Summary

SUMMARY

Senior Test Analyst with 5+ years expertise in Web and API automation (Selenium, REST Assured, Java). Experienced in CI/CD, BDD with Cucumber, and test frameworks achieving 80%+ coverage. Reduced regression cycles by 65% using POM and data-driven approaches. Proficient with JIRA, Azure DevOps, Git.

Work Experience

WORK EXPERIENCE

Senior Test Analyst , Espranza Innovations Pvt. Ltd. Mohali, Punjab **July 2022 - October 2024**

- Implemented and maintained automated test frameworks using Selenium WebDriver, Cucumber, Java, TestNG, and Jenkins, Git resulting in 25% reduction in bug occurrences.
- Collaborated with development teams to optimize test automation processes, leading to 20% increase in deployment speed.
- Managed comprehensive test suites and cases in Azure DevOps, improving testing accuracy and efficiency.
- Generated detailed test reports and tracked defects using Azure DevOps to enhance project visibility and accountability.

Software Test Engineer, Multinet Technologies Pvt. Ltd.Hyderabad,Telangana **Feb 2020 - Jan 2021**

- Analyzed requirements documentation and created comprehensive Traceability Matrix for effective test case alignment
- Designed and executed test plans incorporating both manual and automation strategies within Agile methodology
- Performed thorough regression, system, API, UAT, and integration testing to ensure product stability
- Actively participated in training sessions to maintain current knowledge of software testing advancements.

Projects

PROJECTS

Homecare Services App:

- Implemented Selenium-Java automation framework for healthcare marketplace, covering booking and payment workflows. Integrated CI/CD pipeline with custom reporting, achieving 80% test coverage for critical flows

PAL (Personalized Adaptive Learning):

- Automated AI-based educational platform testing using Selenium-Java for student assessment and learning paths. built test suite for adaptive algorithms validation, reducing regression testing time by 60%

PML (Paul Merchant Limited):

- Automated travel booking platform testing for flights, hotels, and bus reservations using Selenium-TestNG. Created data-driven framework for booking scenarios, achieving 85% coverage with 65% faster testing cycles

JJP App:

- Developed Selenium automation framework for political campaign data collection and analytics
- Automated survey workflows and validation testing, achieving 90% coverage with 70% reduced manual effort

Education

EDUCATION

July 2016 - July 2019

Bachelor of Engineering

Visvesvaraya Technological University | Belagavi, Karnataka
