

Nisarga S

Software Engineer

EXPERIENCE

Software Engineer
Relevance Lab
07/2023 - Present

- Developed and implemented Retrieval-Augmented Generation (RAG) techniques for document question answering, improving accuracy by 30%.
- Analyzed annual reports data and generated insights to enhance the question-answering model, reducing response time by 20%.
- Built a RAG pipeline supporting various user input formats (PDF, DOCX, PPT, Word).Collaborated with cross-functional team members to complete the project on annual report question answering successfully.
- Developed an advanced RAG technique to enhance model responses for better performance.Implemented reranking, content compression, and the HyDE technique to improve retrieval effectiveness.

Personal Projects:

- Invoice Extractor

Built a simple Streamlit app to extract key information from invoices.Generated summaries and performed invoice analysis.

- Generative AI with AWS Bedrock

Developed a Generative AI application leveraging AWS Bedrock for content creation and summarization. Integrated foundation models like Amazon Titan to generate high-quality text.

Graduate Enginner Trainee
Relevance Lab
03/2022 - 07/2023

- Managed AWS environments with CloudWatch for high availability and performance.
- Deployed applications to Azure using ARM templates
- Implemented Azure Active Directory and configured Single Sign-On (SSO) solutions for enterprise applications.
- Created custom roles in Azure AD for managing user and group access across multiple subscriptions.Set up AWS IAM roles and policies for secure access control.

SKILLS

Prompt Engineering
Natural Language Processing
Large Language Model
Open AI
Azure
AWS
Langchain
Streamlit
Python
Mongo DB

EDUCATION

Electronics and Communication Engg
PES University
08/2018 - 04/2021
Bachelor's Degree

CERTIFICATES

AWS Certified AI Practitioner
09/2024 - Present

AWS SOLUTIONS ARCHITECT ASSOCIATE
01/2022 - 01/2025
