate laboratory information such as samples, tests, results, instruments and people. The database consists of data tables that reflect laboratory requirements. The SM application is designed to work in client/server mode.

Roles & Responsibility:

- Worked on LIMS interfaces with other application using VGL code.
- Familiar with lab systems, integration techniques, and web services with understanding and exposure specifically to LIMS concepts
- Worked on LIMS interfaces with other application using VGL code. Reviewed the code as per requirements and coding standards
- Experienced in trouble shooting and debugging Sample Manager applications.
- Experience in Customer facing ability, analytical ability, communication and articulation skills.
- Helping team members with technical inputs.
- Strong working functional knowledge of Sample Manager version 10 and greater.

PROJECT #3

Title : Brightpoint Online (<https://www.brightpointonline.co.nz/>)
Client : Ingrammicro New Zealand.
Software & Tools : .Net Core, MVC, C# .Net, Entity Framework, WEB API, JSON, jQuery, CSS, Sql Server 2015
Team Size : 1.
Duration : May 21 to Till Aug 2022.

Description: Brightpoint online is an inventory management system which helps in managing different brand mobiles, laptops, tablets, drones and their accessories. Helps track stock levels and product movements between suppliers, Warehouses and distribution agents. Can be used for handset repair entry, creating a repair and its tracking, order Tracking, Invoicing, pricing, generating different reports for sales, stock in hand, returns, swaps, receipts.

Roles and Responsibilities –

- Requirement Analysis, Coding, Unit Testing, and Defect free deliverables and bug fixing.
- Deployed .Net systems to various production and pre-production environments and troubleshoot issues.
- Ensured the performance, quality and responsiveness of application.
- Wrote clean, scalable code using .NET programming languages.
- Actively involved as an individual contributor.
- Responsible for analyzing and removing the legacy calls and upgrading the same calls to API calls.
- Fixing all the issues after migrating.
- Code review, code quality analysis and assurance, and CI/CD process.

PROJECT #4

Title	: Human Resources Solutions & Services (HRSS)
Client	:Citigroup
Software & Tools	:.Net Core, C#, Entity Framework, LINQ, Automation Anywhere, CAML, SharePoint, JIRA
OS	: Windows XP Professional with IIS.
Team Size	: 9
Duration	: Dec 17 to Apr 19.

Description:

- Human Resources Self Services (HRSS) application, an auto interview-scheduling tool used to schedule interviews for the candidates and they're by making the recruitment process an automatic one and reducing the human effort.
- Once the HR creates a job in the application and invites the eligible candidates, everything will be automatic like sending the interviewer/s free time for an interview, to the candidates in the mail.
- It waits for the candidate's response if no response then it sends the follow-up mail. The automatic process is being done by Automation Anywhere tool (RPA tool).
- It also has a rescheduling interview feature. The application also supports different types of interviews like Single, Back-2-Back, and Panel type of interviews.
- This application is available for different regions - North America, Latin America, and the Asia Pacific.

Roles & Responsibility:

- Maintaining and leading a team of 7-8 members, assigning tasks and providing the updates to client on daily basis in JIRA tool.
- Develop and modify Microsoft ASP.NET Applications, .NET components.
- Develop and maintain SQL database scripts, including views, triggers and stored procedures.
- Deploy .Net systems to various production and pre-production environments and troubleshoot issues.
- Create technical documentation such as design documents, specifications, software architecture documents, and instructions.
- Analyze design and architectural issues and questions.
- Ensure that the deliverable is done by the ETA and meets the client requirement.
- Fixing Bugs and Monitoring of the logs.
- Change Management and Incident Management (ITIL processes) for deployments
- Collaborating with other teams like Middleware, Digital Ops, L1 and L2 teams on deployments, CR approvals, and Incident Follow ups.
- Review the code as per the requirements and coding standards.
- Helping team members with technical inputs.
- Collaborate with the team members during the entire project development cycle.
- Documentation of the process of Change and Incident Management.

PROJECT #5

Title	: UTP- A Bug Tracking Tool
Client	:Intel
Software & Tools	: ASP .Net 4.5, VB .Net, SQL Server, MVC, WCF, jQuery, LINQ.
OS	: Windows XP Professional with IIS.
Team Size	: 7
Duration	: April 17 to Aug 17.

