

Olivia Roy

Software Engineer

Bengaluru, Karnataka | oliviaroy0002@gmail.com | 9019196528 | LinkedIn | GitHub

EXPERIENCE

Junior Software Engineer, Intime Tec, Bengaluru, Karnataka June 2023 – July 2024

- Addressed 20+ bugs and 10+ stories in a significant Beta Re-release.
- Implemented Rest API's for new features of the firmware using Python and C++, adding unit tests for each.
- Reduced response time from the remote server (Qemu) by 30% by optimizing API calls and enhancing server processing efficiency.
- Delivered high-quality work under tight deadlines and completed sprint task on time, maintaining performance standards, by collaborating with cross-functional teams and managing work priorities efficiently.

Software Engineer Intern, Intime Tec, Bengaluru, Karnataka March 2023 – May 2023

- Gained a comprehensive understanding of advanced C++ and Python concepts in a Linux-based environment.
- Completed in-depth assignments to reinforce key concepts covered during the internship.
- Exhibited exceptional time management skills by efficiently multitasking to meet deadlines while maintaining high-quality work.
- Proactively contributed to deliverables and onboarded onto the project ahead of schedule, completing tasks before the internship's original timeline.

TECHNICAL SKILLS

Languages: C++, C, Java, Python, SQL

Frameworks and Database: Boost, Qt/Qml, Spring Boot, Hibernate, MySQL, PostgreSQL,

Structures and Version Control: Boost, Qt/Qml, Spring Boot, Hibernate, MySQL, PostgreSQL, Git, Bitbucket

Other Technologies: SQL, STL, Gtest/Gmock, OOPs, Data Structures and Algorithms, Multithreading, Socket Programming, SOLID Principle, Agile Methodology, JIRA, Qemu, Sonar, SDLC, Linux, Clean Coding

EDUCATION

- **AMC Engineering College, Visvesvaraya Technological University**, B.E. in Computer Science and Engineering 2019 – 2023
CGPA: 8.3/10
- **Jawahar Vidya Mandir, Shyamali**, High Secondary Education 2017 – 2019
Board: CBSE, Percentage: 75%
- **Loreto Convent School**, High School Education 2007 – 2017
Board: ICSE, Percentage: 92%

PROJECTS

Student-Course Enrollment Rest API GitHub Repository

- Developed a RESTful API to manage student-course relationships, enabling enrollment, retrieving, and management of data. Implemented validation measures and added unit tests to ensure proper functionality.
- Tools Used: Java Spring Boot, Hibernate, PostgreSQL, JUnit 5, Mockito

Music Player GitHub Repository

- Developed a robust console-based music player application, implementing essential functionalities including play, pause, resume, seek, and other related operations.
- Tools Used: C++, Gtest, GMock
