

Nishan Anand

Bangalore, India | +91 8904885432 | singh17nishan@gmail.com | [LinkedIn Profile](#)

Professional Summary

Dynamic and detail-oriented **QA Engineer** with over **6 years** of experience in **software testing**, specializing in both **manual** and **automated testing**. Skilled in **functional**, **non-functional**, and **API testing**, with extensive knowledge of **SDLC**, **STLC**, and market-leading **automation tools**. Proven ability to improve **product quality**, ensuring robust and reliable **software releases**. Experienced in **team leadership**, **test documentation**, and **cross-functional collaboration**.

Technical Skills

- **Testing Types:** Functional Testing, Non-functional Testing, Regression Testing, Smoke Testing, Performance Testing, User Acceptance Testing (UAT), Cross-Browser Testing, Device Testing, Integration Testing, Database Testing and API Integration testing.
- **Automation & Tools:** Postman (API Testing), JMeter, Katalon Studio, Tosca (Certified), BlazeMeter, Dynatrace, TestProject
- **Programming & Scripting:** SQL, RazorSQL, PostgreSQL, MySQL, DynamoDB
- **Test Management:** Jira, O3, AIO, ZOHO
- **Operating Systems:** Windows (98/XP/2000/7/10), iOS
- **Other Tools:** GenAI, ChatGPT, Gemini (AI tools)

Professional Experience

Senior Member of Technical Staff

Aqueralabs India Pvt Ltd —Bangalore | August 2022 - Present

- Designed and implemented QA processes to improve software reliability, reducing defect rates by 20%.
- Led the API and Performance testing initiative, using Postman and JMeter to automate test cases and analyze API and load performance.
- Collaborated on cross-functional projects with developers and product managers to address integration issues.
- Generated automated test reports in Jira and tracked defects across environments to optimize regression testing cycles.

Senior QA Engineer

McAfee Enterprise (Trellix) —Bangalore | May 2021 - July 2022

- Conducted full application testing, covering smoke, sanity, and UAT phases to ensure release-readiness.
- Automated test scenarios for complex workflows, reducing test execution time by 30%.
- Created detailed test plans and documentation, ensuring comprehensive test coverage across functional modules.

QA Engineer

Simpliance (Quess Corp) —Bangalore | July 2020 - April 2021

- Wrote and executed test cases for compliance and audit applications, focusing on functional and regression testing.
- Conducted onsite UAT at client locations, providing valuable feedback to development teams for improvements.

QA Engineer

AIE Software India Pvt Ltd —Bangalore | March 2019 - May 2020

- Performed cross-browser testing and mobile testing, improving the application's usability across devices.

- Led database testing efforts, ensuring accurate data representation across the UI and database.

Software Test Engineer

IRCA India Pvt. Ltd —Bangalore | June 2018 - January 2019

- Developed and maintained automation scripts, enhancing test accuracy and execution speed.
- Validated product functionality, conducting scenario-based testing to cover edge cases.

Education

- **Bachelor of Engineering (B.E.) in Computer Science**
Visvesvaraya Technological University | 2016

Certifications

- **Automation Specialist-1 (Tricentis Tosca)**
- **Performance Testing with JMeter**
- **GenAI and AI Tools (ChatGPT, Gemini)**

Projects

Aquera Integration Platform

- Worked on Aquera's SaaS-based platform for integrating cloud-based and on-premise applications with identity and HR systems.
- Conducted API testing with Postman and functional testing to ensure seamless data integration across systems.
- Performed performance testing using JMeter to validate scalability and efficiency under varying loads.
- Leveraged AI-powered tools to streamline test cycles, enhance defect tracking, and improve regression testing accuracy.
- Collaborated with cross-functional teams to execute UAT and deliver a high-performance solution.

Orchestration and Workflow Integration

- Conducted functional and API testing to validate integration processes between various connectors and ensure seamless data flow.
- Tested standard schema attributes and OpenAPI implementations, allowing users to map custom attributes effectively.
- Collaborated with cross-functional teams to refine workflow processes and improve overall system efficiency.
- Engaged in performance testing to assess scalability and robustness of the integration framework.
- Documented test cases and results, maintaining comprehensive records for compliance and quality assurance.

McAfee Separation (Trellix)

- Participated in McAfee's rebranding and separation process into Trellix, focusing on cybersecurity.
- Executed end-to-end functional, performance, and API testing using Postman and JMeter to maintain quality and functionality during the transition.
- Applied AI tools to optimize regression testing and defect identification, ensuring seamless functionality post-migration.

S.E.A.L. – Automated Compliance Platform

- Contributed to the development of India's first automated compliance platform for labor laws, integrating acts, rules, notifications, and wages data.
- Conducted functional, cross-browser, and device testing to ensure platform consistency across diverse environments.
- Utilized Katalon Studio for automated test scripts and JMeter for performance testing to validate platform stability under heavy usage.
- Employed AI-driven tools during STLC phases to streamline test case management and reporting.

Terminix - Expert pPest Control: Extermination and Treatment services

- Conducted functional and API testing using Postman to validate application features and backend services.
- Performed load and performance testing with JMeter to ensure scalability during peak traffic.
- Executed regression testing to maintain quality and functionality across updates.
- Conducted cross-browser and device testing to ensure consistent user experience.
- Managed defect tracking and reporting in Jira, facilitating efficient issue resolution.
- Collaborated with development teams to enhance functionality and user experience.

ICMS (integrated club management system)

- Contributed to the development and testing of ICMS, a centralized solution for club management.
- Performed on-site UAT at Garware Club House in Mumbai and Mahabaleshwar Club, ensuring features met client requirements.
- Conducted comprehensive functional and integration testing to identify and resolve issues, supporting high-traffic environments.

Key Achievements

- Improved test execution efficiency by 40% through automation and streamlined test cycles.
- Recognized for consistently delivering high-quality releases with minimal critical defects.
