EDUCATION

2015-2019

ANNA UNIVERSITY

- Bachelor of Engineering in Computer Science

2019-2020

NETWORKERS HOME

- Cyber X Masters
- CCNA, CEH, AZURE, AWS, Python

SKILLS

- Blue teaming and Red teaming
- Security Architecture
- SOC Building from Scratch
- Vulnerability Assessment & Penetration Testing
- AWS & Azure Cloud Security
- Coding & Automation (Python)
- Active Directory Exploitations & Hardening
- Digital Forensics
- OWASP Top 10 & Application Security
- EDR, XDR, DLP, SIEM, SOAR, VPN, PMP

PROFILE

Passionate and driven cybersecurity professional with hands-on experience in both blue and red teaming activities. Skilled in fortifying security postures and enhancing defenses for organizations, with a strong focus on threat detection, incident response, and proactive mitigation. Proficient in cloud security, Python automation, and application security, leveraging these skills to streamline processes and improve resilience. Dedicated to continuous learning and seeking opportunities that will expand my impact and refine my expertise in cybersecurity.

WORK EXPERIENCE

RakBank - UAE

2024 - PRESENT

Senior Security Consultant

- Security Solution Design and Implementation: Developed and maintained security frameworks to safeguard critical assets.
- Incident Response and Investigations: Led security incident responses and in-depth investigations to minimize risks.
- Identity and Access Management (IAM): Managed secure access controls and ensured regulatory compliance.

Upstox - Bangalore

2023-2024

Senior Security Engineer

- SOC Architecture and Development: Designed, built, and matured the Security Operations Center (SOC) for robust threat detection and response.
- SOC and Cyber Defense Management: Oversaw SOC operations, implementation, and administration of cyber defense measures.
- Red Teaming and Breach Simulations: Led red teaming exercises, breach simulations, and phishing campaigns to test and strengthen defenses.
- Penetration Testing: Conducted penetration tests for APIs, web applications, and thick clients to identify and address vulnerabilities.
- Cloud Security: Enhanced AWS and Azure security practices, contributing to cloud security improvements.
- Application Security: Participated in application security assessments and implementations.
- Python Tool Development: Developed security tools and scripts in Python to support automation and analysis.

CERTIFICATIONS

- Certified Ethical Hacker Master
- CloudSEK XVigil Professional
- API Security Fundamentals (API Security University)
- Certified AppSec Practitioner (CAP) The SecOps Group
- Azure Penetration Testing (Altered Security)
- Sumologic SIEM essentials

INTERESTS

- Creating and Playing CTF's
- Bug Bounty Hunting
- Cyber Security Blogging
- Coding
- Learn New Technologies

OLA- Bangalore

2021-2023

Security Operations Engineer

- Security Risk Monitoring & Incident Response: Expert in monitoring security risks, responding to incidents, and conducting forensic analysis.
- Proficient in SIEM, SOAR, and VAPT: Skilled in leveraging SIEM, SOAR, and conducting vulnerability assessments and penetration testing (VAPT) for robust security.
- Automation with Python & Shell Scripting: Automated security processes using Python and shell scripting to enhance efficiency.
- Compliance & Audit Expertise: Experienced in GDPR, RBI, and PCI audits, ensuring alignment with regulatory standards.
- SOC Maturity Program Contributor: Played an active role in the SOC maturity program to advance security operations capabilities.
- Phishing Simulation & Red Team Activities: Engaged in phishing simulations, red team exercises, and penetration testing to assess and improve security.
- Cloud & Enterprise Security: Contributed to cloud security initiatives and enterprise-level security enhancements.

Networkers Home

2020-2021

Cyber Security Instructor

- CCNA, CEH, AWS, AZURE, Python automation
- Created and conducted CTF Competitions

PERSONAL PROJECTS

CTF Room on Tryhackme

<https://tryhackme.com/jr/mnscft1initcrew>

Fake Domain Identification Tool

This tool will find all true positive fake domains of an Organization

Cyber / Brand/ Infra Threat Monitoring Tool

Developing a Threat/Risk Monitoring tool

Cyber defenceArchitecture design using Open source solutions

Built a SOC architecture using ModSecurity, Wazuh, Graylog, Jira, Snort, Suricata, and custom Python scripts to enhance threat detection and incident response capabilities.

ACHIEVEMENTS

Hacker Rank on HackTheBox, TryHackme

Awarded OLA Best performer of the year 2022

EC-Council CEH Hall of fame finalist 2021

CloudSEK CTF 2020 Winner
