

PRAVEEN KUMAR THAKUR

Database Solution Architect PROFESSIONAL – 14+ years of experience

Database Solution Architect @
Hexaware Technologies | Oracle
|Hybrid Cloud | Cloud Native |
Automation | consulting | fintech |
Telecom | Retail |Health | Insurance |
Pharmacy | digital transformation |
banking technology

+91 9971784470/8076049734

praveenthakur.mca@gmail.com

Noida, Uttar Pradesh, India

Summary

Strategist, planner & technocrat with
experience in planning, executing &
spearheading **Database Management**
Projects across diversified locations with
skills in **Solution Architecture/Project**
Management Professional while
collaborating with different stakeholders

Core Competencies

- Solution Architecture
- Project Management
- Database Architecture
- Process Re-engineering
- Cloud Migration – Strategies & Implementations
- People Management
- Risk Management
- Strategy Formulation
- Client Relation Management
- Resource and Capacity Planning
- Compliance Management
- Escalation Management
- Release Management
- Incident and Change Management
- Oracle DBA
- MS SQL DBA
- PostgreSQL DBA
- Golden Gate Administration
- DB Migration
- Hybrid Cloud
- Cloud Native
- Automation & Digital Transformation
- Performance Tuning
- Requirement Gathering
- Disaster Recovery Solution
- Upgrade/Migration
- Risk Management
- Software Solution Development
- Project Delivery Management

Key Profile

- A Lead Infrastructure Architect with over 14+ years of rich experience in Database Architecture, Migration, Administration, Automation, Consulting, Stakeholder Engagement, Solution Design, Implementation, and Team Management
- Expertise in mapping business requirements and coordinating in developing and implementing processes in line with the pre-set guidelines
- Resourceful in providing leadership in Technical / Solution Architecture to facilitate and enable growth & business agility.
- A “take-charge” professional; hands-on expertise in recognizing central capabilities and illuminating operative objectives
- **Excellence** with a successful career chronicle in bringing initiative & resourcefulness while you balance vital responsibilities
- **Performance-driven approach** with excels in achieving maximum profitability of 100 % and success by controlling costs and quality of service
- Govern cross-functional initiatives with new process improvement and transformation opportunities in order to implement solutions effectively
- Transform & execute effective change/digital strategies ensuring higher team engagement with amplified outcomes
- Significant at leveraging industry best practices regarding tools and processes while implementing a continuous appropriate developmental program
- A **strategic leader** direct and execute a comprehensive enterprise-wide internal auditing strategy, function, and practice adhering to auditing standards and regulatory requirements
- **Ability to formulate functional strategies and specific objectives** for sub function and develops budget/policies to support the functional infrastructure
- **Exceptional mentoring skills** with distinguished capabilities in leading teams and developing plans, procedures & service standards for business excellence
- Distinctive experience with Oracle database administration and experience with Oracle Exadata, as well as in automation through scripting (Shell, PERL) and automation tools (Ansible, Terraform), etc., with the management of databases using Enterprise Manager Grid Control, and with utilizing workflow and management tools
- In-depth experience with Oracle database from release 8i to 19c and Oracle technologies RAC, Data guard, Goldengate, Oracle EXACC, proficient in database administration: upgrades, patching/configuration management, performance management, troubleshooting, analysis and capacity planning

Technical Purview

- **Database:** Oracle 9i/10g/11g/11gR2/12c/19c, MS SQL 2000/2005/2016 and PostgreSQL 12.13, MS SQL 2000/2005;
- **Platforms:** Sun Solaris, Red Hat Linux, HP UNIX, Window;
- **Cloud:** Microsoft Azure, AWS
- **Replication Tool:** CDC, Golden Gate, DTS Packages
- **Package:** MS Office Suite (Word, Excel & PowerPoint);
- **Change Management:** ServiceNow, BMC Remedy;
- **Tools & Utilities:** Putty, RMAN, EXP, IMP, DATAPUMP, winscp, SQL Developer, OEM, Precise, Tode;
- **Tuning Tools:** EXPLAIN PLAN, AUTOTRACE, ADDM, AWR, SQLT Advisor
- **Cloud Migration :** Oracle, PostgreSQL

Professional Experience

Technical Specialist (Database lead) | Hexaware Technology
Project- Magnati

May 2024 – Present

- Establishes database management systems, standards, guidelines and quality assurance for database deliverables, such as conceptual design, logical database, capacity planning.
- Drive and participate in various service excellence initiatives with Team management(5 Teams) / ramp up/ ramp down, skills retention, attrition management and appraisals
- Manage people performance, skills, motivation and growth with delivery of Enterprise Operations team in coordination with App Support
- Collaborate with executive management and steering committees to update them on accomplishments, roadblocks and upcoming milestones on highly technical matters in business understandable language.
- Provide leadership in the areas of problem identification and resolution, answering questions and providing advice
- Adopt and promote Agile methodology to provide business continuous incremental functionalities via sprints.

