

SUMMARY

Detail-oriented RPA Developer with over 3.6 years of experience in designing and implementing automation solutions using UiPath and Power Automate. Proven ability to streamline business processes, achieving up to 30% reduction in manual effort and improving operational efficiency. Proficient in developing and managing RPA bots, integrating OCR tools, and utilizing UiPath Orchestrator for deployment and monitoring. Skilled in process automation, troubleshooting, and optimizing workflows to enhance productivity.

EXPERIENCE

Optum Global Solution (UHG)

Gurugram (Oct 2022 – Present)

- **Working as Associate Software Engineer** with responsibilities of Designed and implemented 10+ automated workflows using Power Automate, streamlining processes and reducing manual intervention.
- Automated repetitive tasks across departments by integrating Power Automate with SharePoint, Outlook and other business applications, improving team collaboration by 20%.
- Developed and maintained custom connectors to integrate with third-party APIs and legacy systems, expanding automation capabilities across diverse platforms.
- Created advanced **conditional logic flows**, improving the accuracy and precision of business processes.
- Collaborated with business teams to identify and document automation requirements, delivering **5+ end-to-end automation solutions** that reduced process cycle times by **40%**.
- Used **Power Automate Desktop** to automate desktop-based applications, increasing process efficiency and enabling the automation of legacy systems.
- Utilized **Power Automate Cloud AI Builder** to integrate machine learning models, automating document processing and improving data extraction accuracy by 20%.

Cognizant

Gurugram (Jun 2021 – Sep 2022)

- **Worked as Programmer Analyst** with responsibilities Designed, developed, and implemented **10+** RPA solutions using **UiPath** to automate complex business processes, enhancing efficiency and reducing manual effort.
- Identified and analyzed **business processes** to evaluate and prioritize automation opportunities, resulting in streamlined workflows and time savings.
- Collaborated with **cross-functional** IT and business teams for the seamless integration of RPA solutions, contributing to end-to-end automation initiatives.
- **Hands-on experience with UiPath Orchestrator** for managing, monitoring, and deploying bots in a production environment.
- Working experience on **OCR tools**, implementing optical character recognition solutions for document processing automation.
- Familiarity with project management and tracking tools like **Rally** and **ServiceNow**, contributing to effective **project delivery** and issue management.

TECHNOLOGY SKILLS

- **Technologies:** RPA, Orchestrator, UiPath RE-Framework, Microsoft Power Automate Desktop, C# (basic)
- **Tools:** UiPath Studio, Visual Studio, GITHUB, SSMS, AI Builder, Microsoft Dataverse
- Deployment into Production using **Azure DevOps**

EDUCATION

Bachelor Of Technology in Computer Science

Aug 2015 - Aug 2019

Swami Vivekanand Institute of Engineering and Technology

CERTIFICATION

- Completed diploma in all courses(RPA Starter, RPA Developer Foundation)
- RPA Advanced
- UIARD certification
