Professional Summary

Detail-oriented Software Tester and QA Analyst with over 2 years of hands-on experience in manual testing methodologies, complemented by emerging expertise in automation testing using Python and Selenium. Proficient in functional, regression, and API testing with tools like Postman, alongside defect tracking in JIRA and Mantis. Passionate about Agile environments, with initial exposure to BDD frameworks using Cucumber and Gherkin, dedicated to enhancing software quality through thorough test planning, execution, and collaboration to deliver bug-free web applications.

Core Skills

- **Testing Methodologies:** Manual Testing (Functional, Regression, Smoke, Black Box), System Testing, Performance Testing
- **Automation Testing:** Python, Selenium WebDriver, Cucumber, Gherkin (BDD)
- **API Testing:** Postman
- **Bug Tracking & Collaboration:** JIRA, Mantis
- **Quality Assurance Processes:** Test Planning, Defect Reporting, Documentation Review
- **Tools & Platforms:** Google Sheets, WordPress
- **Methodologies:** Agile/Scrum

Professional Experience

Manual & Automation Tester

Boston Institute of Analytics, Andheri, India

March 2025 – Present

- Conducted comprehensive manual testing for BIA website and Shivsena-related web projects, identifying and documenting functional defects to ensure seamless user experiences and compliance with project requirements.
- Developed and executed automation scripts using Python and Selenium WebDriver, automating regression test suites to improve efficiency and reduce manual testing efforts by streamlining repetitive tasks.
- Performed basic API testing with Postman, validating endpoints and payloads to verify integration points, contributing to faster defect resolution in Agile sprints.
- Collaborated with development teams in Agile ceremonies, logging and tracking defects via JIRA to facilitate timely fixes and enhance overall software quality.

Manual Tester

Ebrandz LLP, Goregaon, India

June 2022 – February 2025

- Executed diverse manual testing strategies, including functional, regression, and smoke testing across multiple web-based projects, identifying over 100 defects to uphold functionality and performance standards.
- Monitored, logged, and tracked defects using bug tracking tools like Mantis and JIRA, enabling efficient triage and resolution that minimized production issues.
- Contributed to test planning and documentation review, ensuring thorough coverage of black box testing scenarios and supporting quality assurance in fast-paced development cycles.
- Performed system-level testing on web applications, validating end-to-end workflows to guarantee reliability and user satisfaction in live environments.

Software Testing Intern

ATG, Bangalore, India

2021 (8 months)

- Assisted in manual testing processes for software applications, executing test cases to detect bugs and support defect reporting under senior QA guidance.
- Participated in regression and smoke testing cycles, gaining foundational experience in black box testing methodologies and bug tracking tools.
- Reviewed documentation and collaborated on test planning, contributing to improved testing workflows and early defect identification.

Education

BSc in Computer Science

Viva College, Virar, India

2014 – 2017

Final Year CGPI: 5.40/10

Higher Secondary Certificate (HSC)

Viva College, Virar, India

2014 – 2015

Percentage: 48.60%

Courses & Training

- **Python Basics** – TryCatch Classes, Borivali, India (2020 – 2021)
- **Entry-Level Internship in Software Testing** – OTET Infosys, Virar, India (3 months)
- **Ongoing Learning:** Cucumber & Gherkin BDD with Python-Selenium Frameworks