- Strategy Formulation
 - Client Relation Management
 - Vendor Management
 - Data Acquisition & Modelling
 - Data Audits
 - Disaster Recovery Solutions
 - Data Governance
 - Data Visualization
 - Team Management
 - ITIL
- Governed a team of 38+ Database, Cloud while collaborating with a large cross-functional team of business analysts, data stewards, DBAs, system admins and Project managers to ensure milestones and deliverables are meeting scheduled delivery dates within the allocated budget
 - Providing effort estimation of new coming work like Upgrade, Migration, etc
 - Handling escalation in both ways technically and management level
 - SPOC for all Database related issue
 - Conduct smooth KT & transition of project from out-going vendor
 - Database migration from on premise to Cloud
 - Attending Major Incident / technical escalations
 - Working on System, Database Performance Tuning
 - Coordinating with storage for long running and failed backup
 - Handling database refreshes/database cloning from prod to development and test database
 - Analyzing change requests;
 - Configuring Disaster Recovery Site
 - Approving and applying application changes
 - Managing Backup & Recovery; Server and Database Security related issue

Education

- MCA from SMU in 2012.
- CERTIFICATIONS:**
- OCA 12C
 - MCTS SQL Server 2005

Personal Details

- Date of Birth: 28/11/1987
- Address: Noida
- Languages Known: English,Hindi

Earlier Career Glimpse

AVP (Database Architect) AU Small Finance Bank,Jaipur	 Sept 2023 – May 2024
Associate Consultant (Team Lead) HCL Tech, Noida Project – SSBT	 Mar 2023 – Sep 2023
Assistant Consultant (Database Team Lead) TCS, Gurgaon Project - Altagas	 Jun 2021 – Mar 2023
Professional 2 DBA (Team LEAD Oracle DBA) DXC Technology,Noida Project - Telenor	 Dec 2019 – Jun 2021
LEAD DBA Tech Mahindra, Noida Project - AT&T SAPPHIRE DBA Team	 Apr 2019 – Dec 2019
Analyst Datacenter Service (Oracle DBA) Niit Technologies Ltd, Noida Project - SEI SWP Production Support	 Nov 2017 – Apr 2019
Sr. Software Engineer.(Oracle DBA) Birlasoft Ltd., Noida Project - Xerox	 Jan 2015 - Sep 2017
Database Trainer. High Technologies Solution, Delhi	 Dec 2012- Jan 2015
Oracle Database Administrator. ITC Ltd.,Gurgaon Project - Loyalty ITC Lrbd	 May 2010 – Nov 2012

Responsibilities throughout the Tenure:

- Database Migration strategies from on premise to cloud
- Cloud database migration solutions design
- Database Assessment and Remediation
- Gathering & understanding requirements of clients / consultants & other multiple business stakeholders
- Proving support in creating and maintaining all databases required for development, testing, education, and production usage
- Monitoring multiple projects from conceptualization and visualization to technology mapping and final execution; holding review meetings to monitor the progress of the project as per schedule/budgets
- Assisting in resolving database performance issues, Job failures, Sessions & diagnosing root causes
- Collaborating with end-users and department managers for capacity planning and development of long-term strategic goals for production databases
- Conducting ongoing tuning of the database instances
- Ensuring delivery and operations of database platforms, proper integration with other applications and systems
- Undertaking strategy planning and implementation which had an impact on technology direction for the division and business segment; managing workload and multiple priorities in a fast-paced environment
- Implementing security policies on different database systems with granting and revoking privileges to the users
- Evaluating and implementing SBU and SQLbacktrack backup and monitoring tools
- Establishing the needs of users and monitoring user access and security
- Monitoring performance and managing parameters to provide fast query responses to front-end users
- Mapping out the conceptual design for a planned database in outline
- Considering both back-end organization of data and front-end accessibility for end-users
- Refining the logical design so that it can be translated into a specific data model.
- Migrating databases from on-premise to the cloud and managing them.
- Following change management processes and participating in related meetings
- working with the Infrastructure Management System’s Pre-Sales Team to support RFPs/Bids to create client proposals.

