 [Anas Kazi](#)

Summary

- **Motivated** and **results-oriented** Computer Science and Engineering student with a focus on **Artificial Intelligence** and **Machine Learning**.

Proficient in **Python**, **TensorFlow**, **PyTorch**, and building cutting-edge **Generative AI** applications.

Adept at crafting **innovative AI solutions** to enhance **accessibility** and empower **independence**.

Driven to apply **technical expertise** and **strategic problem-solving** to deliver **impactful, real-world projects**.

Experience

Smytten, Octavos Enterprise Solutions

Inventory Management and Planning Intern

<https://smytten.com/>

- **Reduced errors** by 10% through **revised MRPs** and improved **product quality control**.
- **Optimized inventory processes** to enhance operational **efficiency** and **accuracy**.
- Collaborated with team members to **streamline workflows** and **implement best practices**.

Open Source Community

Club Secretary

<https://oscvitap.org/>

- Increased **member engagement** by 25% through effective **communication** and **event coordination**.
- **Streamlined operations** and enhanced **organizational efficiency** by 20%.
- Fostered a positive and collaborative environment, leading to higher **member retention** and **satisfaction**.

Sep 2023 - Nov 2023

Ahmedabad, Gujarat, India

May 2023 - May 2024

Amaravati, Andhra Pradesh, India

Education

Vellore Institute of Technology, AP

Computer Science and Engineering (Spec. in AI & ML)

CGPA: 8.52

- **Hosted 2 consecutive successful TEDx events** at the university, demonstrating strong **leadership** and **organizational skills**.
- Achieved **2nd place** in the **National Level Hash Breaker Challenge**, showcasing **problem-solving abilities** and **technical expertise**.

Aug 2021 - Present

Bachelor of Technology(B.Tech)

Certifications

Google Cloud Computing Foundation

Google

Projects	GUIDE - Guidance for Ultimate Interview Drills and Exercises	August 2024 - Present
	GUIDE - Developing an AI-powered Interview Preparation Chatbot that accepts resumes and tailors questions to specific job roles. - Creating a user-friendly frontend and incorporating a voice chat option for realistic interview simulations. - Utilizing an open-source LLM to deliver dynamic, personalized interview experiences.	
	CyberGuard	August 2024 - November 2024
	CyberGuard - Developed a browser extension to detect and flag instances of cyberbullying in real-time on social media platforms. - Implemented a Bi-directional LSTM (BLSTM) architecture for enhanced text analysis. Curated a dataset from Reddit, Kaggle and other sources and handled model training and fine-tuning to improve detection accuracy. - Aimed to foster a safer online space by proactively identifying and alerting users to harmful content.	
	Website ChatBot	July 2024 - July 2024
	ChatBot Developed a chatbot for a wine-making company's website as part of an internship assignment, enabling users to easily access company information and book appointments without navigating through the website. - Utilized Google's Vertex Agent Builder to fine-tune AI models on provided data, enhancing user experience and streamlining customer interactions.	
	NLP Bot	Feb 2024 - March 2024
	Test Bot - Developed a nano-GPT based NLP bot trained on a Physics textbook. - Utilized the PyTorch framework for robust development and seamless integration.
