PROFESSIONAL SUMMARY

- A performance driven professional with experience of **2.9+ years** in software testing (**Manual & Automation**) of web-based applications.
- Have hands-on experience in understanding software and writing detailed test case documents and providing timely information to the development team and client.
- Proficient in a wide range of testing including **System, Functional, Integration, Regression, User acceptance, Smoke and Sanity testing**.
- Have hands on experience in **Selenium – Web driver** for functional and regression testing.
- Hands-on experience in retesting and regression testing for the applications as per the business requirement.
- Have maintain always good numbers in the **Defect reject ratio** and **Defect leakage ratio**.
- Have hands-on experience and knowledge on **Core Java**.
- A successful player with **Agile** methodology, to maximize the effectiveness of a final product.
- Used the management tool **JIRA** to manage requirements, test cases and Issue management.
- Fast diligent learner with the goal of understanding new technology platform, and best practices of QA methodologies/techniques.
- Worked closely with business, development, and technical support teams to share knowledge and to resolve quality issues.

IT EXPERIENCE

- Working with WIPRO Technologies from March 2022 to Till date.

ACHIEVEMENTS

- Member of a NCC body.

SOFTWARE SKILLS

- **Programming Language** : Core Java
- **Testing Concepts** : SDLC, STLC, Testing Levels, Testing Types, Test Management
- **Test Automation Tools** : Selenium Web driver
- **Test Management Tools** : JIRA, Git, Q Test
- **Testing Approach** : WEB Automation
- **Tools Used** : Selenium Web driver, Cucumber(BDD), TestNG, PageObjectModel(POM).
- **Programming Language** : Core Java
- **Role** : Automation Tester

Project Description:

Project 1(Ancestry): -

Project-Verizon Wireless – Verizon Wireless is a communication technology company that develops and delivers wireless and wireline products and services – ecommerce application

Roles & Responsibilities:

- Responsible for writing automation scripts using selenium WebDriver, Java from the set of user stories defined.
- Develop and implement robust Selenium Page Object Model framework with Selenium WebDriver using Object Oriented Programming Java
- Able to write scenarios for any application as per the requirement.
- Maintenance of the Test scripts as per the requirement changes in the Monthly releases
- Reported the coverage status of tests performed on the daily/weekly basis.
- Used Allure reports to see the results in proper format.
- Executed Automated Test scenarios on CI/CD pipeline.
- Used JIRA as Defect management tool partnered with developers to resolve defects.

EDUCATIONAL QUALIFICATIONS

- Bachelor of Technology from QIS college of engineering and Technology in 2020.

DECLARATION

I (**Malasani Manohar Babu**) hereby declare that all the details furnished above are true to the best of my knowledge and belief.
