SUMMARY

Experienced software developer with 7.5+ years in PHP, Node.js, TypeScript, Python, Golang, and more. Since November 2018, I have advanced to a lead role, showcasing strong technical skills and a deep understanding of software development life cycles. Adept at collaborating with cross-functional teams, I drive projects from concept to completion. I am now seeking a similar role to leverage my technical expertise and leadership abilities to guide teams, optimize processes, and deliver high-quality software solutions aligned with business goals.

EXPERIENCE

Lead Software Engineer

06/2021 - Present

Prosperix ↗

- Set the foundation of building micro service and converting monolithic app to micro-service.
- Guided the team to build more than 15+ micro service to add security and fasten the performance of the application 20x.
- Designed and Developed API Gateway, Auth Service Spend Management, timelines and Distribution service.
- Mentored team of 10+ junior to mid level devs and consulting 5+ senior devs on solution design
- Worked with Node.Js, Typescript, Fastify, Python, Fast API, AWS, Kubernettes, Dockers etc.
