OBJECTIVE

Proactive RPA professional with 2.5+ years of hands-on experience in automating business processes seek to leverage expertise in developing and implementing robotic process automation solutions to drive efficiency, streamline operations and contribute to organizational success

SKILLS

- Programming: VB.net, C#, HTML
- Tools: UiPath, GitHub, postman, Draw.io
- Database: SQL server
- Office Tools: Word, Excel, PowerPoint
- Methodology: Agile
- Other Skills: RE Framework, Documentation, Problem-Solving, Collaboration

CERTIFICATION

- RPA UiPath Developer Foundation
- RPA UiPath Developer Advanced

EDUCATION

B.E. - Mechanical Engineering

Sri Sairam Engineering college, Chennai.

Year of passing: 2021

CGPA: 7.8

EXPERIENCE

TATA CONSULTANCY SERVICES 01/2022 - PRESENT

RPA Developer-Airline Domain: 06/2024 - Present

Automated pricing updates in a third-party application using AI recommendations, integrating Excel, web, and API automation. Implemented Outlook automation for notifications, streamlining pricing analysis and updates for managers.

Junior RPA Developer-Telecommunication Domain: 04/2022 - 05/2024

Automated Service Request ticket management using multiple scalable bots integrated with web pages, SQL databases, and Orchestrator. Developed custom SSIS reports, improves reporting efficiency by 20% and collaborated with cross-functional teams for seamless bot deployment.

Roles and Responsibilities:

- Analyze business processes to identify automation opportunities and assess feasibility.
- Design and develop end-to-end RPA workflows using tools like UiPath, ensuring scalability and maintainability.
- Authored PDDs and SDDs to streamline development, and used JIRA/ServiceNow for defect tracking, reducing resolution time by 30%.
- Integrate RPA solutions with APIs, databases, and third-party applications for seamless automation.
- Implement robust exception-handling mechanisms and optimize bot performance for reliability.
- Deploy, monitor, and maintain bots in production environments using Orchestrator.
- Collaborate with stakeholders to gather requirements, conduct testing, and ensure successful deployment.
