About Me

Seasoned SOC Analyst with 2+ years of hands-on experience in threat detection and incident response. Eager to contribute my expertise in cybersecurity to a major global organization, ensuring the highest level of protection against evolving threats. My goal is to effectively apply my skills in a dynamic security environment, actively participating in achieving the organization's objectives, while seizing opportunities for continuous learning and professional growth.

Profile

- Good understanding on network device Hub, Switch & Router.
- Good knowledge on network concepts like TCP/ IP, UDP, 3 way hand shake, OSI model.
- Deep knowledge about DNS, DHCP, ARP, AD.
- Network security solutions like firewall, WAF, PROXY, IPS\IDS, EDR, AV, DLP, VPN.
- Familiar on cyber kill chain frame work, MITRE ATTACK, CIA, Encryption & hashing.
- Good knowledge on Cyber Attacks and malware.
- Knowledge on SQL. XSS. TOP 10 OWASP.
- Solid Knowledge on SIEM components and QRadar architecture

Professional Experience

Nexus System Private Limited | Mumbai

Security Analyst L1

Key responsibilities:

- Monitoring logs and looking into suspicious activity utilizing the runbook and several Threat-Intel tools with the SIEM tool Qradar.
- Managing 24X7 SOC operations, which include detecting, following up on and analyzing incidents.
- Analyzing threats by taking the logs from Firewalls, WAF, Endpoints, Security, AV, IDS/IPS etc. and identify a false positive and a true positive.
- Raising the tickets through ServiceNow for validating the incidents.
- Responding to security breaches, possible weaknesses, and offenses from detection systems.
- Creating daily, weekly, and monthly reports, properly formatting them & sharing them with clients; and notifying them when logs are stopped.
- Perform detailed analysis of phishing emails and submit the analysis to cyber defense team for further actions.
- Finetune of existing use case in SIEM to reduce false positives.
- Daily Shift Handovers.
- I have good exposure on log analysis, log monitoring, security analysis