- Increased customer satisfaction through analysis of staffing and skill gaps
- Coordinates closely with Resource Managers and Product Managers to plan a deliverable's execution, while taking responsibility for planning the management of scope, costs, and schedule.
- Increased customer satisfaction through analysis of staffing and skill gaps

PLEASE REFER ANNEXURE FOR PROJECTS DETAIL

Annexure

AU Small Finance Bank

Project Title: Center of Excellence

Period: Since Sept'23 – May'24

Platform: Azure Cloud

Responsibilities: Database Clod Architect

- Design and architect cloud-based database solutions using platforms such as Azure Cloud. Determine the appropriate database services based on business requirements.
- Design scalable and elastic database architectures that can handle varying workloads and data volumes. Implement auto-scaling, sharding, partitioning, and distributed database strategies to ensure performance and efficiency.
- Design and implement high availability (HA) and disaster recovery (DR) solutions for cloud databases. Utilize features like multi-zone deployments, database replication, failover mechanisms, and backup/restore capabilities to ensure data availability and integrity.
- Optimize database performance in the cloud by tuning configurations, indexing strategies, caching mechanisms, and query optimization. Monitor performance metrics and use cloud-native tools for performance analysis and troubleshooting.
- Implement robust security measures for cloud databases, including encryption at rest and in transit, access controls, identity management, and auditing. Ensure compliance with data protection regulations and industry standards.
- Design cost-effective database solutions in the cloud by leveraging managed services, reserved instances, resource tagging, and cost-monitoring tools. Optimize resource utilization and scale resources based on actual demand to minimize costs.
- Establishes database management systems, standards, guidelines and quality assurance for database deliverables, such as conceptual design, logical database, capacity planning.
- Drive and participate in various service excellence initiatives with Team management(4 Teams) / ramp up/ ramp down, skills retention, attrition management and appraisals
- Manage people performance, skills, motivation and growth with delivery of Enterprise Operations team in coordination with App Support
- Collaborate with executive management and steering committees to update them on accomplishments, roadblocks and upcoming milestones on highly technical matters in business understandable language.
- Provide leadership in the areas of problem identification and resolution, answering questions and providing advice
- Adopt and promote Agile methodology to provide business continuous incremental functionalities via sprints.
- Governed a team of 30+ Database, Middleware, Cloud while collaborating with a large cross-functional team of business analysts, data stewards, DBAs, system admins and Project managers to ensure milestones and deliverables are meeting scheduled delivery dates within the allocated budget.
- Providing effort estimation of new coming work like Upgrade, Migration, etc
- Handling escalation in both ways technically and management level
- SPOC for all Oracle DB related issue
- Database migration from on premise to Cloud

HCL Technology Limited

Project Title: SSBT

Period: Since Mar'23 – Sept 24

Description: Production support operation from offshore

Platform: Oracle 19c database, Oracle 12c database, RAC, ASM, Golden Gate, Exadata, Linux

Client: State Street Bank and Trust Company, USA

Responsibilities: Senior Project Manager

- Handling a team for a wealth Platform.
- On-site/offshore coordination, client-vendor partnership handling.
- PPDP (Performance and Development) yearly and other development
- Guide the team both technically and management-wise.
- Create standard procedures to enhance the scalability and performance of existing database architecture.
- Troubleshoot complex database issues in an accurate and timely manner.
- Maintain database disaster recovery procedures to ensure continuous availability and speedy recovery.
- Supervise installation, migration, and upgrade of databases.
- Ensure that the database is developed according to business requirements.
- Prepare reports on database scalability and capacity planning as needed.
- Identify and resolve database issues related to performance and capacity.
- Oversee the day-to-day activities of the database team.
- Develop best practices for performance and operational efficiency.
- Ensure database management and maintenance tasks are performed effectively.
- Monitoring and Troubleshooting Golden Gate Replications issues.
- Used OEM in performing OLTP (Online Transaction Processing) to optimize inserts to the database as well as OLAP (Online Analytic Processing) to optimize and process the heavy-duty query and to see the trends and analysis of these queries.
- Inserts to the database and OLAP (Online Analytic Processing) to optimize and process heavy-duty queries and to see the trends and analysis of these queries.

