EXPERIENCE

UIPATH RPA DEVELOPER

IT ANALYST

TATA CONSULTANCY SERVICES, INDIA

2021 MAY – PRESENT

Technologies: UiPath Robotic Process Automation

Domain: Banking and Finance sector

- Led the development of an end-to-end RPA solution to automate tax calculation and reporting processes.
- Tax-related Automation involved applying 100+ Dynamic Rules on multiple excel Tax data.
- Tax automation also handled the manual task of Invoice Procurement from an external application.
- Incorporated logging and audit trail functionalities to track every step of the automation, providing transparency and compliance with auditing standards.
- The automation reduced the time required for tax data processing by 77% and significantly lowered the risk of human errors, which were a common issue with manual data handling.
- Utilized UiPath features of Solution Management, API triggers, PIP Mode in Projects.
- Developing and researching on Document Understanding, Coded workflows and Integration services.
- Addressed complex issues in automation workflows, applying advanced debugging and error-handling techniques to resolve production bottlenecks and ensure minimal downtime.
- Worked as Project Lead managing a team of 6 developing end to end Insurance Automation Process from scratch.
- Implemented Insurance Automation using RE framework with Dispatcher and Performer Bots.
- Insurance Automation wiped out Human intervention and reduced manual work 100%.
- Worked with binary excel file(.xlsb) data extraction and implementation.
- Used Trigger Based Automation Framework for an attended Robot implementation.
- Identified use-cases in projects for automation scope and successfully implemented prototypes.
- Conducted UAT (User Acceptance Testing) and collaborated with business teams to gather and analyze requirements.
- Conducted post-deployment analysis and performance reviews of automation solutions, identifying opportunities to optimize workflow performance by 30%.
- Automation implemented for a Mainframe application.
- Bot execution Reporting is made user friendly by tracking down the summary of Execution as an excel report in a shared location or directly over mail.

2019 APR – 2021 JAN

Technologies: UiPath Robotic Process Automation

Domain: Banking and Finance sector

- Designed the UiPath workflow for automation associated with Trade Processing application.
- Implemented UiPath workflow for multiple products involved in Trade application for 64 unique scenarios
- Implemented multiple use-cases using UiPath RE Framework for Unattended and Attended Bots.
- Explored areas of Excel, Pdf, Desktop, Web Automation, Control statements, Exception Handling
- Orchestrator Queues have been incorporated in developed workflows.
- Troubleshooted ample issues faced during automation and documented for future use.
- Explored various areas in UiPath for solutioning and performed R&D for same.
- Transformed workflows to work in new feature PiP(Picture in Picture) mode in UiPath.
- Development enhancement done for mainframe application bot related to insurance processing.
- 100% Error and Warning Free Roboyo Report for automations ensuring high standardized coding.

2016 FEB – 2019 MAR

Technologies: Java

Domain: Cloud Microservices and Apification , Banking & Finance Sector (BFS)

- Led the RESTful API design from scratch; Application development in Java, Spring Boot framework
- Hands on experience in Robotic Process Automation Tool UiPath
- Working on UiPath Advanced RPA learner certification (UiARD)
- Created design artifacts and architected features using class and code execution flow diagrams
- Proficient in data modelling for PostgreSQL and NoSQL MongoDB
- Hands on experience in testing RESTful and API testing using POSTMAN
- Implemented Java 8 features in code design and development
- Delivered capabilities using agile practices meeting all risk and security requirements
- Actively and consistently mentored team members
- Batch program written using Spring Batch
- Developed the objects and workflows as per client requirement
- Implemented end to end process related to data manipulation and mailing service
- Worked as a developer to create backend Microservices using Spring boot Framework
- Developed RESTful API from Scratch and used Predix Time Series API for data
- Expert in Agile/ Scrum methodology; Developed detailed stories for the development team
- Spearheaded the enhancement of Python Application

EDUCATION

Qualification	Percentage/ Grade
Class X	95 %
Class XII Computer Science	97 %
B. Tech Electrical & Electronics Engineering	7.98/10

SKILLS

- Robotic Process Automation tools: UiPath, NICE
- Languages: Java, C++, VB.NET
- Frameworks: Spring Boot, Spring MVC
- IDE: Eclipse, STS
- Presentation skill proficient.
- Database Systems: MySQL, PostgreSQL, MongoDB
- Configuration Management: Git, SVN
- Build tools: Maven
- Project Management Tool: Azure Devops Board, Jira
- Agile & Scrum Methodologies

TRAININGS & CERTIFICATIONS

- UiPath Advanced Developer Professional (ADPv1) Certified from UiPath Academy (Dec 2024)
- UiPath AI and Latest Advancements Trained.
- NICE RPA Hands on Trained
- Gen AI Trainings.
- Agile Internal certified

PERSONAL DETAILS

- **Date of Birth:** 1st March 1993
- **Nationality:** Indian
- **Marital Status:** Married
- **Languages Known:** English, Malayalam
- **Hobbies:** Travelling, DIY crafts, Writing
