Phone No: +918795765413 / 9369509852

Address: Kanpur Nagar, Uttar Pradesh, 208001

Objective

Looking for a challenging role as a Data Engineer where I can use my technical skills to create innovative solutions.

Professional Summary

- I have worked as a **Data Engineer** with **Tech Mahindra, Noida**.
- I have worked as a **Snowflake Developer** to migrate data to Teradata objects (Tables, Views) and scripts (Procedures, BTEQ) TO snowflake compatible.
- Having a good understanding of Snowflake utilities like Snowpipe, stored procedure, time travel, Stages.
- Ability to write SQL queries against Snowflake.
- Worked as a Snowflake Developer in Data Migration with expertise in Snowflake, SQL, GIT, Azure, TWS (Tivoli Workload Scheduler) and ETL.
- Experienced with Snowflake advanced features like zero copy cloning, time travel/failsafe, Snowpipe, Data sharing, SnowSQL SCD.
- Expertise in converting source logic from Teradata/Vertica to Snowflake, utilizing SnowSQL for seamless Migration of data.
- Experienced with Teradata database and utilities such as SQL, Procedures, BTEQ, FASTLOAD, MULTILoad.
- Worked on various phases of this project such as, Analysis, Development, Testing, Deployment, Production validation and Fixes, Jobs monitoring and catch ups and table handover. Hands on experience in various big data application phases like data ingestion, processing, analytics.
- Experience in migration and load data from Azure ADF bucket to Snowflake Warehouse.

Technical Skills

Cloud:	Snowflake, Snowpipe (AWS), Microsoft Azure (ADF)
Language:	Python.
Database:	MySQL,
Scripting Language:	Shell Scripting,
Platforms:	Windows

Personal Skills

- Eager to learn new things.
- Can work smart, as well as hard, and very flexible.
- Good management skills.
- Leadership skills.
- Problem solving/Creative.

Work Experience

Project : Moving Data in Snowflake

Role: Snowflake Developer

TechMahindra, NSEZ, Noida.

Technologies:

Snowflake, Teradata, Putty, Matillion, SQL, Azure(Databricks, Data Factory), Python , PySpark, ETL, SnowSQL, Stored Procedure, Trigger, View, CTE, VMware.

Description:

In this project we migrate data into snowflake warehouse. I have worked in ETL process consisting of Data extraction, data cleaning, data transformation, data sourcing, data mapping, conversion and loading. Sometimes we create snowpipe for ingesting data. We also created some dim and facts using merge statement to process data. Created sql statement we put into matillion ETL tool to process. Also we maintain audit metrics to capture DML operations of data. Also we have created roll back plan where we use snowflake time travel. And also managing the production deployment for migrating the tables through planned release.

Roles & Responsibilities:

- Hands on work Experienced in Snowflake with Perform data validation.
- Read data from files and load into snowflake
- I have worked as Snowflake Developer where I'm responsible to move raw data from Azure Blob to Snowflake (end to end).
- Worked on various phases of this project such as, Analysis, Development, Testing, Deployment, Production validation and Fixes, Jobs monitoring and catch ups and table handover.
- Experienced in the creation of user roles, database objects, warehouse, loading and querying data in Snowflake cloud data warehouse.
- Creating dim and facts table using merge statement and call it from matillion.
- Create Rollback plan after creating new tables in snowflake and maintain audit metrics table.
- Worked on Migrating On-Premises tables to Snowflake Database by using Azure ADLS Container for storage.
- Worked on various phases of this project such as, Analysis, Development, Testing, Deployment, Production validation and Fixes, Jobs monitoring and catch ups and table handover.

Academic Project

Project Name: IOT based fingerprint door lock system

Project Duration: 6 month

Team Size: 5 **Project Details:** A Fingerprint based Door lock System for security purpose.

Extra Curricular

- Won the “ACADEMIC EXCELLENCE AWARD” for Outstanding and Consistent Academic Performance.
- Participated in “Embedded System Using MSP430” organized by Texas Instruments University Program.
- Participated in Robo Race in College Annual Fest “EXUBERANCE18” Organized by AllenHouse Group of Colleges, Kanpur and acquired " 1st Position".

Course Certification

- Done Certification Course in Hand On Essentials – Data warehouse from SNOWFLAKE.
- Done Certification Course in Microsoft Certified Azure Fundamentals from MICROSOFT.
- Done Certification Course in Build with Amazon MemoryDB for redis from AWS.
- Done Certification Course in Deep Learning and Machine Learning from MATHWORK.
- Done Certification Course in Bigdata from Digital Vidya powered by NASSCOM.

Educational Background

- **Bachelor of Engineering in Electrical Engineering**, from **AXIS** Colleges, Kanpur with an aggregate of 78.80% in the year 2020.
- **HSC(12th)** from SVB Inter college, Muiya Kanpur with 66.00% in the year 2016.
- **SCC (10th)**, from AK Inter college, Kotra Kanpur with 72.46% in the year 2014.

Journal Publication

Published a Paper in International Journal of Engineering & Technology (IRJET) having ISSN no 2395-0056 titled "Arduino Based Garbage Monitoring System using IOT ".

Hobbies

Gardening, social work, Surfing Internet.

Personal Information

Date of Birth	15th July 1998
Languages Known	English, Hindi
Passport	Yes (V2685403)
Nationality	Indian
Marital Status	Single

I hereby declare that all the information mentioned above is true and to the best of my knowledge.

Date:

Place: Kanpur
