Education

Master in Computer Applications from CMJ University
Bachelor in Computer from IGNOU, New Delhi

Objective

To secure a responsible and growth oriented position in an organization. I would like to contribute my skills and abilities in the development of the organization and enhance my skill and knowledge while working with the organization

Technical Expertise	
Software Testing Automation/ Project / Test Management Tools:	Neoload,JMeter Rational Robot, Rational Test Manager, Selenium,TestComplete,JMeter,Appium NVDA,Sortsite,Totalvalidator,Burp suite,Accunitix,JIRA,Mantis,Basecamp, Postman,Zephyr,Xray,Cypress,Autify,Test link,RPA boat testing,Oracle fusion.
Databases:	Microsoft SQL Server, Sqllite, MYSQL, MongoDB,Oracle
Big Data &Devops	HIVE, Jenkins, Sonar, SOLR, Azure Cloud, Blockchain,AWS
Web Server	Apache, Tomcat
Application Servers	Web logic server 8.1, Jboss server, Websphere
Operating systems	Windows, MAC, IOS, Android
IDE	MyEclipse, Eclipse
Methodologies	Agile/Scrum, Waterfall, Iterative, Prototype
Languages:	.net, Java, Angular, AEM, PHP,Objective C

Professional Summary

A software professional with 21+ years of experience. in Quality/Management/Delivery of Software applications and products in the offshore delivery model with end to end responsibility. Experienced Project Management Professional with a passion for Software Testing and Quality Assurance

Drive complete QA process to meet defined SLA and KPIs.

o Delivery Management o Managing client relationship o Managing delivery team

o Ensuring Technical specialization in a testing domain.

o Represent the delivery team on pre-sales/business development activities

Specialties in Delivery, Test Planning and Test Designing, Test Management, Performance testing Test Execution,

Test cases, estimate the effort and lead the test execution, Defect Management. Expert in Software Testing - Functional Testing, System Testing, Regression Testing, Sanity Testing, Database Testing, Usability Testing. Performance Testing, Agile testing/process/ methodologies, Test metrics,Traceability Matrix etc.

Interacting with clients, understand the testing being performed and impart the knowledge to offshore team members. Identifying the impact and testing approach and strategy, testing scope based on the requirements and design documentation.

Deals with the following aspects to determine the quality of a software application – Quality model, External metrics, Internal metrics, Quality in use metrics. This standard presents some set of quality attributes for any software such as – Functionality, Reliability, Usability, Efficiency, Maintainability, Portability.

So far have the opportunity of Exposure in the following Industry/domains like Health & Insurance,Oracle ERP,Hotel and Travel, Retail, Manufacturing and Sales, e-Commerce, CMS Banks, Financial applications, Immigration consultancy, Web and Desktop based Applications, eCommerce,Complete Travel solutions,HRMS MIS, OSS, CRM, Chating applications,RPA boats,Fnancial accounting,Blockchain, CryptoExchange applications, Gaming applications, MLM, Maritime software etc.

Experience

Company:Virtusa (Contractual on payroll of Cynergy Systems) Feb2025 – Aug 2025

Location: Bengaluru

Project: Prudential (A&R)

Designation: Architect (Test Manager A&R)

- Develop and implement comprehensive test strategies for the Accounting and Reporting workstream.
- Lead and manage the testing team, ensuring all test activities are completed on time and within budget.

- Ensure thorough testing of oracle fusion finance modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation.

- Manage the integration testing with Azure Databricks Data Repository.
- Implement and manage test automation frameworks using watermelon.
- Provide regular updates and reports on testing progress, issues, and risks to stakeholders.
- Ensure compliance with industry standards and best practices in testing.

Project description

Client: Prudential

Future Finance Program A&R is delivering end to end modular solution which can be summarized into 5 major components: Finance operations, Accounting clouse,IFRS17,Reporting & Analysis, Systems Support. Under FFP the A&R workstream will oversee the implementation of global A&R Solution which supports individual units and Head office standardization ,simplification and automation process.

