SUMMARY

A versatile, hardworking engineer with 13 years of experience driven to meet or exceed a company's expectations to deliver high-quality software products. An effective listener that can communicate technical information in an easily understandable way. Offers a strong background in creative problem-solving and a proven ability to multi-task and prioritize in fast-paced, stressful environments.

WORK EXPERIENCE

Software Engineer 3 at PayPal

Jun 2021 - Oct 2023

- Adaptive Payments (AP) migration from Legacy (C++) Payment stack to Millennium (Java)
- Knowledge Transfer of Legacy UI which is required for migrating to Node based application.
- Design for migrating mid-tier C++ service to Java as part of Killing Legacy.

Consultant at Atos Syntel – PayPal

Jun 2016 - Jun 2021

- Analysis & Resolution of Bugs reported in Express Checkout & Adaptive Payments.
- Triaging issues reported in products such as Billing & Subscription.
- AP Simple Implicit Payments migration from Legacy to Millennium.

Senior Software Engineer at Temenos

Jan 2014 - May 2016

- Knowledge on basics of Banking Software and its components.
- Analysis and Resolution of Client raised defects.
- Enhancement on basic Standing Order module.

Software Engineer at HCL Technologies

Jun 2010 - Dec 2013

- Created Requirements based on the Functional Specifications from Client.
- Layout Designing.
- Hardware Key Mapping.
- FT, UT, IT and ST cases creation and execution.
- Bug Fixing

PROJECTS

Adaptive Payments

- Adaptive Payments operations enable the sending and receiving of payments involving two or more parties.
- Each Adaptive Payments API transaction includes a sender, one or more receivers of the payment and the application owner, or API caller, who is an invisible third party that provides the transaction flow and makes the API calls.
- Adaptive Payments is one of the products in PayPal which used legacy (C++) core payment service and migration was required due to complex maintenance.
- Core contributor in design discussions, development and testing of Legacy to Millennium migration.
- Analysis and Resolution of Client raised defects.
- Developing an enhancement in any existing module as part of change request from the Client.

Triage Team

- Triaging customer issues reported in Express Checkout (EC), Adaptive Payments (AP), Billing, Subscriptions and other products.
- Resolved bugs reported in EC & AP products.
- Provided support to Integration team in resolving issues with current and future partners/merchants.

T24 Banking Framework

- Implemented enhancements as per Client requirement in STANDING ORDER and NOSTRO RECONCILIATION modules.
- Analysis and Resolution of Client raised defects.

PFCLite

- Handling of APIs exposed by OFCM module through OFCMAPI module.
- Analysis and resolution of defects found in OFCMAPI module.
- FT, UT, IT and ST cases creation and execution.
- Bug Fixing
- Basic Sanity Testing of OFCMAPI module.

Sagar3

- Implementation of a New feature – “FE Lock” in KC model
- Maintenance of TriggerTable
- Caution Module

Sagar2

- Implementation of a New feature (Exposure mode) – “Telezoom” in PSL & HHE2 model
- Setting Menu (Modification in Setting Menu – to add new option and its setting values)
- Caution (Display of Caution in certain cases)

Sagar

- Hardware Key Mapping - Mapping Key code from Client to Event codes, so that each key is mapped to its respective events.
- Trigger Table - Creation of Master Trigger Table to be handled by all views.
- Layout Design - Designing Master Layouts using the specification from the Client, so that these Layouts can be used for all views.
- Root view - Handling of Key Events that are to be handled by the Root View.

TECH SKILLS

Programming	: Java, C++, C, INFOBASIC, MATLAB
Databases	: SQL
Other Tools	: Git, Linux, Jenkins, Postman, Splunk

EDUCATION

Sri Venkateswara College of Engineering, Chennai
B.E in Electronics & Communication Engineering

Aug 2006 - May 2010
