INTRODUCTION

I have around 18+ years of IT experience in multiple domains and technologies. I have successfully performed multiple roles like Azure Architect, Senior DotNet Core backend developer (Microservices, Web API).

I have managed many UK/ Europe based customers at onsite and offshore with having excellent problem-solving skills in designing using different design pattern.

Role Performed

- ✓ Azure Cloud Architect.
- ✓ Onsite Lead managed offshore team.
- ✓ Azure with DotNet backend developer with hands-on.
- ✓ Customer Management
- ✓ Team Lead.
- ✓ Knowledge transition from customer and vendor.

CERTIFICATIONS

- ✓ Designing Microsoft Azure Infrastructure Solution (AZ-305).
- ✓ Certification done on Microsoft Certified: Azure Administrator Associate (AZ-104).
- ✓ Certification done on Oracle Certified Associate (OCA).
- ✓ Certification done on Microsoft Certified Professional.

Details Experience:

- ✓ Currently I am working as Azure Architect with hands-on in an insurance domain project for renowned South Africa customer and generating several business logic documents using GitHub Copilot – Claude Sonnet 3.7 module. Which will help migrating newly development project from legacy application to modern application using Visual Studio code, WebAPI, C#, AZURE. Open ID Connect, azure Function and more.
- ✓ Worked with customer to understand their issues to provide them better solutions as onsite Azure architect and managed offshore team and help them with hands-on coding using Visual Studio 2022, DotNet Core, Micro services with DDD design pattern, Azure logic app, Function Azure SQL Server, Entity Framework (DB first).
- ✓ I have worked as Service Delivery Manager for 1.2 yrs. and I was managing team for different applications and was part of knowledge transition of many applications from customers and 3rd party vendors and prepared DOUs and all dependents' backups. Helped team technically to resolve issue and monitoring issues in ServiceNow and assigned them to correct group and following up to meet the SLA. Even helped to setup teams to support all those applications. Working with application related customers and vendors to understand their issues to provide them better solutions.
- ✓ Have hands-on experience in AZURE with DotNet Web API DotNet with Azure services, in past I have also worked on AWS and CI/CD DevOps (Ansible Playbook writing) cloud and having hands-on development experience of various domain and on-prem to cloud application migration.

- ✓ Having more than 3 years of onsite experience to manage customer and was involved in transition base project and has managed offshore team from onsite.
- ✓ Having good experience in on-prem to cloud application migration in Azure/ AWS and managing customers.

SKILLS PROFILE

Cloud Platform/ Services used	Azure: APIM, Logic Function/ Durable Function, Service Bus, Storage services, App Services, App Registration, Entra ID, NSG, WAF, Application Gateway, Front Door, Express Route, Azure DevOps, Azure AI Foundation, Azure AI Defender, App Insight, Azure Runbook and many more. AWS: EC2/ VPC creation, Elastic Container Service (ECS), Simple Storage Service (ESS), Cloud9, Single Sign-On, Load Balancing, S3.
Design Pattern	Singleton, Façade, Factory, Composite (interface/ delegate), Repository
Architectural Pattern	Microservices, MVC, CQRS, DDD (Domain Driven Design),
Approaches/ Protocols	Scoped, Transient, OAuth, OpenID, OpenID Connect, User managed identity, Azure Active Directory, Single sign-on, JWT.
Version Management	Azure Repo, GitHub, TFS, VSS.
Language	C#, VB.Net, T-SQ, Python (learning).
Web Technologies	DotNet Core, Web API, VB.Net, MVC, ADO.NET, Silverlight, WCF, Classic ASP.
Dot Net Framework	Dot Net Framework 8.0, 4.5
Database	Cosmos DB, MS SQL Server 2012/ 2008, Oracle, DB2
Reporting Technology	SQL Server Reporting Service (SSRS), Crystal Report
Code Analysis Tools	Veracode, SonarQube, GitHub Copilot, ReSharper
Email Services	SendGrid, SMTP
Other Tools/ Languages	GitHub Copilot with VS Code, ServiceNow, MS Azure DevOps, RDP, Putty, JIRA, Toad, PL/SQL Developer, ALTAVA U-Model
Automation Testing tools	Selenium IDE/RC/Grid, WebDriver (2.0), Core Java, Eclipse (Galileo/ Helios), Auto IT, Sikuli, Maven, Check Style.
Automation	Ansible Playbook creation Cloud infrastructure, Azure DevOps/ Classic, GitHub to create repo branching, CI/CD pipeline, PowerShell,
Automation Testing Framework	Hybrid, Data driven, Keyword, Modular framework.

