Personal Dossier	
Name	Santanu Tala
Date of Birth	02/03/1991
Gender	Male
Permanent Address	19A, Gita Bose 1 st by lane, Santragachi-711110
Contact No.	+91-8145738824
Email	talasantanu10@gmail.com

Experience Summary

Santanu has **9+ years** of IT experience. As part of his assignments, he has worked extensively in Informatica power center in support, development, and enhancement projects. Santanu has working experience in **Informatica PC 10.2, IICS, Oracle11g, Netezza, DB2, Teradata, Toad 10.1, Unix, WINSCP,**

Autosys, IWS scheduler, ESP scheduling tool, ticketing tool like service now, Data warehousing.

- ✓ Worked extensively in informatica support and development projects.
- ✓ Have worked in IICS project.

Technical Skills	
Operating Systems	Windows 98/XP/2000/Vista.
Technology	Informatica PC 10.2, IICS
Languages	C, SQL, PL/SQL
Databases	Oracle11g, Netezza, DB2, Teradata, MYSQL, MS SQL Server, Toad 10.1
Scripting Languages	HTML
Domain	Life Science, Healthcare, BFS, Insurance, Automobile

Project Summary	
Project #1	
Organization	Data Semantics
Client	Emaar mall
Platform and S/W used	Windows 7, Informatica PC 10.2, IICS, Oracle, MYSQL, MS SQL Server
Role Played	Senior Data Engineer
Project Description	All info in Emaar mall would be captured for business improvement like how many people come into mall in daily basis, product selling and report creation for further steps.
Responsibility	Informatica Support Analyst. Responsible for • Failure fixing. • Code modified for permanent fix. • Code deployment • Day to day client interfacing
Period	June,23 to Feb,24

Project #2	
Organization	Data Semantics
Client	Boubyan Bank
Platform and S/W used	Windows 7, Informatica PC 10.2, Oracle
Role Played	Senior Data Engineer
Project Description	Boubyan bank is a Quiet based bank. They are doing ETL assessment for existing mapping as Softech organization left that project after creating few mappings
Responsibility	Informatica Support Analyst. Responsible for • Checking Column Population. • Data Validation • Performance Tunning • Day to day client interfacing
Period	Sept 22 to May 23

Project #3	
Organization	Tata Consultancy Service
Client	Cummins Generator
Platform and S/W used	Windows 7, Informatica PC 10.2, Oracle 11g
Role Played	Informatica Consultant
Project Description	Cummins is at the forefront of designing future technologies for turbos, emissions, fuel systems and more. It's business spreads over India, UK, US, China, Singapore and Romania.
Responsibility	Informatica Support Analyst. Responsible for • Provided Support in existing frame. • Modifying and implementing code Deployment as per business requirement. • Failure fixing. • Performance tuning. • Day to day client interfacing.
Period	March 21 to August 22

Project #4	
Organization	Cognizant Technology Solutions
Client	MetLife
Platform and S/W used	Windows 7, Informatica PC 10.2, Oracle 11g, Unix
Role Played	Informatica Developer
Project Description	As an insurance company deceased customers level insurance have been processed to their nominee and initiation has been taken care of MetLife.
Responsibility	Informatica Developer. Responsible for • Design and development of new enhancements. • Have been modifying & implementing Informatica code as per business requirement.
Period	January 19-February 20

Project #5	
Organization	Cognizant Technology Solutions
Client	Great American Insurance Company
Platform and Technology used	Windows 7, Informatica Power Center 10.2
Role Played	Reverse Engineering

Project Description	Great American Insurance Company (hereafter "GAIC" or the "Client") is strategically partnering with Cognizant Worldwide Limited (hereafter "Cognizant"). to provide solutions that improve processes and service levels, increase the quality of products and services, and reduce total costs. Cognizant has captured and trying to address in the SOW is mentioned below: • Reverse engineering of existing ETL Components and capturing the technical documentation of mapping done for the existing CDM data load process Doc. • Reverse engineer the extraction and loading logic and document the same in both in technical and simple English terms for the business.
Responsibility	1.Mapping Document Preparation (Source (most of the cases it is view) to target tables details, Filter, Join, Transformation logic details-all should be given there). 2.Data Analysis-Data redundancy check, SCD type1, SCD type 2 check. 3.Root cause analysis for long running workflow in Informatica.
Period	October 18-December19

