

SUMMARY

Experienced Data Scientist with 5+ years in developing machine learning models, performing predictive analytics, and solving complex data challenges. Proficient in **Python**, statistical analysis, and EDA with hands-on expertise in building anomaly detection, demand forecasting, and LSTM models. Adept at working with time-series data and driving innovation using **AI/ML**.

SKILLS

- Machine Learning & AI Models:**
LSTM, SARIMA, Auto Encoders, LLM
- Generative AI:**
Prompt Engineering
- LLM Utilization:**
OpenAI, LangChain
- Data Analysis & Visualization:**
EDA, Plotly, Power BI
- Programming & Tools:**
Python, SQL, Snowflake, Apache Airflow
- Cloud Platforms:**
AWS, GCP
- Domain Expertise:**
Predictive Analytics, Time Series Analysis

CERTIFICATIONS

- Executive Secretary and Business Administration Certification
- Advanced Executive Assistant and Office Manager Diploma
- Executive Office Professional Certificate Program

EDUCATION

Master of Science in Information Technology (MSIT)

International Institute of Information Technology
2016 – 2018

Bachelor of Technology in Computer Science Engineering

Gokaraju Rangaraju Institute of Engineering and Technology
2012 – 2016

PROFESSIONAL EXPERIENCE

Sr. Data Scientist

AquilaTest | Dec 2023 – Present

- Designed and implemented a **Generative AI**-powered help assistant, streamlining user support by improving interaction quality and reducing resolution time.
- Conducted **predictive analytics** to calculate risk scores using statistical methods on pass/fail test data, aiding in better decision-making for quality assurance processes.
- Supported the XPath Tracker project by validating **automation workflows**, ensuring robust and error-free performance in automated test script execution.
- Utilized **Python** and **AWS** to build scalable solutions for integrating Generative AI functionalities into existing workflows.

ETL Data Engineer

Micron Technologies | May 2022 – Dec 2023

- Designed and maintained **ETL** pipelines using **Snowflake, SSIS, and SAP HANA**, enabling seamless data integration and processing for inventory analytics.
- Conducted **statistical analysis** on product demand and supply data from the Bill of Materials (BOM), helping optimize inventory levels.
- Implemented automated workflows to synchronize data across inventory management systems, reducing manual errors by 40%.

Data Scientist

Prudent Technologies and Consulting, Inc. | Nov 2020 – Apr 2022

- Developed anomaly detection models using **LSTM** and **Auto Encoders**, ensuring timely identification of irregularities in business operations.
- Implemented **SARIMA** models for time-series forecasting, improving demand prediction accuracy by 25%.
- Automated the machine learning pipeline with **AIML Studio**, reducing processing time by 30% and ensuring scalability for growing data volumes.
- Conducted **Exploratory Data Analysis (EDA)** with the **Plotly** library to uncover insights in time-series data, enabling data-driven decision-making.
- Collaborated with cross-functional teams to **deploy ML models** into production, achieving smooth integration with existing systems.

Data Science Intern

Innodatatics | Jan 2020 – Aug 2020

- Applied the **Apriori** algorithm for Market Basket Analysis in the agro industry, identifying associations between products and recommending bundle strategies.
- Deployed machine learning models using **Python Flask**, enabling scalable solutions for clients.
- Created insightful dashboards with **Microsoft Power BI**, showcasing trends and behaviors in customer data.
- Assisted in pre-processing and feature engineering, ensuring clean and reliable datasets for analysis.

Software Engineer

Payswiff Solutions | Jan 2018 – Dec 2019

- Developed responsive web designs using **HTML5, CSS3, and Bootstrap**, enhancing the application's compatibility across devices.
