Automation Testing Projects:

Project 01:

- **Name:** Salesforce
- **Role:** QA Automation Engineer

Description: Developed and maintained a library of automated test scripts for Salesforce applications, resulting in a 40% reduction in manual testing efforts and improved test coverage.

Identified and addressed performance bottlenecks in Salesforce applications, leading to a 20% increase in application speed and responsiveness.

Stayed up to date with Salesforce releases and changes, ensuring timely adoption of new features and enhancements, which contributed to a 15% increase in application functionality and user experience.

Project 02:

- **Name:** Digital E Commerce and SAP.
- **Role:** QA Automation Engineer

Description: I led a project centered around the creation and automation of a telecom app known as "Digital Application." This app serves customers with a diverse range of internet bundles and mobile packages across 13 regions. The project was characterized by its integration with SAP, backend tool, which played a crucial role in approving customer requests originating from the Digital Application.

Project 03:

- **Name:** Digital E Commerce (My Liberty and Flow Mobile app Android/IOS)
- **Role:** QA Mobile Automation Engineer

Description: I led a project centered around the creation and automation of a telecommunication app known as "Digital Application." This app serves customers with a diverse range of internet bundles and mobile packages across ten distinct markets, including Jamaica, Panama, Trinidad, Tobago, Cayman, LCPR and etc.

Roles and Responsibilities for the Projects:

- Discussing with the Test Leads to understand the Data Module and Functional knowledge.
- Developing the Automation scripts in a modularize and parameterized structure.
- Creating/Enhancing/Debugging/Executing scripts of Automation for Functional/Regression Testing.
- Co-ordinating with the Test team members and development team to resolve the issues.
- Handling changes and conducting the regression Testing.
- Defect raising in JIRA and tracking the defect.
- Prepare Automation Summary Reports to the Test Manager and Clients.
- Direct reporting to the client Automation progress/issues/blockers/weekly status.
- Developed and Maintained Automation Test cases of more than 300 in my previous project.