Company: Yiron Technologies

Sept 2023 – Feb 2025

Location: Chandigarh

Products: Multiple products in Travel,HRMS,Chat,CRM,RPA etc

Designation: QA Delivery Manager (Head of Quality)

- Drive complete QA process to meet defined SLA and KPIs.
- Delivery Management.
- Managing client relationship.
- Managing delivery team.
- Manage and ensure internal and external Quality Audits
- Ensuring Technical specialization in a testing domain.
- Represent the delivery team on pre-sales/business development activities.
- People Management, Performance management, coaching, mentoring of testing resources.
- Define Product/ project scope, goals and deliverables that support business/project goals in collaboration with senior management and stakeholders.
- Develop full-scale test strategies and plans and associated communications documents/process.
- Communicate project expectations to team members and stakeholders in a timely and clear fashion.
- Estimate the effort and Budget Required based on the scope and change in demand.
- Set and continually manage project expectations with team members and stakeholders.
- Identify and resolve issues and conflicts within the project team.
- Identify and manage project dependencies and critical path.
- Plan and schedule project timelines and the milestones and deliverables.
- Delivering High-Quality in various products for Travel Solutions | Expertise in B2C/B2B, BackOffice,DMC,CBT| Financial accounting and customer tracking systems for travel industry, HRMS,
- CRM,Chat software | RPA boat Implementation etc
- Prepare and update progress reports, metrics dashboards.

Company: Investis Digital Aug 2021 – Aug 2023

Location: Vadodara (Hybrid) Projects:

Multiple projects

Designation: QA Manager

- Triage and analyze defects to identify gaps in test coverage and improvements in the team's processes
- Maintain and continuously improve existing test development processes and practices
- Performs internal audits regularly to ensure that the department is adhering to processes
- Facilitate development/maintenance of quality control standards/metrics to determine improvement areas and strategies in the overall product development life cycle

- Will lead large testing efforts for application software, embedded software and firmware for custom applications with custom hardware
- Accountability for the Quality of products and related audits. For quality processes.
- Reports product health according to the data gathered during the product release checkpoints
- Ensure non-functional items such as scalability, operability, , are addressed
- Participate in efforts to standardize the QA tool set at Active, including defect tracking, test case management, resource and dependency tracking
- Ensure 100% test coverage across modules/platforms, Review existing test cases & test plan

Company: OceanManager Inc (Safaltek) (<https://oceanmanager.info/>)

Nov 2020 – July 2021 Location:

Chandigarh-Mohali

Designation: QA Lead

- Analyzed quality threshold metrics to compile QA report
- Investigated variances, performed root-cause analysis, and documented corrective actions to resolve complications.
- Work in close collaboration with engineering team & business owners to manage product/project related tasks □ Define a product roadmap and vision for the product;
- Translate marketing requirements and product features into software product feature and more detailed requirement (Epic, User stories), etc.
- Participate in Agile project inception, iteration meetings. Writes stories/acceptance criteria. Manage product backlog and user stories priorities;
- Expert in Functional Specification, User flows, System flows, Technical Specification including API specifications documentation;
- Managing Business expectations, facilitating communications and contributing to Business satisfaction during and after implementation;
- Strong experience in conducting User Acceptance Testing (UAT), Business Acceptance Testing (BAT) and documentation of test cases
- Expertise in designing and developing test plans and test scripts. -Ensure that all quality controls are identified, in place, and reviewed during the project
- Planning and achieving business targets at the organizational level.
- Requirement Analysis and ensure proper delivery
- Coordinating QA processes and activities across the organization.
- Planning and managing QA for the software applications.
- Modifying and implementing new processes for quality improvement and defect prevention.

Project/Product description

Ocean Manager is a Marine software product designed to meet all Quality, Health, Safety and Environment element of a ship management company to enhance safety and reduce risk to as low as practicable in ship -shore operations.

