EDUCATION

Course	College / University	Year	CGPA / %
B.Tech (CSE)	Guru Gobind Singh Indraprastha University	2024	8.56
HSC (Class XII)	Rajkiya Pratibha Vikas Vidyalaya Kishan Ganj	2020	90%

WORK EXPERIENCE

- **Software Engineer L1 | Shipy | Gurugram, India** **July 2024 - Present**
 - Developed the Electronic Proof of Delivery (EPOD) system by implementing DRS image extraction and base64 Url handling from the API, enabling sellers and end users to view recipient signatures on the DRS alongside electronic invoices.
 - Developed API for Global Pickup Scan, allowing riders to scan consignments, automatically adding them to the pickup task list in the database, which increased efficiency by 20%.
 - Developed the integration of an Optical Character Recognition (OCR API) for automated address label processing, incorporating validation, error logging, and retry mechanisms to improve data accuracy and minimize manual intervention.
 - Engaged in code reviews and cross-functional collaboration to ensure high-quality deliverables.
- **Blockchain Intern | AZ Alpha Tech Pvt Ltd (BlockDudes) | Faridabad, India** **March 2024 - June 2024**
 - Developed a Chrome extension to identify Honeypot tokens using the Honeypot API, increasing user security against scams.
 - Created a Telegram bot facilitating wallet creation, token swaps, and Honeypot checks, improving user engagement.
- **Web Development Intern | PHN Technology Pvt Ltd | Remote** **April 2023 - June 2023**
 - Built front-end interfaces for applications including a Hotel Table Booking Form, College Website, and Community Website, increasing user satisfaction.

PERSONAL PROJECTS

- **Advancing Algorithm Tracing and Visualization** **July 2023 - Dec 2023**
 - Developed Interactive Sorting Algorithm Visualizations: Spearheaded the Sorting section in a collaborative project, implementing step-by-step visuals for Bubble Sort, Insertion Sort, Selection Sort, Merge Sort, and Quick Sort to enhance user understanding through interactive animations.
 - Collaborated in building an engaging educational resource that visualized key sorting algorithms; contributed specific features that increased student retention rates during workshops focused on core computer science concepts by 30%.
 - Deployed Link: <https://be-learner.netlify.app/>
- **University Information App** **Sept 2023**
 - Developed in Java, this app utilizes Retrofit for API communication, RecyclerView for dynamic data presentation, and SQLite for local storage.
 - Features a WebView for web content display and a Foreground Service for seamless background operation.
 - Github Link: github.com/seppm-nishant/android_university_app

SKILLS

- **Tech Stack** : Java, JavaScript(NodeJS), TypeScript, Solidity, MySQL
- **Tools** : Git, GitHub, VS Code, Postman, Jenkins, ElasticSearch

ACHIEVEMENTS

- **Awarded Star Performer of the Quarter** **July 2024 - Sep 2024**
- **CM Delhi Merit-cum-Means Scholarship** **2021 - 2023**
- **Youth Parliament Award from Govt. of India** **April 2018**
- **National Means cum Merit Scholarship Scheme Exam (NMMS)** **2015 - 2016**
