

ARAJIT GARAI

Flutter Developer

As a Flutter Developer at Kods Technology Pvt Ltd, I develop responsive, high-quality Mobile Application using technologies like Flutter,Dart. I integrate third-party APIs, manage state with the Provider package, and focus on creating intuitive, user-friendly interfaces with modern UI/UX principles. My work prioritizes performance, scalability, and security. Staying updated with industry trends, I ensure the delivery of innovative, functional Mobile App that meet both business objectives and user needs.

PROJECTS

ICICI Bank App Ui(iMobile) (09/2024 - Present)

- Developed a responsive and modern banking app UI modeled after ICICI Bank using Flutter and Provider for efficient state management. Created dynamic screens such as home, account details, transactions, and payments with reusable widgets and layouts. Integrated Provider for seamless data flow across the app, ensuring smooth navigation and real-time updates. Focused on delivering a user-friendly experience, optimized for both Android and iOS platforms, while maintaining clean architecture and a scalable codebase.

Renox (07/2024 - 08/2024)

- Renox is an application designed for managing jewelry repairs, streamlining the process for both customers and service providers. I developed the Renox app to ensure a smooth and user-friendly experience, focusing on tracking repair orders, managing customer information, and providing real-time updates. Additionally, I built the website using Laravel, delivering a robust backend with secure and efficient operations. The combination of the app and website offers a comprehensive solution for the jewelry repair industry, improving efficiency and customer satisfaction.

Raitha Mitra (04/2024 - 06/2024)

- Developed the Raitha Mitra mobile app to assist farmers with real-time updates on crop prices, fuel rates, precious metals, and weather forecasts. Integrated government schemes to provide easy access to subsidies and agricultural loans. Built using Flutter, the app ensures a seamless, responsive experience for farmers. Additionally, developed the website using React.js, offering a modern and user-friendly interface to provide farmers with critical information and financial resources for efficient farm management.
