OBJECTIVE:

As a dedicated Full Stack Web Developer with 2+ years of experience, I build robust, user-focused applications using React JS, Spring Boot, Spring MVC and Angular JS.

EXPERIENCE SUMMARY

- Full Stack Web Developer with 2+ years of experience in developing and maintaining web applications using React JS, Spring Boot, and Java.
- Proficient in building responsive, user-centric Single Page Applications (SPAs) with React JS, using tools like Axios, JSX, and react-router.
- Skilled in RESTful API design and development with Spring Boot and developed robust web applications using Spring MVC seamlessly integrating dynamic front-end components.
- Integrated Hibernate ORM for data persistence, utilizing its features for effective database interaction and transaction management.
- Experienced with MySQL and MongoDB for efficient relational and non-relational data management.
- Strong backend skills with Spring JDBC, Hibernate ORM, and JPA for efficient database interactions.
- Hands-on experience with MAVEN 3.0 for build automation and dependency management.
- Comprehensive understanding of the SDLC with a focus on scalable, high-quality solutions from planning through maintenance.
- Developed and implemented authentication mechanisms using JSON Web Tokens (JWT) to secure API endpoints.
- Managed token generation and validation processes, ensuring robust security practices.
- Integrated authorization controls by embedding user roles and permissions within JWT payloads.
- Developed and executed unit tests using Mockito to isolate and mock dependencies, enhancing test reliability and performance

TECHNICAL SKILLS:
