Professional Summary

Dynamic and results-driven **MEAN Stack Developer** with 6.5 years of experience in delivering high-quality web applications. Expertise in **Angular**, **Node.js**, **Express.js**, **MongoDB**, and **GraphQL**, with a proven ability to optimize both front-end and back-end architectures. Adept at designing and developing scalable, efficient systems, collaborating with cross-functional teams, and managing projects to ensure on-time delivery. Passionate about adopting new technologies to tackle complex challenges and provide innovative solutions in web development.

Technical Skills

- **Frontend:** Angular, HTML5, CSS3, JavaScript
- **Backend:** Node.js, Express.js, GraphQL
- **Database:** MongoDB, SQL
- **Version Control:** Git, GitHub
- **Tools:** AWS EC2, S3
- **Project Management:** Agile, Scrum
- **Others:** RESTful APIs, JWT Authentication, WebSocket, Google Maps API

Professional Experience

Senior Chief Manager

Cholamandalam Investment and Finance Private Limited | March 2024 – November 2024

- Led a development team to design and implement backend systems using **Node.js** and **Express.js**.
- Optimized application performance with **GraphQL** to improve data fetching and reduce server load.
- Integrated **MongoDB** for efficient, high-performance database management.
- Oversaw the deployment of end-to-end solutions, ensuring optimal security and scalability.

Software Engineer

Techaffinity Global Private Limited | October 2021 – November 2023

- Developed scalable web applications using the **MEAN stack** (**Angular**, **Node.js**, **Express.js**, **MongoDB**).
- Integrated **GraphQL** for efficient client-server communication.

- Led initiatives to improve code quality by implementing testing and optimization strategies.

Software Engineer

I Square Soft | June 2021 – October 2021

- Created dynamic web applications with **Angular** and **Node.js**.
- Developed backend systems with **Express.js** and connected them with **MongoDB** for real-time data management.
- Collaborated with cross-functional teams to enhance project features and deliver optimal results.

Full Stack Developer

Makeiton Technologies | August 2020 – May 2021

- Built robust full-stack applications using **Angular** and **Node.js**.
- Integrated **GraphQL** APIs to enhance data fetching efficiency and reduce loading times.
- Focused on ensuring UI/UX improvements through continuous feedback and iterations.

Full Stack Developer

Triangle Minds | November 2019 – July 2020

- Led the development of **MEAN stack** web applications, focusing on delivering seamless user experiences.
- Designed backend services using **Node.js** and **Express.js**, optimizing APIs for speed and scalability.
- Integrated **MongoDB** for database solutions and enhanced overall application performance.

Trainee Developer

Osiz Technologies Private Limited | October 2018 – June 2019

- Assisted in the development of client-side and server-side components using the **MEAN stack**.
- Enhanced my skills in **Node.js**, **Express.js**, and **MongoDB** while working on real-time projects.

Projects

LEAP (Loan Providing Application for Vehicles)

Developed a fintech solution enabling users to apply for vehicle loans online with easy processing.

- Implemented a credit scoring algorithm to assess applicant eligibility.
- Integrated bank APIs for loan disbursement and repayment tracking.

- Designed a user-friendly dashboard for applicants to track their loan status and repayment schedules.

MYCOOP (Community-Based Apartment for Vendors)

Designed a web application to facilitate apartment rentals and vendor collaboration within communities.

- Developed a booking system with real-time availability updates and automated invoicing.
- Integrated user reviews, chat functionality, and payment processing for seamless transactions.
- Ensured secure authentication and authorization using JWT-based login system.

Soffra (Mountain Climbing Project)

Built a web-based platform integrating Google Maps for mountain climbers to plan and track routes.

- Implemented geolocation tracking and altitude-based recommendations for climbers.
- Developed a community forum for climbers to share experiences and route details.
- Integrated weather API to provide real-time weather conditions for planned routes.

XCEL TOKEN (Crypto Exchange Script)

Designed and developed a secure cryptocurrency exchange with real-time trading features.

- Implemented multi-currency wallet support and blockchain integration for secure transactions.
- Developed KYC (Know Your Customer) and AML (Anti-Money Laundering) compliance modules.
- Integrated WebSocket for live price updates and transaction monitoring.

JHeaps (E-commerce Application)

Developed a feature-rich e-commerce platform using **MEAN Stack** with a secure payment gateway.

- Implemented product catalog management, user authentication, and order tracking features.
- Optimized performance and scalability to handle high traffic loads efficiently.
- Integrated real-time notifications for order updates and customer interactions.

Education

PGDM in Project Management

MIT School of Distance Education | 2024

B.Tech in Information Technology

Sethu Institute of Technology | 2018
