

Milan Soni

Data Analyst

sonimilan10@gmail.com | +91-9999865838

CAREER SUMMARY

Results-driven Data Analyst with over 5.5 years of experience in implementing real-time data monitoring systems that reduced operational errors by 50% and improved efficiency by 30%, translating into cost savings of approximately \$300,000 annually. Proficient in transforming complex datasets into actionable insights through predictive modelling, data mining techniques and data visualization. Hands on experience in SQL, Python, Google Big Query, Power BI, Data Warehouse, Excel/Google Sheets, Dimensional Modelling.

PROFESSIONAL EXPERIENCE

Cognizant Technologies

Apr, 2017 – Present

Project: Sales Performance Optimization

- Collected and integrated sales data from multiple sources, including CRM systems and transaction records. Utilized SQL to query and aggregate data and Python for advanced statistical analysis and predictive modelling.
- Developed a segmentation using python which led to a targeted marketing campaign that increased customer acquisition by 25%, generating an additional \$250,000 in revenue.
- Designed and implemented interactive dashboards in Power BI to visualize key sales metrics and performance indicators. This initiative enhanced reporting efficiency by 40%, reducing the time required for data analysis and reporting by approximately 20hours per month.
- Conducted a thorough analysis of historical sales data, identifying key trends and patterns. Discovered that sales performance varied significantly by region, product line and customer segment.

Project: Revenue Insights and Strategies

- Analyzed historical revenue data, revealing a 20% variation in different regions and product lines. Identified high-performing segments that contributed 60% of total revenue.
- Developed predictive revenue models that accurately forecasted a 10% revenue increase for the upcoming quarter. This projection translated into an expected additional \$100,000 in revenue.
- Created dynamic dashboards which providing real-time insights into revenue performance and key metrics. This boosted reporting efficiency by 35%.
- Implemented pricing optimization strategies based on market demand and competitive analysis. These adjustments managed to a 12% increase in average revenue per transaction.

Project: Product Usage Analysis

- Collected and analyzed product usage data from user interaction logs, surveys and feedback forms. Utilized SQL for data extraction and Python for advanced data analysis and visualization.
- Analyzed user engagement metrics to identify key usage patterns and feature adoption rates. Discovered that 40% of users engaged with only 30% of the product's features, indicating areas for improvement.
- Based on the analysis, recommended enhancements to underutilized features and introduced new functionalities aligned with user needs that directed to a 25% increase in feature adoption.
- Enhanced product features and refined user experience guided to a 20% increase in premium subscriptions. This resulted in an additional \$200,000 in annual revenue.
- Developed interactive dashboards and reports to present findings and track key metrics.

EDUCATION

Hindu College of Engineering, Sonipat, India

2012 - 2016

Bachelor of Technology in Electrical Engineering (GPA 6.72/10)

Courses: Computer Programming (Java), Engineering Mathematics and Databases.

ACHIEVEMENTS

- Awarded "Top Performer" for developing a churn prediction model that reduced customer churn.
- Received Reaper award for mentoring junior analysts, improving team performance and productivity by 15%.

ADDITIONAL INFORMATION

- Languages** - English (Bilingual), Hindi (Native).
- Interests** – Cricket, Chess, Listening Songs and Reading.
