Work Experience

Biocon Biologics, Bangalore

August 2023 - Present

Data Analyst Executive

- Developed an AI-powered application for data archival, enhancing search efficiency by 60%.
- Created medical dashboards, device tracking tools, and finance reports in Power BI, improving decision-making efficiency by 25%.
- Established Azure infrastructure across four regions, configuring network, firewall, VMs, and databases to support 5+ external vendors for PAS-X and Gen AI applications.
- Designed multilingual consent forms for EU and US customers, facilitating opt-in for BBL communications, and streamlined procurement requests, reducing processing time by 20%.
- Implemented a Standard Operating Procedure (SOP) search application to improve accessibility and compliance tracking, resulting in a 30% reduction in retrieval time for SOP documents.
- Tools Used: Microsoft Power BI, SQL, Python, Azure Cloud, Power Apps, Azure Data Factory, Data Bricks, Power Automate and Advanced Excel.

Biocon Biologics, Bangalore

February 2023 - July 2023

Data Analyst Intern

- Built a real-time inventory report for 60+ applications and a financial report analyzing vendor payments and purchase orders.
- Created Trackwise Power BI reports to support Quality Management Systems, increasing compliance tracking efficiency by 30%.
- Acquired hands-on experience in Azure, focused on cloud services, resource management and enhanced skills in infrastructure development and cost monitoring.
- Tools used: Azure Cloud, Microsoft Power BI, Excel

Education

August 2021 - June 2023	M.Sc. (Data Science) at Vellore Institute of Technology	(GPA: 8.57/10.0)
August 2018 - June 2021	B.Sc. (Hons) Mathematics at University of Delhi	(GPA: 8.16/10.0)

Skills

Technologies & Tools: Advanced Excel, Python, SQL, R Programming, Power BI, Tableau, Azure Cloud, Azure Data Bricks, Machine Learning Algorithms, Deep Learning Algorithms

Soft Skills: Teamwork, Communication, Decision Making, Presentation

Academics Projects

- **Astronomical Object Classification using Machine Learning:** Classified celestial objects into Stars, Galaxies, and Quasars using machine learning, achieved 98% accuracy with a Random Forest model.
- **AI Chat Assistant:** Constructed an interactive web-based AI chat assistant using Python and Flask, integrated external APIs for real-time weather and news updates, attained 95% accuracy in information retrieval.
- **Breast Cancer Detection:** Utilized a neural network with binary cross-entropy loss and Adam optimizer to classify breast tumors as Malignant or Benign, obtained 97% accuracy.
- **Inventory Management System:** Implemented a NoSQL-based Inventory Management System of over 500 items, optimized transaction management and data handling with JSON.
- **Sales Forecasting Model:** Developed a time series model to predict monthly sales trends with 90% accuracy. Utilized SQL and Python for data extraction and transformation, and created Power BI reports for real-time insights.