PROJECT DETAILS

Project Name	Sanlam Migration	Client	Renowned Insurance broker base customer – South Africa
Technology Used	DotNet, VS Code, GitHub Copilot, C#, Azure		
Description	This project is a migration project to convert legacy application to modernization in Azure. The customer is a very popular insurance company. They want to change the technology stack to latest one to and release their existing DMZ servers. For that I am working as Azure architect who is managing the business and managing the proper solution to the customer and working with team members. For getting legacy business logic from Cobol VS Code, I have decided to use GitHub copilot to extract existing business rules using Cloud Sonnet 3.7 which performs better performance for this and based on the criteria and		

	customer needs and requirements, after discussion with customer I have suggested to use Microservices with DDD approaches. And hosting that using and Azure DevOps to implement CI/CD pipeline to build and publish from one to other environments.
Responsibility	✓ Sprint planning and design the architectural diagram in Visio and get approval from customer. ✓ Preparing MoM, extracting business rules and creating HLD/ LLD. ✓ Planning and designing microservices architecture for team to start version management have used Azure repo with CI/CD. ✓ GitHub Copilot with VS Code. ✓ Creating task in Azure DevOps board for each sprint and planning, assigning to team members. ✓ Resolving customer issues and escalation if any.

Project Name	WTW	Client	Renowned Insurance broker base customer
Technology Used	MS Dot Net, VS 2022, Oracle, SQL Server, C#, Azure, ServiceNow		
Description	Willis Towers Watson plc, branded as WTW and stylised in its logo as WTW, is a British-American multinational company providing insurance services. This is a support base project as part of this project my responsibility is to get 40 application's KT from the customers and other vendors along with my team members. Also, I have involved in MoM, DoUs (document Of Understanding), and managing customers and team members. And my current role is Service Delivery Manager.		
Responsibility	✓ Taken KT to understand the existing application, their SLA, pick hour issues etc. ✓ Preparing MoM, DoUs preparation. ✓ Managing and assigning tickets in ServiceNow. ✓ Engaging different groups to resolve if any issues are stuck to minimise SLA breeze.		

Project Name	MyLeo Refactoring	Client	ING Bank (Global Netherlands (On-Site))
Technology Used	MS Dot Net, VS 2022, Oracle, C#, Web API		
Description	MyLeo is a rewarding application for internal employee of Very popular bank, which was developed long years back. And As per the new requirement, customer wants to enhance and upgrade this application tech stack to new UI. For this We have to understood the business logic from the existing code base.		
Responsibility	✓ Current role is transition lead. ✓ Managing 4 team members in my team. ✓ Managing stand-up meetings. ✓ Understanding the existing knowledge from the current SMEs. ✓ Preparing document of understanding DoUs. ✓ Getting signoff for those DoUs from customers. ✓ Presenting demo to customer.		

Project Name	Rabo Bank (US) – API Enhancement	Client	Rabo Bank (US)
Technology Used	AZURE cloud, Azure Function, Azure Service Bus/ Queue, MS VS 2022, C#, Azure SQL Server, LINQ, Entity Framework		
Description	Rabo Bank – US is a renounce customer in banking domain, the project is to develop or enhancement APIs for transfer data from AFS to nCino system.		
Responsibility	• Working as Senior Azure cloud Developer		

	- Developing API/ microservices in VS 2022 and deploying them to Azure function. - Implementing JWT token base authentication.
--	---

Project Name	Qantas	Client	Airlines Of Australia
Technology Used	AZURE, MS Visual Studio 2019, SQL Server, DevOps.		
Description	Qantas is embarking on its next exciting chapter. This is Airline base projects to manage internal Airline of Australia. This is having several MS dot net applications to migrate to AWS cloud. Also restructure the on-prem code base using Veracode tool.		
Responsibility	- Authentication Proxy implementation to get user details to authenticating user login, using JWT Token (Pay Load) and Azure Graph API with existing Active Directory. - Implementing new features and fixing bugs in the existing applications. - Deployment and PR review in DevOps.		

Project Name	Eastdil	Client	Eastdil (US)
Technology Used	Azure (Function App, Key Volte, PAAS), MS Visual Studio 2019, SQL Server, DevOps.		
Description	Eastdil Secured is embarking on its next exciting chapter. Following the successful completion of our management-led recapitalization, in partnership with Temasek, a global investment company headquartered in Singapore, and certain institutional clients of Guggenheim Investments, Eastdil Secured is positioned to even better serve our clients in the ever-changing commercial real estate market. The project is to migrate on-premises 7 different applications to Azure Cloud in addition enhancing and fixing the applications features.		
Responsibility	- Authentication Proxy implementation to get user details to authenticating user login, using JWT Token (Pay Load) and Azure Graph API with existing Active Directory. - Implementing new features and fixing bugs in the existing applications. - Deployment and PR review in DevOps.		

