SKILLS AND FRAMEWORKS

JavaScript | Node JS | Express | JWT

MongoDB | PostgreSQL | AWS lambda

Data Structures | TypeScript | MS SQL

TOOLS AND TECHNOLOGIES

Git / GitLab | Jira | Postman

Swagger | OneSignal Notification

SOFT SKILLS

Problem Solving | Teamwork

Time Management | Adaptability

INTERESTS

Martial Arts | Traveling

ACHIEVEMENT

Achieved 2nd Rank in
Hackathon-2021

EDUCATION

Full - Stack Web Developer
Masai School
March 2021 - Dec 2021

Amity University Rajasthan
Jaipur— B.Tech (Computer Science
and Engineering)
August 2016 - May 2020

Minor Degree in Management
Jaipur— B.Tech (Computer Science
and Engineering)
AUGUST 2016 - MAY 2020

Naveen Kumar

Back-End Developer

(Immediate Joiner)

PROFESSIONAL SUMMARY:

Dedicated, efficient and goal-oriented Back-End Developer with specialization in Node.js. Quick learner and a keen interest in learning new technologies. Seeking opportunities to expand my backend development expertise in a company that would help me grow my skills and gain hands-on technical expertise.

WORK EXPERIENCE:

Q3 Technologies, Gurgaon, India

Node.js Developer

JAN 2022- MAY 2024

- Developed and managed web applications with the help of MEAN stack and SQL.
- Optimized legacy data storage and search queries for the high-volume external web application, minimized the average response time.
- Created optimized scripts to fetch the data according to the client's needs and provided the data reports to them.
- provided creative ideas for new features so we can make the system more efficient and effective

PROJECT:

Freedo rentals (Hero MotoCorp)

- Worked closely with the front-end team to resolve and design APIs according to requirements and make them fully functional.
- Convert the monolithic architecture into microservices base architecture using Solace.
- Performance optimization and maintenance of existing features
- Implementation of OneSignal push notification for sending end-to-end notifications to admin and user.
- Implementation of Swagger so documentation and interaction with the REST API can be easy.
- JWT token algorithm system changed and interaction with other microservice authentication improved.

SHAREKARO (Hackathon Project)

A website that provides sharing transportation to users.

FEATURES :

- Users can check the fare/route and book a truck.
- Post and search trips that provide shared transportation.
- Users can also track the location of the truck in the map.

TECH STACK: HTML | CSS | JavaScript | React.js | MongoDB | Express

AREAS OF RESPONSIBILITY:

- set up all UI.
- Worked on the maps page and Posting_ad page.
- Made responsive UI.