Company: Talentdefth India Pvt Ltd Dec 2019 – Oct 2020

Location: Chandigarh/Benguluru

Products: Multiple products in riding cab and ecommerce

Designation: Product/QA Manager

- Work in close collaboration with engineering team & business owners to manage product/project related tasks □ Define a product roadmap and vision for the product;
- Translate marketing requirements and product features into software product feature and more detailed requirement (Epic, User stories), etc.
- Participate in Agile project inception, iteration meetings. Writes stories/acceptance criteria. Manage product backlog and user stories priorities;

- Expert in Functional Specification, User flows, System flows, Technical Specification including API specifications documentation;
- Managing Business expectations, facilitating communications and contributing to Business satisfaction during and after implementation;
- Strong experience in conducting User Acceptance Testing (UAT), Business Acceptance Testing (BAT) and documentation of test cases
- Expertise in designing and developing test plans and test scripts. -Ensure that all quality controls are identified, in place, and reviewed during the project
- Planning and achieving business targets at the organizational level.
- Requirement Analysis and ensure proper delivery
- Coordinating QA processes and activities across the organization.
- Planning and managing QA for the software applications.
- Modifying and implementing new processes for quality improvement and defect prevention.
- Defining testing processes
- Identifying training needs and conducting trainings on testing and QA
- processes for the organization.

Webcom Systems Pvt. Ltd. (<https://webcomsystems.com>) Sept 2018 – Nov 2019

Location: Chandigarh

Products: Multiple products in riding cab and Blockchain crypto exchange

Designation: QA Manager Responsibilities:

- Planning and achieving business targets at the organizational level.
- Requirement Analysis and ensure proper delivery
- Coordinating QA processes and activities across the organization.
- Planning and managing QA for the software applications.
- Modifying and implementing new processes for quality improvement and defect prevention.
- Defining testing processes
- Identifying training needs and conducting trainings on testing and QA ➤ Processes for the organization.
- Project Management and Scheduling.
- Interactions/Communication with the development team Interaction/Communication with Global clients
- Execution of Test Cases, review test cases, effort estimation and leads the test execution □ Test Management-Preparing Test Plan, Test Cases. Test metrics,Traceability Matrix
- Team management- Managing Manual/Automation testing Teams (Automation Tools: Selenium,Neoload,Jmeter).Agile/Scrum process

Projects:

FutureCabs

Environment: (Android/IOS/web app) Apache, Tomcat, Websphere **Tools**

used:

Performance testing: Neoload/Jmeter,

Test /Projct Management: JIRA

Functional test automation : Selenium

API Testing: Postman

GPSTest

Big Data &Devops: HIVE, Jenkins,SOLR, Azure Cloud

Methodlogies: Agile/Scrum, Iterative

Databases: MYSQL, MongoDB

Project Description:

Future cab App is a cab service application used by End User. Anyone that needs affordable short to mid-distance transportation can use this App to hire nearest cab or taxi. It is similar like Uber and Ola. It's target audience can be any who want to hire taxi instead of public transport. Future cab nearest driver will receive the job and user can pay the driver via cash./online. Future Cabs is a ridesharing app for fast, reliable rides in minutes – day or night. Future Cabs offers different levels of service, ranging from economic to luxury travel. The cabs are reserved through a mobile app and also through their website and the service accepts both cash and cashless payments.

Multiple projects on Block Chan/Digital/Crypto Exchange Platform

Full-featured spot trading platform for the cryptocurrencies such as Bitcoin, Ethereum, etc.

