Objective

Skilled Application Support Engineer with a focus on advanced SQL, data extraction, and performance optimization. Experienced in developing and troubleshooting complex database queries, stored procedures, and views to support business-critical applications. Proven ability to enhance data flow efficiency and resolve application issues swiftly. Seeking to leverage expertise in SQL, API integration, and root cause analysis to drive data reliability and operational effectiveness in a dynamic technical environment.

Experience

Application Support Engineer (Universal Sompo General Insurance Company)

Vieva Intech – Mumbai, Maharashtra

15 November 2022 – 14 October 2024

- 1) Delivered **L2 support** for the **MOTOVYES system**, troubleshooting complex application issues and achieving **95% resolution within SLA**.
 - 2) Utilized **advanced SQL** (complex queries, stored procedures, views, and indexing) to optimize **data extraction** and **performance tuning** for application support.
 - 3) Conducted **API testing** using **Postman and SOAP**, ensuring seamless service integrations and enhancing system functionality.
 - 4) Performed **root cause analysis** of application issues, optimizing **SQL queries** and **SSIS packages** to improve **database performance** and **system stability**.
 - 5) Developed **SQL-based reports** and **data analysis** to support business decisions, contributing to improved **operational efficiency** and process optimization.
 - 6) **Technical Skills:** dot net (C#), Advanced SQL (Stored Procedures, Views, Indexing, Query Optimization, Execution Plans), SQL Server Management Studio (SSMS), API Testing (Postman, SOAP UI), IIS, System Monitoring, Technical Documentation, Incident Management.
-

Education

- 1) **Master of Science (Computer Science)**
Kirti M Dongurasee (Mumbai University) – Mumbai, India
CGPA: 8.4
June 2021 – July 2023
 - 2) **Bachelor of Science (Computer Science)**
Kirti M Dongurasee (Mumbai University) – Mumbai, India
CGPA: 8.03
June 2018 – July 2021
-

Projects

1) Deployment of Web application on AWS(Amazon Web Services) January 2024

- **Objective:** create and deployed an Online Bakery Shop System (Web application) using AWS EC2 and S3 storage for enhanced scalability and flexibility.
- **Technologies:** PHP, JavaScript, SQL, HTML, CSS, AWS (S3, EC2, Lambda)
- Configured AWS EC2 instance, assigned Elastic IP, and established security groups to support a secure, scalable environment.
- Integrated monitoring and logging with CloudWatch, implemented auto-scaling, and configured SSL/TLS encryption for enhanced security.

- Addressed deployment challenges by optimizing security group configurations and resolving performance bottlenecks
-

Technical Skills

1. **Programming Languages:** Java, Python, Dot net (C#)
 2. **Web Technologies:** HTML, CSS, XPath, JavaScript
 3. **Version Control:** Git
 4. **Networking Protocols:** TCP, UDP
 5. **Test Automation Tools:** Selenium (Java), SoapUI, Postman, Robot Framework, Selenium WebDriver
 6. **Programming/Scripting:** Python, Shell Scripting
 7. **Database Technologies:** SQL, MySQL, PL-sql
 8. **Operating Systems:** Linux, Windows
 9. **Cloud Technologies:** Amazon Web Services (AWS (S3, EC2, Lambda))
 10. **Others:** Troubleshooting, Root Cause Analysis, Documentation, Reporting, SQL Server Management Studio (SSMS)