Tata Consultancy Service (TCS)

Project Title: Altagas

Period: June'21 – Mar'23

Description: Production support for DBA operation from offshore (shift)

Platform: Oracle 19c database, RAC, ASM, Stream, AIX, Unix server

Responsibilities: Assistant Consultant (Database Team Lead)

- Handling a team to manage database operations for the aviation platform.
- Working directly with client to understand their need and requirement to provide appropriate solution as per the SLA.
- Providing effort estimation of new coming work like Upgrade, Migration, etc.
- Handling escalation in both ways technically and management level
- Migrating databases from on-premise to the cloud and managing them.
- Generated and analyzed AWR reports, ASH reports, ADDM reports, EXPLAIN PLAN, SQL TRACE, and TKPROF trace files to identify the root cause of SQL performance issues and utilize SPM SQL Baselines, SQL Profiles, SQL Access Advisor, and SQL Tuning Advisor for SQL troubleshooting and to provide tuning recommendations to applications teams.
- Refreshing Dev and Test instances with data from Production on a regular basis.
- Oracle Database 11g/12c/19c installation & configuration and maintenance on RH Linux/Azure.
- Resolved RAC issues, OCR-related issues, rebooting of faulty nodes, and relocated the switched-over services.
- Working with the Applications Development team to address any issues they encounter and provide support and resolution action plan.
- Involved in Client-Server environment configuration using TNSnames, LISTENER, Net Configurations Assistant, and other configuration files.
- Restoring database using Oracle Flashback Technology with the Guaranteed restore point
- Cloned/Migrated databases using RMAN and traditional Datapump export/import utilities in Oracle 19c databases.
- Worked with a team for installation and maintenance of ORACLE 19c RAC, ASM database for high availability.
- Monitored, troubleshoot, and tuned long-running jobs closely with the application development team using SQL TRACE, TKPROF, Explain Plan, TOAD, AWR, ADDM reports, and Dynamic performance views at peak load.
- Planned, tested, and implemented backup strategy using RMAN, Oracle Utilities (Export/Import) EXPDP.
- Performed Database replication from production to test/development environment using RMAN, data pump utilities, and manually.
- Strong skills in applying security patches CPU (Critical Patch Updates) / PSU (Patch Set Updates) using “run the installer” and Perl-based utility “opatch”.
- Implemented and maintained database security (Created and maintain users, roles and assign privileges)

- Experience and maintaining standby databases, switchover/ failover.
- Switch the database from Production to Testing and Testing to Production.
- Configuring Disaster Recovery Site – Dataguard.
- Golden Gate Implementation and Administration
- Managing Backup & Recovery; Server and Database Security related issue
- Logging SR and engaging Oracle for Technical Support.
- Approving and applying application changes.

DXC Technology Limited.

Project Title: Telenor

Duration: Dec'19 – June'21

Description Production support for DBA operation from offshore.

Platform: Oracle 12/19c, Linux Enterprise Server

Client: Telenor

Responsibilities: Professional 2 Database Administrator (Team Lead)

Tech Mahindra Limited.

Project Title: AT&T

Duration: April'19 – Dec'19

Description Production support for DBA operation from offshore .

Platform: Oracle 12/19c, Sun Solaris and Linux Enterprise Server

Client: Telenor

Responsibilities: Lead DBA

NIIT Technologies Limited

Project Title: SWP

Duration: Nov'17 – April'19

Description: Production support for DBA operation from offshore .

Platform: Oracle 12/19c, Sun Solaris and Linux Enterprise Server

Client: SEI Investments, USA

Responsibilities: Database Administrator

Birlasoft India Limited

Project Title: Xerox

Duration: Jan'15 – Sept'17

Description: Production support for DBA operation from offshore .

Platform: Oracle 11g/12c, Sun Solaris,AIX and Linux Enterprise Server

Client: XEROX

Responsibilities: Database Administrator

High Technologies Solution

Duration: Dec'12 – Jan'15

Description: Work as a oracle Database trainer .

Platform: Oracle 10g/11g Linux Enterprise Server

Responsibilities: Database Trainer

Project Title: Distributor Automation System (DAS)

Period: May'10 – Nov'12

Description: Production support for DBA operation

Platform: Oracle 8i/10g , MsSQL Server 2000, 2005, Windows 2003 Server

Responsibilities: Database Administrator