Description:

- SMS UTP is a bug tracking tool, which is interfaced with RADAR, where the incidents are raised and synched with SMS UTP and vice versa, using Syssync
- Complete with fields that will let you provide information about the bug, environment, module, severity, screenshots, etc.

Roles & Responsibility:

- Requirement collection from the client and analyzing the same.
- Understand the existing system and functionalities.
- Development and enhancements.
- Executing the test scripts added by the QA team in TFS.
- Review the code as per requirements and coding standards.
- Helping team members with technical inputs.

PROJECT #6

Title	:Document Repository
Company	:First American (India)
Software & Tools	:ASP .Net 4.5, VB .Net, SQL Server, MVC, WCF, jQuery, LINQ.
OS	:Windows XP Professional with IIS.
Team Size	:12
Duration	: May 16 to Nov 16.

Description:

- Document Repository functions as a central point of access to all documents, including Document Preparation documents like Title Reports, Escrow Instructions, Policies and other documents that are required when there is a buying and selling type of property transaction in the USA.

Roles & Responsibility:

- Requirement collection from BSA and analyzing the same.
- Understand the existing system and functionalities.
- Creating tasks in TFS providing proper tasks and deadlines.
- Development and enhancements.
- Executing the test scripts added by the QA team in TFS.
- Review the code as per requirements and coding standards.
- Helping team members with technical inputs.

PROJECT #7

Title	:Samtrygg
Company	:Samtrygg, Sweden
Software & Tools	: ASP .Net 4.5, MVC, C#, Sql Server 2012, WCF, jQuery, LINQ, EF, GIT, Green Pine.
OS	: Windows 10 with IIS.
Team Size	: 4

Description:

- Samtrygg a website to create better conditions in the dysfunctional sublet housing market and at the same time become a natural meeting place for people who want a safe and smooth sublease. Its service provides a safe marketplace for subleasing homes in Sweden by giving sub lessors payment guarantee, sublet insurance, and safe contracts. In addition, sub lessors do not have to pay the deposit or advance. This website takes an active part in helping both parties following the rules connected to the sublease and act as a financial intermediary to minimize the risk of fraud.

Roles & Responsibility:

- Understand the existing system and functionalities.
- Proper task creation in green pine and providing proper deadline.
- Development and enhancements.
- Review the code as per requirements and coding standards.
- Helping team members with technical inputs.

PROJECT #8

Title	:Event Tracking System (ETS)
Client	:LAM Research
Software & Tools	:ASP .Net 4.5, C#, SQL Server, MVC, AJAX, WCF, Telerik Controls, LINQ.
OS	: Windows XP Professional with IIS.
Team Size	: 08
Duration	: Aug 15 to May 16.

Description:

- The ETS is an application that is available only for LAM Employees involved in operations and maintenance in LAM to keep a track of various events like environmental, health and safety incidents including injuries, illnesses, spills, leaks, regulatory inspections, property damage, and near-miss events.
- Risk Management-By-Walking around (RMBWA) Reporting - RMBWA module allows employees to proactively track and assign corrective and preventive action for unsafe conditions, behaviours and management system breakdowns.
- Report generation – Generating separate reports- Globally, for each VP organization and Business groups depending on the Year, Month, Quarter, and in specific date gap.
- Searching EHS and RMBWA Events.
- User Management- User Management for each site so that only users assigned to the site should get the notifications if any event is reported.
- Role Management- Creating new roles and assigning them the required rights.

Roles & Responsibility:

- Understand the existing system and functionalities.
- Requirement collection and analysis.
- Development and enhancements.
- Review the code as per requirements and coding standards.
- Helping team members with technical inputs.

PROJECT #9

Title	:Common Configurator Platform (CCP)
Client	:ABB India Pvt Ltd
Software & Tools	: ASP .Net 4.5, C#, SQL Server, AJAX,
OS	: Windows XP Professional with IIS.
Team Size	: 08
Duration	: April 14 to Jan 15.

