EXPERIENCE

HCL Technologies, Chennai-Deputy Manager

June 2022- Till Present

HCL Technologies is an Indian multinational information technology services and consulting company headquartered in Noida. It is a subsidiary of HCL Enterprise. Originally a research and development division of HCL, it emerged as an independent company in 1991 when HCL entered into the software services business.

- Working as a Dev Lead and Automation Testing Developer with UiPath Test Suite
- Involved in all phases of RPA life cycle and giving training to freshers also.
- Helping developers in terms of logical doubts as well as helping developers to provide better solutions.
- Involved in all meetings with business as well as updating all process stages to business as well as higher leads.
- Connecting with other UiPath projects to check reusable code availability.
- Conducting scrum calls with developers at the start of the day as well as EOD status as well.
- Developed Test cases in UiPath Test Suite. Executing the Test cases and sharing the results with Everyone.
- Creating Bugs in case of any failure in Testing.
- Working as a developer in Testing of Java Application (CaRes).

Legato Health Technologies, Bangalore — Senior Software Developer

December 2019- June 2022

Legato is a subsidiary of Anthem Inc., Legato Health Technologies is committed to transforming healthcare through operational excellence, innovation and digital transformation.

- Involved in all Phases of RPA-Process Understanding, Documenting the Process, Development and Code Review, Test, Release.
- Understand As-Is Process map from PDD-Process Definition Document (PDD)
- Designed to-Be Process Map and prepared SDD- solution Design document and DSD-Developments specifications Document.
- After each component is built, unit testing should be conducted. If every component is thoroughly tested, the integration runs more smoothly.
- I am responsible for continuously coaching developers on the best practices. Hence, frequent and thorough code reviews are a must, to enforce a very high quality of the developed workflows.
- Point of contact for technical issues.
- Involved in the **Constant Improvement**, optimisation of process.