Project Name	OTC (Order to Cash)	Client	SGS (Southern Graphics System), USA
Technology Used	MS Visual Studio, C#, SQL Server, LINQ, jQuery, Json.		
Description	This project is to make automation of internal business process of SGS VIPOR system, which is to handle national/ multi-company plant; This is the process of Invoicing from production orders that are entered locally at each plant. In this system there are 4 types of roles, CSR (Customer service representative), Local Pricing (LP), Corporate pricing (CP), and VIPOR Admin User. when work is submitted from the customer an order is entered into the production system CSR get the order and entering into the system, LP process those and CP generates tax/discount and send to Admin for approval.		
Responsibility	- c and verified by customer - Customer communication on daily basic in scrum meeting. - Implementation the requirement. - Sql Server objects creation like Stored procedure, Function, View, Link Server		

Project Name	FUND TRANSFER UNIT (FTU)	Client	Renowned Bank
Technology Used	MS Dot Net Windows Forms, C#, SQL Server, WCF Services.		
Description	The FTU solution will provide the functional framework/process for all the section of the document tracking with the necessary validation, workflow, the interface and reports for the corresponding modules.		

	The main objective for building this solution is to provide a comprehensive platform which facilitates the verification and document tracking for the registered eFlowINCICash transactions and the standalone transaction in the document tracking system. By using this solution, it will enhance the potential of eFlowINCICash Application. There was total twelve products in FTU solution out of which, five are major products viz. ECB (External Commercial Borrowing), FDI (Foreign Direct Investment), FC-TRS, ODI (Overseas Direct Investment), LRS (Liberalized Remittance Scheme).
Responsibility	- Requirement analysis and Functional Requirement Document preparation. - User interface creation and database designing. - Customer communication on daily basic. - Development – Presentation logic and Business logic.

Project Name	BPost – Azure Cloud Migration	Client	Europe based Post of (On-Site at Belgaum)
Technology Used	Azure (IaaS), MS Visual Studio, ASP.Net, SQL Server, Azure Load Balancing.		
Description	Bpost, also known as the Belgian Post Group, is the Belgian company responsible for the delivery of national and international mail. The Belgian Post Group is one of the largest civilian employers in Belgium. It provides a range of postal, courier, direct marketing, banking, insurance, and electronic services in a highly competitive European market. This project is to migrate several internal and external application related to their business to Azure cloud.		
Responsibility	- Deployed Azure IaaS virtual machines (VMs) and Cloud services (PaaS role instances) into secure VNet and Subnet. Subnet. - Exposed Virtual machines and cloud services in the VNet to the Internet using Azure External Load Balancer. - Migrate web applications from on premises to Azure Cloud Azure AD migration from the existing Active Directory.		

Project Name	Brail – Azure Cloud Migration	Client	Europe Railway (On-Site - Belgaum)
Technology Used	Azure (IaaS), Azure (PaaS), VM and NSG creation, Azure AD, MS Visual Studio, ASP.Net, SQL Server.		
Description	Bpost, also known as the Belgian Post Group, is the Belgian company responsible for the delivery of national and international mail. The Belgian Post Group is one of the largest civilian employers in Belgium. It provides a range of postal, courier, direct marketing, banking, insurance, and electronic services in a highly competitive European market. This project is to migrate several internal and external application related to their business to Azure cloud.		
Responsibility	- Preparing LLD and reviewed by customer. - Migrate on Premise applications to Azure IaaS and PaaS solution. - Full setup application to running in Azure cloud.		

CAREER PROFILE

Date/ Period	Organization	Role/ Designation
Sept-2014 To till date	Tata Consultancy Services	Associate Consultant (ASSOC)
June-2010 To Sept-2014	HCL Technologies Ltd	Lead Engineer
Dec-2008 To Jun-2010	CMC Ltd, A TATA Enterprise	Software Engineer
Sept-2007 To Nov-2008	ATSI Technology Solution India Private Ltd	Software Engineer
Oct-2006 To Sept-2007	Syscon Solution Pvt. Ltd	Software Developer

PERSONAL DETAILS

Designation	Associate Consultant (ASSOC)
Passport Number	P6758807
PAN No	ARUPB6855F
Location	Kolkata, WB, India.
Date of Birth	01-Jan-1980
Nationality	Indian
Sex	Male

Place: Kolkata

Date:

(Dipen Kumar Bhadra)
