Skills

RPA (UiPath Power Automate and AA)

C# Python VB.NET Macros PowerShell

Microsoft SQL Server API Integration GIT OCR

Data Manipulation Agile Methodology JIRA

ServiceNow QA Testing Attention to Detail

Communication Multi-Tasking Team Collaboration

Projects

Statement of Account Letter generation Bot (UiPath):

- Created a bot to generate Statement of Account Letters, send the letters via email/mail, upload document to Global Search (ECM) and initiate the completion workflow in Spectrum (Data Management Platform)
- Business Purpose: Utilizing a bot to generate the Statement of Account Letter, will streamline the process and allow agents to focus on other tasks
- Developed the bot in UiPath ReFramework and used activities including SQL Activities, SMTP, UI actions, Excel activities and data manipulations

Sevicing QC Bot (UiPath, OCR):

- Created QC bots to assist the Quality Control team to audit the Cure & Deficiency Notice letters and compare the scanned letters to the values in spectrum (Data Management Platform)
- Business Purpose: Audit 100% of the letters (45,000-50,000 letters per month). Monthly time savings approx. 7,900 hours.
- Developed the bot in UiPath ReFramework and used UiPath Document OCR as well as Tesseract OCR Engine.

Early Payoff letters to Dealers Bot (Power Automate):

- Developed a bot to generate Early payoff letters and sending the letters to specific dealers monthly.
- Business Purpose: Generate letters as per different states in US and send it as a notification to the dealers.
- Developed using Power Automate Desktop, used different UI activities, PowerFX, and JSON.
