SKILL SUMMARY

Language: Oracle, SQL, Unix

Tools: JIRA, SSIS, DB ever

Database: Oracle 21g, 11g, Microsoft SQL, GCP, Snowflake

ACADEMIC SUMMARY

Pavendar Bharathidasan College of Engineering & Technology - Tiruchirappalli.

B.E Electronics and Communication Engineering
2009-2013

Time Period : November 2021 to February 2023

3. 2nd previous Employer: Zifo data

Designation : Software Engineer

Time Period : August 2016 to October 2021

Project:1 # Roles and Responsibilities

- Understand the project flow and monitoring trades.
- Validate the huge volume of data in the source environment and target environment.
- Created test scenario documents, Test case documents, and ETL mapping documents.
- Using various types of schemas, dimension tables, and fact tables to maintain trade details.
- Build SQL queries using subqueries, multiple joins, analytical functions, and group functions.
- I have worked in Data structure validation, Transformation validation, Data quality validation, and row count validation.
- Huge volume of data will be validated using SQL queries and less volume of data will be validated using Microsoft Excel.

Project: 2# Roles and responsibilities

- Worked with the Business team closely to understand requirements, functionality, and design.
- Analyzed the project and tested source data and staging data, Target data using SQL queries to validate.
- Experience in Creating test cases for manual test execution using test mapping documents.
- Once the Defect was identified in the testing environment I confirmed and communicated with the developer after I raised the bug in JIRA.
- Strong understanding of Software Testing life cycle Process and create Traceability matrix documents, reporting documents.
- Attended the scrum meeting and update status for day-to-day activities

Declaration

I hereby declare that the details furnished above are true to the best of my knowledge and belief.

Place: Chennai

1 #Project Details

Domain: Investment Banking

Client: Hitachi Capital

Technologies: Oracle SQL, SSIS, Unix

Tools: SQL developer, JIRA

Role: ETL Testing, Manual Testing

2#Project Details

Domain: Banking

Client: Albertsons

Technologies: Oracle 11g, 12c, SSIS, Unix

Tools: DB ever, SQL developer, JIRA

Role: ETL Testing, Manual Testing, Functional Testing
