Javascript

HTML

CSS

RECENT PROJECTS

Console Management Project - Ecommerce

- Collaborated closely with UX teams to integrate human-factor principles into the application design, enhancing user satisfaction by 25%.
- Implemented future toggle to adapt blue-green deployment for our e-commerce site.
- Managed brand consistency throughout the design and maintained & improved the company's website by adding more features and functionality.
- Championed the Agile SCRUM methodology, reducing the product's time to market by 15% while maintaining high code quality.

IEO Project

- Played a key role in improving code quality, enhancing user experience, and implementing the best practices for building scalable and maintainable frontend solutions.
- Implemented Deep link technology to interact between micro front end applications.
- Monitored and improved front-end performance by 15% and documented application changes & worked on updates.
- Optimized the performance by implementing lazy loading, structuring data communications and pipes.

SERINA Application

- Designed and developed responsive, mobile-optimized interfaces and websites aligned with user experience requirements.
- Implemented skeleton loading to improve the user visibility on checkout pages. Bundled our application in IIS for the intranet text of the application.
- Identified issues in the front end code and rectified them to remove bugs.
- Enhanced code maintainability by implementing efficient Github branching strategies, allowing for 20+ developers to work simultaneously without conflicts.

ACHIEVEMENTS

Earned golden badge in both problem solving and python language proficiency in HackerRank website.

Hackerrank profile: <https://www.hackerrank.com/profile/nivetharath>

Cleared the assessment for the skill PYTHON(Intermediate) in the HackerRank and scored 88.59 percentile in TechGig Python Skill analysis test.

Contributed to Twindle, open-source software that can convert the twitter's thread into various file formats.