Project #6	
Organization	Cognizant Technology Solutions
Project	TM 1 Support & Touchstone MI
Client	Zurich UK
Platform	Windows 7
Technology used	Informatica 10.2, Oracle, Unix, WinSCP & TM 1
Role Played	Informatica/TM1 Support Analyst
Project Description	• TM1: IBM Cognos TM 1 is one of the most popular multidimensional analysis tools used to build collaborative planning, budgeting, and forecasting solutions, as well as analytical and reporting applications which can integrate with Microsoft Excel to generate financial reports based on the need of Business users. TM 1 is used in UK General, Commercial Lines, UK Personal Lines, Zurich Commercial / Municipal, Global Corporate and Central Finance & TM1 PL Pricing used only in UK Personal Lines. • Touchstone MI: This project covers the overview of client business, applications, and architecture in respect to Touchstone MI application. This document fosters a detailed understanding of the application, approach, and the processes, that are followed, in fulfilling the customer deliverable.

Responsibility	Developer. Responsible for • TM1 Support: • Due to Citrix hanging and crashing problem, incidents in service now have been initiated by user and these were resolved by me. • CPU, memory utilization and TM1 UAT server specification, RAM and CPU graphs for servers, had been provided to user as per their requirement. • Code execution issue in Citrix had been handled by me. • Touchstone MI: Informatica L1 and L2 all kind of supports had been provided by me.
Period	July 16 – September 18

Project #7	
Organization	Cognizant Technology Solutions
Project	ADP (Automatic Data Processing, Inc.)
Client	ADP(BFS)
Platform	Windows 7
Technology used	JVM (Java Virtual machine)
Role Played	Data Loader
Project Description	The project is about data migration. Data is migrating from pay force to vantage because in vantage platform, some extra features have been added.
Responsibility	Data Loader. Responsible for • As a loading team member, data coming from various source has been come into same format into staging layer and those data has been loaded into target database. • Migrating the old records provided by Client side from Pay force to a new and different environment Vantage. • Handling various technical aspects like product documentation, Developing Tools & taking appropriate actions if QA issues come during validating Pay force and Vantage data.
Period	Nov, 2015 - Jun, 2016

Project #8	
Organization	Cognizant Technology Solutions
Project	Cigna Healthcare
Client	Cigna (Healthcare)
Platform	Windows 7

Technology used	Informatica Power center 10.2, Unix, WinScp, Toad 10.1
Role Played	IM production Support
Project Description	This project consists of 3 applications. RDS – 706 jobs consisting of around 14000 sessions run in this application. It consists of one SLA job that is responsible for the generation of Argus ID Card for the Customers. IHUB & One Source – These are automated applications, where the jobs run depending on the arrival of the files send by the Vendors.
Responsibility	Roles and Responsibilities: - Primarily dealing with RDS. - Monitoring Jobs those are running in the Production environment. - Fixing the issues on the job failure. IBOR Re sync – Re-synchronizing member details from source system to RDS and loading them to IBOR. Ticket Triaging. SLA job analysis. - Dealing with files missing in IHUB. Familiarity in various tool as level 1 stage is completed throughout this project.
Period	Oct, 2014 - Oct, 2015

Project #8	
Organization	Cognizant Technology Solutions
Project	Cornerstone/NGW
Client	AstraZeneca (Life Science)
Platform	Windows 7
Technology used	Informatica Power center 10.2, Unix, WinSCP, Autosys, Netezza
Role Played	Informatica Support Analyst
Project Description	AstraZeneca is a pharmaceutical company. Cognizant is a service provider from 2004. Cognizant is now providing some application like centralized data management service & analyzing clinical trial data.
Responsibility	. Responsible for - As my first project, initial analysis for job failure, job long running, delay notification all types of issues had been handled. - Other than that file transfer between two servers, file availability checking in file watcher was done. - various types of job i,e- daily,weekly,bi-weekly and monthly jobs were handled. - Script level jobs triggered from UNIX command line and informatica level jobs triggered from workflow level were done. Familiarity in various tool as primary stage is completed throughout this project.
Period	September 2013-September 2014

Training Period

Date of Joining	18 th April, 2013
Period	April 2013 - September 2013

Scholastics				
Qualification	Name of the Institution	University/ Board	Aggregate Percentage / DGPA	Year of passing
B.Tech	B.P.P.I.M.T	W.B.U.T	7.75	2012
