PROFESSIONAL SUMMARY:

- Dedicated and Skilled Robot Framework and Python Automation Engineer with 2.11 years of Experience with proven expertise in designing, developing, and implementing automation solutions to enhance operational efficiency and streamline business processes.
- Collaborating with cross-functional teams, understanding complex business requirements, and translating them into effective automation solutions.
- Proven track record of successfully delivering high-impact automation projects, improving accuracy, reducing errors, and significantly increasing productivity. Strong analytical mindset, problem-solving skills, and a commitment to continuous learning in the dynamic field of Robot Framework and Python
- Trained and mentored junior team members on automation techniques and best practices to enhance their skills and productivity.
- Conducted engaging and informative demos to clients, showcasing the capabilities and benefits of automation solutions tailored to their specific needs.
- Successfully implemented internal automation initiatives to improve internal processes, resulting in increased efficiency and reduced manual efforts.

KEY DOMAIN AND TECHNICAL KNOWLEDGE:

- o **Domain : Banking**
- o **Technical Skills :**
 - Automation – Robot framework(RPA), Appium
 - Programming Languages –**Python**, Basic Java
 - Manual Testing -Functional and Non-Functional Testing, Regression Testing, Smoke Testing, User Acceptance Testing, Performance Testing, Security Testing, Hybrid and Native Application Testing
 - Methodology – AGILE Model
 - Web Automation – **Robot Framework(RPA), Selenium BDD, TestNG**
 - Mobile Automation – Appium, Android Studio
 - Desktop Automation
 - Databases – MySQL, Mango DB
 - MS Office – MS Word, MS Power Point, MS Excel
 - Tools Used –RPA, Bugzilla, Redmine, VS Code, PyCharm, JMeter
 - Operating Systems known – WINDOWS 10/11
 - Flexcube 12 (Core Banking System)

EXPERIENCE:

Senior Automation Test Engineer		Sirma Business Consulting India Pvt Ltd (Jan 2021 to Present)
Clients	:	Muthoot Finance
Project	:	Personal Loan Automation (Dec 2022 to Feb 2023)
Description	:	Automation is to provide seamless data entry and checks before providing the loan to the customer. Scripts will check for the customer data like name, salary, and many other fields and based on the rules it will process further.
Technologies	:	Python, Robot Framework
Responsibilities	:	Successfully designed and implemented end-to-end process automation solutions using Robot Framework in the client system, resulting in increased operational efficiency and cost savings.

- Collaborated closely with clients to identify automation opportunities and gather requirements, ensuring alignment with their business objectives and process improvements.
- Developed custom Robot Framework libraries and keywords to interact with the client's applications and systems, enabling seamless automation of complex processes.
- Implemented data-driven automation scripts, allowing for easy scalability and adaptability to handle varying data inputs and scenarios.
- Provided regular status updates to the client stakeholders, fostering effective communication, and ensuring transparency throughout the automation project lifecycle.

Clients : **Muthoot Finance**
Project : **Small Business Loan Automation** : (May 2023 to July 2023)
Description : Automation is to provide seamless data entry and checks before providing the loan to the customer. Scripts will check for the customer data like name, Account Number, Amount, and many other fields and based on the rules it will process further.

Technologies : Python, Robot Framework
Responsibilities : Successfully designed and implemented end-to-end process automation solutions using Robot Framework in the client system, resulting in increased operational efficiency and cost savings.

- Collaborated closely with clients to identify automation opportunities and gather requirements, ensuring alignment with their business objectives and process improvements.
- Developed custom Robot Framework libraries and keywords to interact with the client's applications and systems, enabling seamless automation of complex processes.
- Implemented data-driven automation scripts, allowing for easy scalability and adaptability to handle varying data inputs and scenarios.
- Provided regular status updates to the client stakeholders, fostering effective communication, and ensuring transparency throughout the automation project lifecycle.

Clients : **TECU Credit Union**
Project : **Member Onboarding banking Automation** (Feb 2023 to April 2023)
Description : TECU Credit Union is a credit union organization like a bank, all the operations performed the same as bank .Where they have a requirement to digital onboarding through web and mobile applications to create an account.

Technologies : Python, Robot Framework
Responsibilities : Primarily Responsible for end-to-end testing which includes manual and Automation, unit, and regression testing. Test Case Creation, Execution and Defect reporting and tracking in Quality Center

- Participating in Stand-up meetings, peer-to-peer reviews, Business Rules discussion with offsite BA
- Responsible for preparation of test cases, documentations, and end to end manual and automation testing via Robot Framework.
- in support for ITR, UAT, SIT and Production phases.

Clients : **TECU Credit Union**
Project : **Impacto Digi App (Mobile Banking) Automation** (Sept 2022 to Nav 2022)
Description : Its Safe and Secure banking application, it is convenient way to access your account, transfer amount, pay bills, link to other bank accounts and fixed deposits.

Technologies : Python, Robot Framework, Appium, Ui Automator
Responsibilities : Primarily Responsible for end-to-end testing which includes manual and Automation, unit and regression testing. Test Case Creation, Execution and Defect reporting and tracking in Quality Center

- Participating in Stand-up meetings, peer-to-peer reviews, Business Rules discussion with offsite BA
- Responsible for preparation of test cases, documentations, and end to end manual and

- automation testing via Robot Framework.
- Responsible for Design Specification and Unit Test Cases Documents as per the Client Test Case and per the Functional Specification Documents.
- Involved in support for ITR, UAT, SIT and Production phases.

Clients	: TECU Credit Union	
Project	Flexcube EOD Process Automation:	(May 2021 to Sept 2022)
Technologies	: Python, Robot Framework	
Description	: The End of Day (EOD) process in banks is a critical daily routine that marks the closure of business operations for the day and prepares the bank for the next day's transactions. It involves unauthorized records are pre checks before proceeding for EOD process.	
Responsibilities	: - Designed and developed an End of Day Authorization automation process using Robot Framework, resulting in a significant reduction in manual efforts and processing time. - Collaborated with stakeholders to gather EOD process requirements, analyzed existing workflows, and identified automation opportunities to streamline the EOD process. - Involved in support for ITR, UAT, SIT and Production phases.	
Project	: iBorg Automation Tool	(Feb 2021 to Present)
Description	: iBorg is an automation tool which provide the robotic process automation and robotic test automation using python and robot framework	
Responsibilities	: - Collaborated with development teams to report and track defects found during the automation tool testing process, facilitating prompt resolution and improvements. - Assisted in the customization and configuration of automation tools to suit specific project requirements and optimize their performance. - Contributed to the enhancements of the tool by adding features like web recorder and desktop recorder. - Enhanced the iBorg framework template. - Assisted in the training of team members on using automation tools, sharing knowledge, and promoting efficient use of the tools in the organization.	
Internal Projects	: - Employee Productivity Tracking Automation - Project Status report Automation - Fraud Detection - Desktop Automation for flexcube Patch set - LinkedIn Automation	

EDUCATIONAL DETAILS:

- B.E. in Mechanical Engineering from Shridevi Institute of Technology **Mangalore (VTU)** with 7.5 CGPA (2015-2019)

DECLARATION:

All the particulars furnished above are true to the best of my knowledge. Testimonials in support will be presented as and when required.

Date : 25 Nov 2023
Place : Bangalore
