📍 Bangalore, India

Professional Summary

- A software professional with 3 years of experience in various areas including RPA, UIPATH, .Net(C#), Web, Windows, and MySQL Server with a strong working knowledge of Re Framework and UIPATH Studio.
- Proficient in various aspects of RPA including designing, coding, testing, and debugging using tools like UiPath.
- Skilled in analyzing and documenting business processes, managing multiple projects concurrently, and prioritizing tasks effectively.
- Strong software development skills with expertise in bug handling, issue resolution, and application enhancement. Experienced in automation feasibility analysis, design, development, testing, deployment, and monitoring.
- Proficient in managing deliveries across different environments and providing support for domains including Insurance, Finance, Healthcare, and Pharma. Additionally, experienced in designing, configuring, developing, fine-tuning, and optimizing complex web and windows-based applications.
- Capable of providing long-term support, training team members, assessing automation opportunities, and delivering solutions. Possesses qualities of self-sufficiency, flexibility, motivation, teamwork, multitasking, adaptability, and strong analytical problem-solving skills.

Technical Skills

- Programming Languages: Core Java, HTML, CSS, Bootstrap.
- Databases: SQL Server 2005/2008 R2.
- Operating Systems: Windows 10, Mac.
- Tools: Ui-Path, Azure Devops, GitHub and MS office.
- Experience in building RPA (Robotics process Automation) solutions using Ui-Path.
- Experience in SQL, how to insert, read, update and delete data in Data Base with the help of queries.

Experience

Employer: Emids Technologies

March 2022- Present

- Got trained for Java Full stack developer and designed capstone project using Frontend Tools Like HTML, CSS, React, Boot Strap, Angular, Maven, Java, spring, Tomcat, Postman API.
- Experience in building RPA (Robotics process Automation) solutions using Ui-Path.
- Experience in SQL, how to insert, read, update and delete data in Data Base with the help of queries.
- Building generic code which works for multiple clients.

Role: Analyst-RPA

RPA Project Description

- Bot will open all required applications and the process to extract the data from particular web application, once imported ui-path will add the items into the queue.
- Once adding items is completed, Bot will start the first transaction and add all the details in respective application, like BOT will fetch the required information from first application and search Patient/Member details into another application based on the extracted information if they are already exist within the application else the Patient/Member will be added to the another application as a new referral.
- After processing of all the transactions bot will send the output file to the business stating that all the transactions are successfully ran with output file.

Responsibilities:

- Implemented over 20 automations using UiPath, achieving a 100% reduction in manual work.
- Conducted comprehensive analysis, documentation and flow creation, ensuring coverage of all scenarios.
- Involved in PDD walkthroughs, collected the requirements from client understanding the end to end process. Prepared the Solution Design Document, WBS. Involved in SDD preparation. Developed the BP solution as per the requirements.
- Executed the test cases in SIT Phase and supported client in UAT phase. Supported the tool during warranty and taking respective signoffs.
- Extracted data from various sources like PDFs, images, web pages and posted output to data.
- Design, development, testing, and deployment of bots using Ui-Path. Demonstrated and effectively utilized different Commands like Database, Web Applications, Excel, PDF, Image and Services (REST).
- Preparing Impact Analysis by analyzing the existing system for automation development and performed task scheduling using Ui-Path like Schedule Manager, Task Editor.
- Worked extensively with File and folder objects, automating data transfers, including importing/exporting data between applications or files.
- Working with SQLfor whatever processes is deployed in production, adding all processes in DB. Maintaining and managing the DB.

Education

● **BACHELOR OF TECHNOLOGY (WITH HONOURS)** 2016-2020

□ Gandhi Institute for Technological Advancement **Grade:-** 7.42 CGPA

● **HIGHER SECONDARY(12TH)**

□ S S B Inter College Karmatand Bokaro **Grade:-**71%

● **SECONDARY**

□ R N High School Hakedag Haridih **Grade:-**81.4%
