SUMMARY

Software Developer with 2+ years of experience in both front-end and back-end technologies. Expertise in Java, Spring Framework, ReactJS, Redux, JavaScript, and NodeJS. Skilled in enhancing code quality, optimizing micro-services, and solving complex problems through strategic and effective solutions.

WORK EXPERIENCE

Tata Consultancy Services

Jul 2022 - Present

Software Development Engineer I

Bengaluru, India

- Developed a RESTful API using Spring Boot, implementing user management features and database integration. Utilized Java, Spring Data JPA, and REST principles to enhance application functionality and maintainability.
- Engineered interactive and high-performance micro-services using Java and Spring Boot, boosting system scalability and efficiency. Introduced centralized exception management in Spring Boot, improving error detection and minimizing application downtime.
- Led the migration of a large-scale React.js project from JavaScript to TypeScript by accessing files, creating tech task tickets, assigning tasks to devs, and actively collaborating leading to usage of 6000 users.
- Implemented HOCs for shared logic between retail and business app versions, reducing code duplication by 40% and standardising functionalities, enhancing code quality with reusable frameworks.
- Redesigned and developed the UI layout by optimising HTML5, CSS3, and REST APIs, improving load times by collaborating with cross-functional teams to design and build features.
- Resolved a critical production bug related to redundant end interaction events and Redux store clearance. Implemented a pre-API call check, reducing failure rates, and introduced toast notifications to enhance the user experience.

SKILLS

- Java, React.js, JavaScript, CSS3, TypeScript, NodeJs, Vitejs, ES6+, HTML5, MVC, Jest, Junit, Material-UI, RESTful API, SOAP, SDLC, Webpack, Jenkins, TDD, GCP, Microservices, CI/CD, DevSecOps, MongoDB, SQL, Next.js, Redux, jQuery, Angular, NestJS, Agile(Scrum, Kanban), JWT, Algorithms, Data Structures, Version control (Git)

PROJECTS

ThreadPulse

- Utilized Firebase Authentication for seamless user sign-in and management, ensuring secure access and user identity verification.
- Enabled users to format text (bold, italic, underline, hyperlinks), attach image files, and tag people, significantly enhancing comment interactivity and content presentation using material-ui.
- Implemented functionality to sort comments by latest and popularity, and included pagination controls to manage and display comments efficiently, improving user experience.
- Integrated real-time updates for comments, allowing users to see new comments and changes instantly without refreshing the page, further enhancing engagement and interactivity.

Open Source - FreeCodeCamp

- Leveraged concatMap in RxJS for batched data updates, minimizing HTTP network requests and server load for improved application performance reduces the number of round trips between the client and server by 50%.
- Implemented robust error handling within the processUpdate function to manage failures, ensuring the application's stability and reliability.
- Added a new function isSubmittable for filtering submittable failures based on challenge type and solution presence.
- Implemented detailed hint messages for common syntax errors, specifically addressing incorrect use of quotes versus backticks in template literals, which improved user guidance and reduced confusion

EDUCATION

Bannari Amman Institute of Technology

May 2022

B. E Computer Science and Engineering - 8.7

Erode, India

Course Work : Data Structures, Database Management, Software Engineering/Security, Object Oriented Programming

CERTIFICATIONS

- **Cutshort Certified React.js - Advanced:** React Hooks, Redux, React Router
- **Google Cloud Fundamentals Qwiklabs:** Google Cloud Infrastructure: Core Services, Load Balancing on Compute Engine
- **HackerRank Software Engineer Role:** Problem Solving, SQL, REST API
