EDUCATION

BACHELOR OF ENGINEERING

(2011 – 2015)

(Graduated in 2017)

Anna University,
Chennai, India.

KEY SKILLS

Snowflake DB
AWS S3
ETL Concepts
SQL
IICS

TOOLS

Snowflake
Oracle SQL Developer
Informatica IICS
JIRA
Control-M
GitHub
Jenkins
Postman
Python

PROFILE

4.9 years of IT experience as a Snowflake Data Warehouse developer with an emphasis on project development, implementation and maintenance of client Data Warehouse. Seeking to have a challenging career in Data Warehousing where I can apply my technological skills and knowledge in the best possible way.

EXPERIENCE

IT SUPPORT, OVHcloud Tech R&D (Payroll: ManpowerGroup Services India Ltd.), Bangalore. (Feb 2024 – Aug 2024)

Project Domain: Insurance
Environment: Snowflake DB, Oracle, AWS S3

ROLES AND RESPONSIBILITIES:

- Designed and optimized Snowflake data architecture for an efficient management of insurance data.
- Created data pipelines using Snowpipe and streams to automate insurance workflow.
- Developed Snowflake Procedures, Functions and User defined table function.
- Created Snowpipe to integrate the data between AWS S3 and Snowflake database.
- Pioneered the use of Snowflake's Time Travel and Fail-safe features for historical data analysis, significantly improving the ability to conduct point-in-time and trend analysis.
- Enhanced data migration processes for policyholder, claim, and other relevant insurance data, ensuring data integrity.
- Developed and automated data pipelines using Snowflake Streams, Tasks, and Snowpipe to ensure timely and accurate ingestion of data.

SR. REPRESENTATIVE, OPERATIONS Concentrix Services India Limited, Bangalore. (Nov 2020 – Jan 2024)

Project Domain: Banking
Environment: Snowflake DB, Oracle, AWS S3

INTERESTS

Data Science
Artificial Intelligence

PERSONAL DETAILS

DOB: 21 Jan, 1994
Marital Status – Single
Languages: Tamil, English

ROLES AND RESPONSIBILITIES:

- Developed Snowflake procedures for executing branching and looping.
- Migrated large volume of data to Snowflake from Informatica IICS.
- Converted the business need into technical and complex SQL queries and subqueries using Analytical functions, Joins and Operators.
- Used the Clone technique in Snowflake database for code modifications and testing.
- Bulk loading from the external stage (AWS S3), internal stage to Snowflake cloud using Copy command.
- Experience on Snowflakes Object Development such as Warehouses, Schemas, Database, Tables, Views, Pipes, Stages, Scaling Policies.
- Used Flatten table function to produce a lateral view of Variant, Object and Array column.
- Used COPY, LIST, PUT and GET commands for validating the internal stage files.
- Migrate historical and ongoing data from an on-premises SQL Server to Snowflake for enhanced data analytics and reporting.

ASSOCIATE, Sutherland

(External Payroll to Internal Payroll), (Oct 2018 – Sep 2019)

Project Domain: Journal Publication

Environment: Snowflake DB, Oracle, AWS S3

ROLES AND RESPONSIBILITIES:

- Loaded data into Snowflake tables from the internal stage using SnowSQL.
- Created clone objects to maintain zero-copy cloning.
- Data validations have been done through INFORMATION_SCHEMA.
- Created External table to access the data from the files, when the file access is denied in AWS S3.
- Data, Copy on Error, File Format & all Copy Options.
- Used secure views and materialized views to share the data to the partner application.
- Performed troubleshooting analysis and resolution of critical issues.
- Created Snowflake Tasks and Task tree to read the data from stream objects which are created on the base table.
