OBJECTIVE

Quick learner and highly energetic having a keen aptitude for learning and productively applying new knowledge resourcefully.

SKILLS

- Java
 - >Knowledge on Methods.
 - >Proficiency in data types and operators.
 - >Good in OOPS concepts.
 - >Hands on experience about Constructors overloading.
 - >Good knowledge on class and object loading process.
 - >Familiar with Strings and Arrays.
 - >Expertise in Exception Handling.
 - >Knowledge on Collection Framework.
 - >Good in Multi threading.
- SQL
 - >Knowledge on Joins.
 - >Hands on experience in solving SQL statements.
 - >Functions.
 - >Good in solving queries related Subqueries.
 - >Good knowledge in Normalization.
 - >Basic knowledge on Index, Views, Triggers.
- HTML
 - >Hands on experience in Creating tables for website.
 - >Good knowledge on Creating basic forms.
- CSS
 - >Good in Styling the websites
 - >Passionate in designing websites attractively.
- JavaScript
 - >Proficient in Data Types, operators. and loops.
 - >Hands on experience in Strings, arrays, Functions and objects.
 - >Familiar with promises.
- Advance Java
 - >Proficient knowledge on JDBC Drivers.
 - >Having good understanding in how to communicate with Database.
 - >Knowledge in Servlets and Hibernate.

EDUCATION

Viswam Engineering College, Madanapalli
BTech(CSE)
Grades - **80%**

2020-2024

SGNR jr college, Tanakallu
Board of intermediate Education
Grades - **9.56**

2018-2020

Govt. High School, Tanakallu
SSC
Grades - **9.7**

2017-2018

PROJECTS

Library Management System

Technologies used:

Java, JDBC, Servlets

Developed a web-based Library management system using Java, JDBC and servlets to efficiently manage books information. This application allows for the addition, updation, deletion and can view availability of the books within the library.

Modelling and predicting Cyber hacking breaches

Technologies used:

Python, HTML, CSS, JavaScript, MySQL.

Predicting cyber hacking breaches using features like network traffic patterns, user behavior and system vulnerabilities.

Portfolio site

Technologies Used:

HTML, CSS, JavaScript.

Portfolios can capture the complexity, depth, and diversity of student work, and reflect their individual strengths, goals, and passions. Portfolios can also foster student agency, ownership, and motivation, as they give students more choice and voice in how they present their learning.

INTERNSHIP

Completed an internship from IBM on front end Technology

Completed an internship from D3 solutions on machine learning.

CERTIFICATIONS

Certified from NPTEL Online course on Python for data science with 60%.

Certified from simplilearn Online course course on Python.

STRENGTHS

Confident and Determined

Adoptive and Optimistic

Doing Multitasks

Efficient Management Skills

Quick learning Ability
