

PROFESSIONAL SUMMARY

Dynamic graduate with a solid foundation in Infrastructure Management Services. Proficient in IT infrastructure, cloud computing, and systems optimization. Skilled in enhancing IT environments for improved performance and reliability. Committed to continuous learning and applying innovative solutions to meet technological challenges.

EDUCATION

BACHELOR OF COMPUTER SCIENCE
Nethaji Memorial Arts and Science
College 2020-23
Calicut University

TECHNICAL SKILLS

- Good knowledge in OSI model, TCP/IP protocol suite (IP, ARP, ICMP, TCP, UDP, DHCP, DNS, ACL).
- Extensive knowledge in cloud VPC, EC2, RDS, Auto Scaling, ELB.
- Good understanding in routing protocols EIGRP, RIP V1/V2, OSPF and BGP.
- Familiar with NAT, PAT, VLANs and STP.
- Skilled in system management, user/group administration, and troubleshooting.
- Proficient in DNS, Squid Proxy, Postfix, and secure file transfers.

SOFT SKILLS

- Problem Solving.
- Time Management.

CERTIFICATIONS

- PYTHON & DJANGO
AVODA Institution of Education
- REDHAT ADMINISTRATION
REDHAT Training & Certification
- INFRASTRUCTURE MANAGEMENT SERVICE
KGISL Micro College
- NETWORK ADMINISTRATOR
CCNA (Cisco Certified Network Associate)
- AWS SOLUTIONS ARCHITECT- ASSOCIATE
AWS academy cloud

PROJECTS

IMS TRAINEE INTREN - KGISL - MAY 2024 / TILL

NETWORK CONFIGURATION

- Configuration and Maintenance of a Small Scale.
- Network Infrastructure using CISCO Router and Switch.
- Implemented VLANs and Ensured Network Security using CCNA Concepts.

LINUX SERVER

- Setup Managed LINUX Server, Performed System Administration Task and Ensured High Availability.
- Installed, Configured and Maintained various Services on the LINUX Server.

AUTOMATED EMAIL ALERTS FOR RAM USAGE

- Involves creating a Bash Script to Monitor RAM Usage on a System and Send Automated Email Alerts.
- when Usage Exceeds a Specified Threshold. It is scheduled to run at regular intervals using Cron Jobs, ensuring to provide Timely Notifications to the User.

AWS CLOUD INFRASTRUCTURE DESIGN AND IMPLEMENTATION

- Designed a multi-tier AWS architecture with VPC, subnets, NAT Gateway, and Load Balancer for high availability.
- Deployed EC2 instances, RDS, and auto-scaling for resource optimization.
- Configured a jump server for secure access to private subnets with MariaDB for database management.

AWS RDS AND MySQL INTEGRATION ON WINDOWS

- Configured AWS RDS with MySQL on Windows to streamline database management and enhance efficiency.
- Optimized deployment and connectivity for AWS scalability.
