PROFESSIONAL SUMMARY

Azure SRE/DevOps Engineer with over 2+ years of experience specializing in Azure Cloud Native solutions, infrastructure automation, CI/CD pipelines, and application reliability.

WORK EXPERIENCE

Wipro Technologies | 2022 - Present

Title: WILP- Work Integrated Learning Program

Role: Azure SRE/DevOps Engineer

Account: LBG(Lloyds Banking Group)

- Automated cloud infrastructure deployments using Terraform and Jenkin pipelines.
- Developed and Designed Azure DevOps CI/CD pipelines for Build and test code continuously.
- Provide technical support for Azure cloud infrastructure, troubleshooting issues related to deployments , application performance , pipeline failures and AKS issues.
- Collaborated with cross-functional teams to troubleshoot and resolve high-priority production incidents, maintaining 99.9% system uptime.
- Configured and integrated ACR for managing and storing container images, ensuring seamless deployment to Kubernetes.
- Designed, deployed, and maintained Azure Kubernetes Service clusters to run production workloads, enabling scalability and high availability.
- Investigated and fixed Kubernetes-related issues such as pod failures, resource limitations, and networking errors, ensuring stable application performance.
- Monitor system performance using Grafana and Azure Monitor, proactively identifying and resolving issues to maintain high availability.
- Created and optimized Bash scripts and Pipelines for automate repetitive tasks.
- Troubleshooted chef-client issues in Azure VMs and experience in chef cookbooks and recipes management
- Strong experience in Redhat Linux OS & Lead a team in the creation and management of new Red Hat Satellite servers, overseeing the deployment, configuration, and maintenance of server environments.

TECHNICAL SKILLS

- **Cloud Platforms:** Azure cloud
- **Containerization & Orchestration:** Docker , Kubernetes.
- **Infrastructure as Code (IaC):** Terraform, Azure Blueprints, ARM Templates
- **CI/CD Tools:** Azure DevOps, Jenkins, ArgoCD
- **Monitoring & Observability:** Grafana, Azure Monitor
- **Version Control:** Git , Github
- **Scripting:** Bash
- **Others:** Helm, JSON
- **Operating system:** Linux , windows
- **RedHat satellite management**
- **Configuration Management:** Chef

CERTIFICATION

- **AZ-104:** Microsoft Azure Administrator
- **AZ-900:** Microsoft Azure Fundamentals

ACADEMIC HISTORY

Mangalore University | 2019 - 2022

Bachelor of Science

Percentage -76%

PROJECTS

CI/CD Pipelines for Java Spring Boot Application:

Developed a CI/CD pipeline utilizing Jenkins , Docker , Maven and SonarQube for continuous integration and static code analysis. Deployed the application using Minikube for Kubernetes and ArgoCD for continuous deployment.

Automation and Scripting Projects

- Developed a Bash script for upgrading RHEL VMs from RHEL 7.9 to RHEL 8.8 using the Leapp method, significantly reducing the manual effort required by the team.
- Created an Azure DevOps pipeline to automate the deletion of offline agents in the DevOps portal, eliminating manual intervention and improving team efficiency.
- Built a Jenkins pipeline for automating the Repo share task (uploading files to repository servers), streamlining operations and reducing the time spent by operations teams on repetitive tasks for value streams.
