

C. Niranjan reddy

Phone: +91 7032928842

Email: niranjanreddy1234c@gmail.com

Location: Bangalore

Objective

To secure a challenging position in cybersecurity, specializing in SOC operations, network security, and VAPT. Aiming to utilize my skills in threat detection, incident response, and vulnerability management to enhance organizational security and protect critical assets.

EDUCATION

Graduation B.Tech. (Mechanical) 2024
Anantha Lakshmi Institute of Technology and Sciences Anantapur, with Score 80%

SKILLS

Technologies:- Cyber Security, Security Operations Center, Network Security, Vapt, Web Application Security Testing, OWASP, Computer Networking, Dast, Linux, Ethical Hacking, SIEM.

Network: - Understanding of TCP/IP, DNS, DHCP, HTTP/HTTPS, VPN, FTP, ARP, ICMP, TLS/SSL, & basic routing concept

Security: - Firewalls, Intrusion detection systems (IDS), Intrusion prevention systems (IPS), Antivirus software, Splunk

Tools: - Wireshark, Nmap, Burp Suite, Metasploit, Nessus, Owasp, Zap, Postman, SIEM Tools, MSF venom.

Certificates:-

- **Certified Ethical Hacker (CEH)** from EC Council [ECC2841930576]
- **Certified SOC Analyst (CSA)** from EC Council
- **Cybersecurity & Ethical Hacking** from Hackerbook Technologies

INTERNSHIPS AND PROJECTS

Internships:- **Hacker book Technologies | June -August 2024**

- Successfully conducted vulnerability assessments and penetration tests on various systems and networks.
- Proficiently used industry-standard tools like **Wireshark, Nmap, Burp Suite, Metasploit, Nessus, OWASP, ZAP, Postman**, and **SIEM tools** to identify and exploit vulnerabilities.
- Gained practical experience in Linux system administration and security hardening.

Skilldzire | January-April 2024

- **Gained a solid foundation** in **additive manufacturing (3D printing)** techniques.
- **Learned** about the **3D printing process** and **various materials** used.
- **Developed basic skills** in **3D model design and preparation** for printing.
- **Operated** different types of **3D printers** under supervision

Projects:- 1. FABRICATION OF 360DEGREES FIRE PROTECTION SYSTEM

Aimable and controllable: High-capacity water jets for extremely large-scale fires. Remote operation: Bluetooth and RF control for wireless operation. Permanent installation: Detects temperature changes via heat sensors. Targeted fire suppression: Directs water at specific fire locations. Minimal property damage: Reduces potential damage compared to traditional sprinkler systems.

2. Sample application DVWA Altoromutual: -

Vulnerability assessment and penetration testing Skills used-

Application security, Vulnerability assessment, penetration testing, OWASP, Application security testing, Burp suite, Network.

Network Security Project: Implemented firewalls and IDS to secure a simulated network environment. Conducted vulnerability assessments and recommended security enhancements.

Web Application Security Project: Identified and fixed security vulnerabilities in a web application. Implemented secure coding practices to mitigate common threats.

Declaration:-

I hereby declare that above particulars are true to my knowledge.
