## **Profile:**

As a Computer Science Engineering graduate with one year of experience as a .NET Full Stack Developer, I possess a strong background in C#, ASP.NET, React.js, C++, and SQL. My expertise is in developing high-performance web applications, optimizing system efficiency, and delivering innovative solutions that drive business success. I am eager to take on new challenges in a dynamic environment where I can contribute to operational efficiency, enhance productivity, and secure better opportunities for my family. My goal is to leverage my skills to help your company achieve technological growth and operational excellence.

## **TECHNICAL PROFICIENCIES:**

|                              |   |                                                              |
|------------------------------|---|--------------------------------------------------------------|
| <b>Programming Languages</b> | : | C, C++, C#, Java.                                            |
| <b>Technology</b>            | : | Asp.net, Asp.Net MVC, HTML, CSS, JavaScript, Html, React.js. |
| <b>Database</b>              | : | SQL                                                          |
| <b>Additional Skills</b>     | : | .Net core, Web API                                           |
| <b>Operating Systems</b>     | : | Windows XP/ Windows 7/8/10                                   |

## **PROFESSIONAL EXPERIENCE:**

**Software Engineer, MicroSpark Software Solution**

December 2023 – till date

### **- Responsibilities**

- Design, develop, and implement software applications based on specifications and requirements.
- Write clean, maintainable, and efficient code with strong attention to quality and performance.
- Collaborate with product managers, designers, and other engineers to deliver high-quality features.
- Participate in code reviews to ensure best practices and high-quality standards.
- Identify and resolve performance bottlenecks and software defects in a timely manner.
- Contribute to the architecture and design of new and existing systems, ensuring scalability and maintainability.
- Implement tests and debugging processes to verify and optimize software functionality.
- Stay updated on new technologies and incorporate best practices into the development process.

**Web Development Intern, Code Clause**

June 2023 | Pune, India

-During my internship, I demonstrated exceptional responsibility, sincerity, and a genuine eagerness to learn, consistently showing enthusiasm for taking on new assignments and challenges.

## **Software design and Development intern,**

**Modi Innovations**

May 2019 | Aurangabad, India

-During my internship, I designed and implemented software using the Spring Framework, demonstrating my proficiency in modern development practices and frameworks.

## **EDUCATIONAL QUALIFICATION:**

- 1) SSC from HVG School in the year 2017 with 80%.
- 2) Diploma from Government Polytechnic Aurangabad in the year 2020 with 71%.
- 3) B. Tech (CSE) From DBATU University in the year 2023 with 83%.

## **PROJECT: 1**

Project:-DESQuote2.0 (Dealer Equipment Service)

Client:-Bosch/FORD

Company:- MicroSpark Software Solutions

Role:-Software Developer

### **Description:**

DESQuote2.0 is a platform that enhances equipment service management for automotive dealerships, integrating multiple OEMs and supporting service operations across various brands. It includes features for service quotes, maintenance scheduling, equipment history tracking, and detailed reporting.

### **Responsibilities:**

- Analyzed system requirements and architecture.
- Developed new features using .NET Core, Angular, and Web API.
- Created and deployed database objects.
- Deployed the application on Azure and conducted testing.
- Coordinated with QA for bug fixing and issue resolution.

**Technology:** .NET Core, Web API, Angular, SQL Server, Azure, Entity Framework Core

## **PROJECT: 2**

Project:-Automate Business Process

Client:- MicroSpark Software Solutions

Company:- MicroSpark Software Solutions

Role:-Software Developer

**Description:**

Automate Business Process is a cloud-hosted platform designed for users to create and customize business applications, featuring workflow design, data capture, and notifications.

**Responsibilities:**

- Analyzed project architecture and technology stack.
- Developed application components using .NET Core, Angular, and TypeScript.
- Deployed the application and interacted with users for support.
- Conducted unit testing, code reviews, and developed EF using a database-first approach.

**Technology:** .NET Core 3.1, Angular, Entity Framework Core, SQL Server, LINQ, Web API Core, MVC, ASP.NET

**PROJECT: 3**

**Stock Trading:-** C# and MySQL

This project, developed in C#, is a paper trading application that enables users to learn trading without the risk of actual investment or fear of financial loss.

**Certificates:****Cisco Networking Academy:**

- 1) Introduction to Cyber Security
- 2) Cyber Security Essentials
- 3) Dot Net Full Stack Development from Naresh It Hyderabad

**Personal Details:-**

Name: Nikhil Santaram Helale

Date of Birth: 27 January 2001

Nationality: Indian

Language known: English, Marathi, Hindi.
