## COMPUTER SCIENCE ENGINEERING GRADUATE

I am a recent graduate with a degree in computer science and a strong passion for software development. I am willing to provide my efficiency to the fullest in the professional environment wherever I serve my duties, which will help me discover my true potential. I am highly motivated, a quick learner, and have a solid understanding of data structures and algorithms. I look forward to contributing to innovative software projects while continuously expanding my technical skills.

---

## TECHNICAL SKILLS

- JAVA
- JAVASCRIPT
- SQL
- HTML/CSS
- PYTHON
- C/C++

---

## PROJECTS

### DIABETES PREDICTION USING MACHINE LEARNING LANGUAGES.

AUG 2022 - NOV 2022

- Developed a machine learning model to predict the likelihood of diabetes in individuals based on their health metrics. Leveraged a dataset containing features such as glucose levels, blood pressure, BMI, age, and other relevant parameters. Implemented preprocessing techniques including handling missing values, scaling numerical features, and encoding categorical variables. Explored various classification algorithms including logistic regression, decision trees, and random forests to identify the most accurate predictive model.

### UNIVERSAL ROBUST DOMAIN ADAPTATION FOR REMOTE SENSING IMAGE CLASSIFICATION USING DEEP OPTIMIZED TRANSFER LEARNING.

JAN 2023 - MAY 2023

- Led a research project focused on developing a universal robust domain adaptation framework for enhancing the performance of remote sensing image analysis tasks across diverse environmental conditions. Leveraged deep learning techniques and transfer learning methodologies to address domain shift challenges inherent in remote sensing applications. Investigated the effectiveness of domain adaptation techniques in adapting pre-trained deep neural network models to new target domains while minimizing performance degradation.

### EASY OCR USING PYTHON IMAGE EXTRACTION.

SEPT 2022 - OCT 2022

- Developed a simple yet effective Optical Character Recognition (OCR) application using Python for extracting text from images. Leveraged popular OCR libraries and image processing techniques to build a user-friendly tool capable of accurately recognizing text from various sources such as scanned documents, images, and screenshots. Designed the application with a focus on simplicity, efficiency, and ease of use, making it accessible to users with minimal technical expertise.

---

## EDUCATION & CERTIFICATIONS

B.TECH

Majors: COMPUTER SCIENCE ENGINEERING

SRM UNIVERSITY RAMAPURAM CGPA 8.6

- Obtained certification from L&T Constructions for a Mini Project which was developed during my internship period.
- JAVA PROGRAMMING BEGINNER TO MASTER” certification from UDEMY
- “ULTIMATE MYSQL BOOTCAMP GO FROM SQL BEGINNER TO EXPERT” certification from UDEMY

---

## HOBBIES/INTERESTS

CRICKET | TRAVELLING | COOKING

## ACHIEVEMENTS

SRM MILAN 2019

Actively participated and organized several Technical and Non Technical events.

SPORTS

Secured second place in Shortput and Disc throw in an Interschool Competition held during 2019.

ABHIGYAN 2019

ctively participated in the technical workshops of Python & Arduino.
