Contact: +91-8919439506 | **Email:** maradasaikrishna4@gmail.com

Summary:

Experienced Data Engineer with over 3 plus years of hands-on experience in developing data solutions in cloud environments. Proven expertise in designing and implementing scalable data architectures using Snowflake. Expertise in end-to-end data migration and planning. Skilled in leveraging Snowsight for advanced query development and managing Snowpipe for continuous data ingestion. Adept at optimizing performance, ensuring data integrity and integrating Snowflake with diverse data sources. Proficient in leveraging DBT an ELT tool for robust data transformation workflows, build and maintain well-documented data models, ensuring high levels of data accuracy and availability. Skilled in orchestrating complex data pipelines with Apache Airflow ensuring seamless integration and automation of ETL processes. Experience with version control systems like Git. Committed to continuous learning and leveraging technical expertise to drive business growth through insightful data analysis.

Key Skills:

- Expert in data warehousing, performance tuning and data management.
- Proficient in SQL, Python and data warehousing technologies like snowflake.
- Good understanding in Snowflake architecture, including data modeling, stored procedures, tasks, Snowpipe and streams.
- Experienced in setting up and managing continuous data ingestion pipelines.
- Knowledge on advanced concepts like time travel, Zero copy cloning and Data sharing.
- Proficient in DBT for data modeling, transformation and analytics.
- Skilled in Apache Airflow for orchestrating and automating ETL workflows.
- Experience with version control systems like Git.
- Basic understanding of AWS services and integration with Snowflake.
- Good Communication capabilities and Analytical skills.

Professional Work Experience:

Cognizant Technology Solutions, Hyderabad | Data Engineer

September 2021 – Present

Domain: Life Science

Project Experience: October 2021 to Present

- Worked on Snowflake models using stored procedures to automate complex data transformation using tasks to schedule and manage recurring data operations, ensuring timely execution. Utilized Snowflake Streams to track changes in source tables.
- Configured and managed Snowpipe for automated, continuous data ingestion from diverse sources into Snowflake. Assisted in integrating Snowflake with third-party tools and platforms to enhance data accessibility and usability.
- Good experience in working on snowflake key concepts like time travel, Zero copy cloning, Data sharing, virtual warehouse sizing and streams.
- Worked on developing and building DBT models to support complex data transformations and enrich data within Snowflake, enabling more effective business intelligence and reporting.

- Worked on end-to-end implementation for projects like migrating data from SAP HANA, SAP ECC and other source systems data to snowflake which will be used by BI for reporting.
- Conducted thorough testing and validation of DBT models to ensure robustness and mitigate issues before deployment.
- Worked on enhancements to DBT workflows, including adjustments to model configurations and incremental processing strategies, resulting in reduced latency and faster data turnaround.
- Worked on resolving bugs in Snowflake models, leading to improved data accuracy and reliability.
- Configured and maintained Apache Airflow to orchestrate ETL workflows, automate data processing, and monitor pipeline performance.
- Utilized version control systems and CI/CD pipelines to manage and deploy changes to DBT models in a structured and controlled manner
- Identified scenarios on data quality checks that need to be coded in ELT tools for better performance of the system & quality of the data.
- Collaborated with cross-functional teams to understand data requirements, ensuring accurate transformation and integration.
- Implemented best practices for data governance, ensuring data integrity and compliance with organizational standards.
- Coordination with geographically distributed teams for a successful development, testing & deployment of critical projects/programs, system enhancements/fixes.

ACADEMIC CREDENTIALS:

- Bachelor of Technology in Electronics and Communication Engineering with 8.01 CGPA | GMR Institute of Technology, Rajam | 2017 – 2021