Description:

- CCP is the global tendering tool for the Power Product Division. It serves as the communication tool between the Front-End Sales (FES), Global Marketing Units (GMU), and the Focused Feeder Factories (FFF).
- CCP will also support the internal tendering process from the Power Products Division to the ABB System units.
- CCP is an enabler for both the sales force and the New Business Model project.
- CCP serves as the link between the Front-End Sales (FES), Global Marketing Units (GMU), and the Local Business Units (LBU).
- Instantaneously and consistently provide price and delivery options.

Roles & Responsibility:

- Understand the existing system and functionalities.
- Requirement collection and analysis.
- Development and enhancements.
- Review the code as per requirements and coding standards.

PROJECT #10

Title	:Bird Avert Dashboard
Client	:Shell Petroleum (www.shell.com)
Software & Tools	: ASP .Net, C#, SQL Server 2005, AJAX, JavaScript.
OS	: Windows XP Professional with IIS.
Team Size	: 8
Duration	: April 13 to Sep 13.

Description:

- The Bird Avert Dashboard Solution is a webapplication that is available for Shell and Bird Crew personnel involved in the operations and maintenance of the Bird Avert system.
- The Dashboard system consists of the following components.
- Near real-time Monitoring Alert Conditions Module.
- Near real-time Notification Module.
- Near real-time Bird Avert Equipment Monitoring.
- Dashboard Console to Display the System Status.
- Reporting for Service and Audits Module.
- Administration for Alerts, Monitoring, and Security.

Roles & Responsibility:

- Understand the existing system and functionalities
- Requirement collection and analysis.
- Development and enhancements.
- Review the code as per requirements and coding standards.
- Unit Testing and Bug Fixing.

PROJECT #11

Title : **Hazard Registry**

Client : Shell Petroleum (www.shell.com)

Software & Tools : ASP .Net, C#, SQL Server 2005, AJAX, JavaScript.

OS : Windows XP Professional with IIS.

Team Size : 5

Duration : Oct 11 to Nov 12.

Description:

The HSE Hazard Registry project was authorized for the Scot ford Upgrader to create an easy method to organize and search their hazard database. The existing documentation of the hazard registry was maintained in a Microsoft Word document which did not contain any structured formatting. It was difficult to search and to add new hazards to the registry. The project was initiated to allow any authorized user to search the hazard registry to allow them to easily retrieve all the hazards associated with a situation at the Upgrader.

PROJECT #12

Title : **SMART (Skill Matrix for Application and Resourcing Tool)**

Client : IBM Internal Tool.

Software & Tools : ASP .Net 3.5, C#, AJAX, Sql Server 2005.

OS : Windows XP Professional with IIS.

Team Size : 8

Duration : May 10 to July 10.

Description:

SMART is an IBM internal tool that can be used by both Team Members and the Project Managers. Team Members have options to add information like Personal Details, Official Details, Project Details, and Project Manager Details in Add Employee Page. Once approved by Project Manager the details can be viewed, edited and updated in separate pages. Team Members have access to only the above Pages. Delete Employee is accessible by the Project Manager to delete the employee. Project Manager, however, has access to other Admin Pages like Adding New Skills, Employee Type, Location, Skill Level, Technology, Working Hours etc.

Roles & Responsibility:

- Understand the existing system and functionalities
- Requirement collection and analysis.
- Development and enhancements
- Review the code as per requirements and coding standards.

PROJECT #13

Title : **Bunts Sangha Community Portal**

Client : Bunts Sangha Mumbai.

Software & Tools : Dot Net Nuke 4.8.1, ASP .Net 2.0, C#, JavaScript

OS : Windows XP Professional with IIS.

Duration : Feb 09 to Oct 09.

Description:

Community portal consists of different sections like Job, Matrimony, Donation, Classifieds, Fun Corner, Events, Eminent and Obituaries, Membership Registration for the Portal, Events section (Day, Week, Month) for displaying Events scheduled List wise, Day wise, Week wise and Month wise. All modules provide the functionality to learn more about the event and to register for the Events. Admin Modules like Adding new events and delete events and approval/denial of the applied membership of the portal.
