

Muhammad Muzammil

AI Developer, AI Specialist and Prompt Engineer

Address Pusad, India, 445204

Phone +91 8411069422

E-mail:-muzammilpsd80@gmail.com

Innovative Artificial Intelligence Engineer with 7+ years of experience in application design, development, testing, and deployment. Highly experienced in writing codes and algorithms as well as building complex neural networks through various programming languages. Possess an unbridled passion for Artificial Intelligence with comprehensive knowledge of machine learning concepts and other related technologies. Unmatched abilities to identify, understand, and translate program requirements into sustainable, advanced technical solutions through C#, C++, JavaScript, Python, and other programs for continuous improvement of AI technologies. I've worked on fine-tuning models for Hindi language tasks, like translation and sentiment analysis. Skilled in prompt engineering to get better responses from AI models.

Work History

Feb 2024- Jan 2025

AI Developer, AI Specialist and Data Annotation

Caprileo Data Services Pvt Ltd - Bangalore, India,

- Developed and deployed machine learning models using Python, TensorFlow, and PyTorch, optimizing natural language processing (NLP) tasks such as sentiment analysis and text classification, improving accuracy by 20%.
- Specialized in natural language processing (NLP) for tasks like text summarization, machine translation, and named entity recognition (NER), delivering AI solutions with a 25% increase in model performance.
- Trained large language models (LLMs) by fine-tuning pre-trained models on domain-specific datasets, enhancing the model's understanding of language nuances and improving text generation capabilities.
- Annotated and labeled large datasets for training and validating machine learning models, ensuring data accuracy and consistency in tasks like image classification, object detection, and NLP, reducing annotation errors by 15%.
- Taught AI models to understand and generate multiple languages, including Hindi, by curating language-specific datasets, enabling the model to handle diverse linguistic features like grammar, syntax, and vocabulary.
- Implemented advanced deep learning techniques such as transformers and attention mechanisms to optimize NLP models, improving model scalability and reducing computational cost by 18%.
- Collaborated with cross-functional teams to integrate AI models into production, ensuring smooth deployment, model monitoring, and quick identification of performance issues, leading to a 20% reduction in downtime.
- Managed and optimized data pipelines, including data preprocessing and feature extraction, ensuring high-quality, well-labeled datasets for model training, which improved model accuracy and robustness.
- Used cloud platforms (AWS, Google Cloud, or Azure) for model training, deployment, and scaling, optimizing resource utilization and achieving faster iteration cycles with a 30% reduction in processing time.
- Conducted regular quality checks on annotated datasets, applying best practices for data labeling and verification to ensure high accuracy and consistency, contributing to enhanced model performance in real-world applications.

Jan 2022- Jan 2024

Artificial Intelligence Prompt Engineer

Innovative Tech Solutions

- Design and execute well-engineered, easy-to-maintain, reliable, and bug-free code for various company applications in collaboration with other AI engineers, data scientists, programmers, and software personnel
- Continuously improve gameplay with iOS and Android gaming applications by working with the existing code base and enhancing its different phases, including AI strategies, rules, and player-world interactions
- Coordinate all technical and developmental issues/risks identified during the process to the team of 10+ AI engineers to formulate and initiate appropriate course of actions to ensure the timely completion of the version upgrade
- Design, test, and deploy new artificial intelligence functionalities for 8 major projects of the company worth \$5M in total
- Author sophisticated and optimized codes for different games to boost the reusability of standard modules

Jun 2018- Jan 2022

Software Developer
Global Coding Inc.

- Developed and maintained multiple software applications using Java, Python, C, and C++ to support business objectives, enhancing functionality, and improving code quality through continuous integration and testing.
- Collaborated in an Agile development environment, contributing to sprint planning, code reviews, and feature implementation, resulting in the timely delivery of high-quality software products.
- Optimized the legacy codebase in C and C++ by refactoring inefficient functions and improving memory management, resulting in a 30% performance boost and reduced resource consumption.
- Created and maintained backend services using Java and Python, integrating with databases (e.g., MySQL, SQLite), and external APIs to provide seamless data access and storage solutions.
- Troubleshooted and resolved software issues by debugging code and performing root cause analysis, reducing customer-reported bugs by 25%, and improving application stability.
- Utilized programming languages such as Java, C#, and Python to write clean, maintainable code.

Skills

C++
C#
Java
Script
Java
Python
SQL
GitHub
AI Engineering
Decision Analytics
Multilingual model fine-tuning
Language-Specific Fine-Tuning for Hindi
Hindi language model training
Multilingual NLP (Natural Language Processing)
Cross-Lingual Transfer Learning
Software Prototyping
Data Science and Statistics
Predictive modeling
Team Leadership

Certification

Jun-2018	Professional Certificate Program in Machine Learning and Artificial Intelligence
Oct-2023	Microsoft Certified-Microsoft Azure Fundamental (AZ-900)
Oct-2023	Microsoft Certified-Microsoft Azure Administrator (AZ-104)
Dec-2024	Network Engineer provided by Mangtas

Education

2015–2018	Bachelor of Engineering Babasaheb Naik College of Engineering, Pusad
2012– 2015	Diploma In Engineering from <i>Dr. NP. Hirani Institute of Polytechnic Pusad</i>
