PROFESSIONAL SUMMARY

Cloud engineer with over 1.8 year experience in the Infrastructure solution in cloud. Experience on AWS cloud based platform services , EC2 , S3 , VPC , EKS and load balancers. Managing of docker container applications and kubernetes .Product support for microservice application , maintenance of data bases like RDS . Experienced all phases of the software development life cycle,including analysis , testing and deployment. Looking for a challenging and rewarding position in a fast-paced environment where I can use my skills and experience.

SKILLS

Linux GitHub Docker CI/CD Ansible Kubernetes AWS AWS CloudWatch Prometheus ArgoCD
Jenkins Git Maven Python AWS Cloudtrail AWS EC2 Terraform Grafana MySQL GitOps

- **Cloud Services:-** AWS
- **Service Models:** IAAS, PAAS, SAAS.
- **AWS Services:-** AWS Lambda AWS EC2 Route-53
AWS -S3 AWS CloudWatch AWS CloudFront
- **Compute Services:** EC2, Elastic Beanstalk, Elastic Load
Balancer, Auto Scaling, AMI.
- **Storage Service:** Amazon S3, EBS, Snapshots, Cross
Region Replication, Versioning, Static Web Hosting in S3.
- **Networking Services:** VPC, Subnet, Route tables,
NATGateway, NACL, Internet Gateway, Security Groups,
Route53.
- **Security and Identity Services:** IAM User
authentication and Access management, AWS WAF.
- **Networking:** HTTP , HTTPS , TCP/IP , DNS , SSL , TLS ,
Taceroute , Routing protocol , Firewalls , Network-security
Servers , Virtualization, Data center , OS , Hardware , VLAN
- **Source Control:-** GIT GitHub Jira
- **Database:-** MySQL AWS RDS AWS Arora
AWS DynomoDB MongoDB
- **Infrastructure as a Code:-** Terraform Ansible
- **Monitoring Tools:-** PrometheusGrafana
- **CI/CD Tools:-** Jenkins ArgoCD Maven OWASP
SonarQube
- **Operating System:-** RedHat Ubuntu Linux
- **Containerization &:-** Docker Kubernetes HELM
Orchestration AWS EKS Docker Compose
- **Programming & :-** Python Shell scripting YAML
Scripting Golong
- **Web Server:-** Nginx Tomcat
- **Devops-practices:** Agile methodologies, OSI model
,Troubleshooting , Balancing , Records

PROFESSIONAL EXPERIENCE

Junior Project Engineer

REXEL INDIA PRIVATE LIMITED

Bangalore , India Nov 2023 - June 2024

- Check the health and performance of cloud services.
- Monitor logs for any errors or anomalies.
- Configure cloud resources like virtual machines, databases, and networking components based on project requirements.
- Assist in deploying applications or services to the cloud.
- Monitor S3 buckets for performance and access logs.
- Organize and manage data stored in S3 buckets, ensuring proper naming conventions and folder structures.
- Implement lifecycle policies to transition data to different storage classes (e.g., Standard to Glacier) based on usage patterns.
- Regularly back up critical data and verify integrity.
- Write and maintain scripts (using Python, shellscript , AWS CLI) to automate data uploads, downloads, or processing tasks.
- Integrate S3 with other AWS services (e.g., Lambda, EC2) for data processing and workflow automation.

Design Engineer

ELECTRONICS RELAY INDIA PVT LTD

Bangalore , India Sep 2022 - Oct 2023

- Provision and manage AWS resources like EC2 instances, S3 buckets, RDS databases.
- Checking AWS CloudWatch for alerts and performance issues.
- Optimize resource usage to manage costs effectively.
- Write Bash script to automate routine tasks, such as backups, deployments, and scaling operations.
- Work with operations teams to understand deployment and scaling requirements.

PROJECTS

1.Serverless Web Application on AWS

- Implemented serverless student data web application
- Used S3 to store and host the web application's static files (HTML, CSS, and JavaScript).
- Created a CloudFront distribution to serve the S3-hosted static files with low latency.
- Configured static web hosting to API gateway , for triggering Lambda functions like GET and POST
- Created a DynamoDB table to store the items
- Build a Lambda function to handle the CRUD operations on the DynamoDB table.

2.Three Tier Architechure on AWS

- Implemented an three tier wordpress web application deployed on AWS
- application consists of presentation-tier (web-tier) , application-tier and database-tier
- created virtual private network using AWS VPC and adding subnets , route-table , internet-gateway , nat-gateway and security groups .
- created nine separate EC2 instance using aws-vpc in which web-tier running on public subnets , app-tier running on private subnets and database-tier running on db subnets.
- web-application deployed on app-tier instance
- By using AWS RDS mysql database created and attached to database instance.
- created internal load-balancer for communication between web-tier and app-tier
- created external load-balancer for accessing the application externally.

3.Cloud Cost Optimization - AWS

- Implemented Lambda function that fetches all EBS snapshots owned by the same account ('self')and also retrieves a list of active EC2 instances ('running and stopped')
- For each snapshot , it checks if the snapshot not associated volume than it deletes
- If snapshot is associated to volume but volume not attached to EC2 instance than it deletes.
- effectively optimizing storage costs.

EDUCATION

Bachelor of Engineering

Sri Siddhartha Institute Of Technology, University of SSAHE
,Tumakuru(D) ,Karnataka (S) ,India Electrical And Electronics
Engineering CGPA :- 8.01 (DISTICTION)

CERTIFICATION

- AWS Certified Solutions Architect - MicroDegree
- Devops certified by MicroDegree
- Linux certified by Microdegree

PERSONAL DETAILS

- NATIONALITY : Indian
- Location : Bengaluru
- Maritul status : Single
- Gender : Male