A Digital Exchange Platform (CEP) or Digital Currency Exchange (CCE) is a blockchain based digital platform that assists investors to trade digital currencies. CEP assists in making peer-to-peer smart, secure and speedy digital transactions. Unique time stamping feature of CEP makes all transactions carried through it absolutely immutable in nature. In nut shell, it gives digital investors more power and freedom to buy and sell digital coins

Company: Anet Corp (www.anetcorp.com)

May 2015 –Sept 2018

Location: Mohali-Chandigarh

Designation: QA Lead Responsibilities:

- ✓ Planning and achieving business targets at the organizational level.
- ✓ Coordinating QA processes and activities across the organization.
- ✓ Planning and managing QA for the software applications.
- ✓ Modifying and implementing new processes for quality improvement and defect prevention.
- ✓ Defining testing processes
- ✓ Identifying training needs and conducting trainings on testing and QA ✓ processes for the organization.
- ✓ Project Management and Scheduling.
- ✓ Requirements Analysis & Management.
- ✓ Interactions/Communication with the development team /Offshore team
- ✓ Interaction/Communication with Global clients
- Execution of Test Cases, review test cases, effort estimation and leads the test execution ▪ Test Management-Preparing Test Plan, Test Cases. Test metrics,Traceability Matrix
- Team management- Managing Manual/Automation testing Teams (Automation Tools: Selenium,Neoload,Jmeter).Agile/Scrum process **Projects:**

XBlinx Environment: (MySQL, Java,AngularJS) Jboss server, Apache, Tomcat

Tools used: Jmeter,JIRA,Selenium,OATS,Cypress

API Testing: Postman

Big Data &Devops: HIVE, Jenkins,SOLR, Azure Cloud

Methodologies: Agile/Scrum, Iterative

Databases: Microsoft SQL Server,Mongo DB

Big Data &Devops: HIVE, Jenkins,SOLR, AWS Cloud

Project Description: XBlinx is True “Any time, Any Where”, Web based, single sign on portal to streamline various functions of company including document management system, Time and Billing and recruitment portal.It covers following :

- Company Intra-net Employee Portal
- Time & Billing Portal □ Recruitment Portal

NVIDIA Tesla Data Center Savings Calculator Tools used: Neoload/Jemeter, JIRA, Selenium

Environment: (mongodb java ,angular ecma6)

Tools used: Jmeter, JIRA, Selenium, Postman

Big Data & Devops: HIVE, Jenkins, SOLR, AWS

Methodologies: Iterative, Prototype, Waterfall

Databases: Microsoft SQL Server

Big Data & Devops: HIVE, Jenkins, SOLR, AWS Cloud

Project Description: With this calculator, you get a snapshot of how a GPU-accelerated data center can save money or increase throughput in your data center. Simply enter more information about your HPC and AI workloads to get customized results

Company: Fiverivers Inc (www.fiverivers.net) **June 2013 –May 2015**

Location: Mohali-Chandigarh

Designation: QA Lead Responsibilities:

- Requirement Analysis, Preparing Test Plan, Test Cases.
- Execution of Test Cases, review test cases, effort estimation and leads the test execution ▪ Analyzing Results and Reporting bugs using Test management tools, Regression tests ▪ Performed Smoke Testing (Build Verification Test) and Sanity Testing.
- Performed System Testing and GUI Testing., Performance Testing, Security testing
- Regular interactions with the development team /Offshore team
- Analysis of Actual and Expected results
- Regular Interaction with overseas clients
- Team management, Agile/Scrum process **Projects:**

Sunny Electricals (eCommerce web app)

Environment: (SQL server 2008, C#.NET, ASP.NET 4.0, JavaScript)

Tools used: JIRA, Accuntix, Selenium, Postman

Methodologies: Iterative Project

Description:

Sunny Electricals is an integration middleware product that maximizes the value of existing applications, enables PayPal/Wordpay/cardsave Integration, Current security standards, Quantity based orders , No pre-registration required for purchase , Product comparison (within same category, Larger product area, Wish list, Basket preview

EPmE(Desktop +web)

Environment: (SQL server 2008, C#.NET, Window Based App, ASP.NET 4.0, JavaScript)

Tools used: JIRA, Rational Robot

Methodologies: Iterative

Project Description:

This document establishes the business requirements for a software application with the aim to assist investigators and prosecutors, primarily within law enforcement, to present digital files (evidence) within a courtroom environment and, in preparation for the same, to create, review and agree such evidence.

