PROFESSIONAL SUMMARY

Innovative and Globally Certified Data Engineer with a strong foundation in cloud-based data engineering, specializing in Azure Data Factory and Databricks. With six months of hands-on experience, I've built robust data pipelines, transformed complex data sets, and optimized workflows to support data-driven decision-making. Skilled in SQL, Python, and PySpark, I bring attention to detail and a proactive approach to solving complex data challenges. My expertise in streamlining data processes and dedication to continuous improvement drive efficient, high-quality data solutions that deliver actionable insights.

SKILLS

- Languages: Python, SQL
 - Relational Database: MySql, SQL Server
 - Data Processing: Apache Spark, Pyspark, Databricks
 - Cloud Services: Microsoft Azure, ADLS Gen 2, Azure Databricks, Azure Data Factory, Azure Synapse
 - Version Control: GitHub
 - Data Warehousing: Apache Hive
 - Formats: Parquet, Delta, ORC, JSON, CSV
 - Other Skills: ETL Pipeline, Apache Hadoop, Linux, Data Engineering, Big Data, Data Quality Azure Key Vault
-

INTERNSHIP

Intern Data Engineer | AVD Group, Aurangabad Nov 2023 - May 2024

- Performed data transformation on raw retail domain data using PySpark within the Databricks Lakehouse platform and Azure Data Factory (ADF).
 - Implemented transformation and action procedures to refine raw data into structured, insightful datasets.
 - Technologies used: ADF, PySpark, Spark SQL, Azure Databricks, Azure ADLS Gen2.
 - Applied technical knowledge in PySpark to solve day-to-day data engineering tasks.
 - Worked with various file formats including CSV, JSON, and Parquet files.
 - Created data frames from different file formats and implemented Delta tables.
 - Utilized PySpark and Spark SQL for data cleaning, data masking, and performing aggregations based on business logic.
 - Developed and maintained data pipelines using Azure Data Factory.
 - Utilized Azure Databricks for data processing and transformation with PySpark
-
