Address: Hinjewadi phase 1, Pune

Profile Summary:

Results-driven IT professional with 5+ years of specialized experience as a Data Engineer for Snowflake and Teradata Technology. Expertise in client requirement gathering, solution design, and resolving system failures to ensure seamless operations and client satisfaction. Adept at developing and optimizing data pipelines, with a focus on delivering high-quality, scalable solutions. Strong analytical and problem-solving abilities, coupled with excellent communication skills. Committed to driving innovation, enhancing data-driven strategies, and achieving project excellence in a collaborative team environment.

Experience:

TECHNICAL OPERATIONS ANALYST | INFOSYS LTD, PUNE | NOVEMBER 2019 – PRESENT

1. **Project:** Starhub

Environment: Snowflake web interface

Ticket tool: ServiceNow

Skills: Snow SQL, Snowflake, DBT

Role: Data Engineer

Responsibilities:

- Designed and implemented Snowflake-based data warehousing solutions, leveraging DBT (Data Build Tool) to streamline data transformations and optimize data models and Snow SQL queries..
- Managed Snowflake objects (Tables, Views, Functions, Pipelines) and data ingestion from AWS S3 and Azure Blob Storage using COPY command, Snow Pipe, and ETL processes.
- Troubleshoot errors during data landing in Snowflake stages; utilized features like Time Travel, Zero-Copy Cloning, and data sharing for error resolution.
- Implemented data sampling, real-time processing with Streams, automated tasks, and ensured data security through masking and anonymization techniques.
- Sized Snowflake warehouses for efficient workload management, built scalable data pipelines, and collaborated across teams to enhance proficiency in Snowflake.

2. **Project:** United Airlines

Environment: Teradata SQL Assistance, UNIX Putty

Ticket tool: Jira

Skills: Teradata SQL, Teradata Utilities, Unix

Role: Data Engineer

Responsibilities:

- Managed data warehouse maintenance, performance tuning, and ETL process optimization for Teradata systems.
- Proficient in Teradata SQL for querying, data manipulation, and enhancing data warehousing processes.
- Developed and maintained ETL processes using Teradata utilities such as Fast-Load, Fast-Export, and BTEQ.

- Executed data migration processes to integrate multiple data sources into the Teradata data warehouse.
- Troubleshoot and resolved Teradata load failures, ensuring efficient data loading and minimizing disruptions.

Education:

Bachelor of Computer Applications (B.C.A)

PD Pandya Institute of Computer Applications

Gujarat University, Ahmedabad

Passing Year: 2019

Soft Skills:

Analytical | Communication | Learner

Technical Skills:

Programming Languages:

SQL(RDBMS), Snow SQL, Teradata SQL, PLSQL Python, Unix

Frameworks:

Snowflake Web Interface, PostgreSQL, Teradata SQL Assistant, MS SQL Server, PL/SQL Developer,

Core Competencies:

- | | | |
|--------------------------|---------------------------------|----------------------------------|
| ❖ Cloud Data Warehousing | ❖ Database Design & data Models | ❖ Data Management |
| ❖ ETL Development | ❖ SQL Query Optimization | ❖ Data Integration and Migration |
| ❖ Performance Tuning | ❖ Data Security and Compliance | ❖ Collaboration and Teamwork |

Course:

Name	Source	Completion Year
Snowflake- The Complete Master Class	Udemy	January 2024
Master SQL For Data Science	Udemy	December 2023