The aim of this application will be to assist users with displaying pre-prepared evidence files in a courtroom environment and not to try and influence current practice in an investigation or preparation of files / evidence currently undertaken by police forces.

Company: WWICS Ltd (www.wwicsgroup.com) **Jan2013- May 2013** **Location:** Mohali-Chandigarh

Designation: QC IT Responsibilities:

- Requirement Analysis
- Preparing Test Plan, Test Cases.
- Execution of Test Cases, review test cases, estimates the effort, and leads the test execution
- Analyzing Results and Reporting bugs using Test management tools,
- -Regression tests
- Performed Smoke Testing (Build Verification Test) and Sanity Testing.
- Performed System Testing and GUI Testing., Performance Testing
- Regular interactions with the development team
- Analysis of Actual and Expected results
- **Implementations, Training and support of software to end users** ▪ Team management

Projects:

Z-Axis (Desktop +web)

Environment: (Oracle, C#.NET, Window Based App, ASP.NET 4.0, JavaScript, VB.net

Tools used: Mantis, Accuntix, Inhouse tools

Methodologies: Iterative

Project Description: Z-axis is a complete MIS (Management Information system), Complete OSS (Operation support system) and CRM (Customer relationship Management System) and Leads generation system for an Immigration Consultancy company.

Company: SEbiz InfoTech Ltd. (Netsmartz) (www.Sebiz.net, www.netsmartz.net) **CMMI 3, ISO 9001:2000 Certified Company** **Sept-2009- Oct 2012**

Location: IT Park-Chandigarh **Designation:**

Sr. QC Engineer

Responsibilities:

- Requirement Analysis
- Preparing Test Plan, Test Cases.
- Execution of Test Cases, review test cases, estimates the effort, and leads the test execution
- Analyzing Results and Reporting bugs using Test management tools,
- -Regression tests
- Performed Smoke Testing (Build Verification Test) and Sanity Testing.
- Performed System Testing and GUI Testing., Performance Testing
- Regular interactions with the development team and client Analysis of Actual and Expected results **Projects:**

DreamSaver (Desktop +web)

Environment: (Sqlite, C#.NET, Window Based App, ASP.NET 4.0, JavaScript, Java Applet (Creating a Browser Extension)

Project Description: Dreamsaver is a web and window application in asp.net 4.0. And along with developed a browser extension for all Browsers. It is being created in JavaScript. It is a plugin like a bookmark in JavaScript with the help of Java Applets. Using this extension, users will be able to save the text, images and video on their local system. The data the user saved from JavaScript (extension) will be showed onto the window application (developed in c#.net).

Enhance well

Environment: (Objective -C, SQLite, SQL Server2005, Visual Source Safe)

Project Description

There are two parts of this Project.

1. Enhance well Trainer app (for iPhone, iPad)

2. Enhance well Client app (For iPhone)

Enhance well Trainer app is an attempt to manage Gym trainer and clients

Enhance well Client app is an attempt to see the client's information filled by his trainer. **brISK**

Environment: (ASP.NET, MS SQL Server2005, Visual Source Safe, C#.)AWS

Tools used: Mantis,Basecamp, Rational Robot,Neoload,Accuntix Background

of the application- brisk:

It's the disaster management system for banks and financial organizations/institutions

The Enterprise Risk Assessments are an integral part of the decision making process for

- Implementing new products and services
- Making investments in new technology
- Selecting and working with vendors
- Allocating time and resources for audit and compliance.

Brintech's Enterprise Risk Assessment provides a framework that a bank's executive team can adopt and update at a rate comfortable to them. brisk, Brintech's industry-leading online toolset to identify, monitor, and measure risk controls, the Enterprise Risk Assessment enables management to effectively evaluate and monitor the institution's risk environment and the effectiveness of its risk control

Company: Connoisseur InfoTech (www.econnoisseur.com) Aug2007- Sept-2009

Location: Mohali-Chandigarh

Designation: Sr. Project Manager (Testing) Responsibilities:

- Requirement Analysis
- Preparing Test Plan, Test Cases.
- Execution of Test Cases, review test cases, estimates the effort, and leads the test execution, Regression tests
 - Analyzing Results and Reporting bugs using Test management tools,
- Performed Smoke Testing (Build Verification Test) and Sanity Testing.
- Performed System Testing and GUI Testing., Performance Testing
- Regular interactions with the development team and client
- Analysis of Actual and Expected results

Projects:

LPG

Environment: (ASP.NET, MS SQL Server2005, Visual Source Safe, C#.) Tools used: Mantis,Basecamp, Rational Robot,Neoload,Accuntix

The Client ----Legacy Planning Group Inc.

Legacy Planning Group Inc. (**LPG**) provides customized money management (and ancillary financial planning) services to its clients who are /may be located throughout the United States and the rest of the world.

Background of the application –LPG

The new application and portal is primarily targeted to LPG personnel involved in the portfolio and wealth management of LPG's Clients. The overall project consists of portfolio/client administrative functions, portfolio monitoring and management functions and various LPG/client user interfaces.

Chrystal Networks

Environment: (ASP.NET, MS SQL Server2005, Visual Source Safe, C#.)

Tools used: Neoload/ Mantis

Chrystal Networks isB2B application dedicated to becoming the leading D2D trading hub and equipment procurement system in the secondary market for dealers of telecommunications, data networking gear, business telephones, and excess electronic equipment.

Its purpose is to provide the best time-saving processes and ease of use for companies that deal in secondary, end-of-life, excess telecom parts, computers, servers, peripherals, DC power systems, and hard to find surplus equipment. By utilizing the latest technologies and creation of unique processes, Chrystal Networks is motivated to stay ahead of the competition with ongoing enhancements that will benefit its customers & will continue to make future enhancements based on the overall customer consensus

Company: Electrobug Technologies Ltd (www.electrobug.com now taken over by eClerx). May 2005 –3 Aug 2007

Location: Gurgaon

Designation: QA Analyst

Projects:

RTC (Real Time Crawling System)

Environment: (ASP.NET, MS SQL Server, Visual Source Safe, C#.)

Responsibilities:-

Writing test cases ,Executing test cases,Preparing Bug Report,GUI Testing,Performing Functionality testing,Customer requirement analysis & initiating corrective action. **Description**

RTC is an online pricing intelligence - providing a transparent view of the marketplace for making strategic and tactical pricing decisions. In the travel, air and hotel, RTC provide the data retrieval; data matching, reports and production facilities to outsource most of the pricing data collection-needs of our clients. RTC provides fast, easy and up-to-date market intelligence to enable our client to make intelligent real-time pricing decisions.

EAZY REVENUE MANAGEMENT SYSTEM (EzRMS).

Description: It is a web interface used for showing crawled data. Data, which were crawled by EBW, is sent to clients using this interface. Client can see prices for the next 90days, which were prevailing on the Internet. They can use this data in the future course of action and in making future strategies of their organization. This interface shows the crawled data by site, by hotel and by date. It has functionality for Set Alerts, Set Crawl, Graph and Report Archive etc.

Company: Electronics Corporation of India Ltd (ECIL) Aug 2001 – May 2005

Location: New Delhi (Govt. Sarvodaya vidyalya)

Designation: Sr. Faculty (Computer Science) cum project coordinator **Responsibilities:**

- Teaching Computer Science for 12th Std CBSE
- Project coordinator for computer education project in Delhi and Himachal Pradesh
- Ensuring of smoothly running of the computer education project in Govt schools of Delhi & H.P.

Personal Details:
